

## **Welcome to the Landfall Farm Fresh Experience**

The Archer Family has farmed Landfall, on the banks of the Tamar River since 1876. Five generations of the family have worked this land to produce quality farm products most notably award winning Angus beef and Prime Lamb. Much time has gone into selection of genetics, from around the globe, to produce a meat product that is of the highest standard achievable.

At Landfall we believe it is very important that you, the consumer, have access to a locally grown product of the highest quality which is supplied directly from our farm to your home.

At Landfall all livestock are grown in a humane, free range grazing environment within the strict guidelines of a quality assured program. All of these aspects combine to give you confidence our product is free from contaminants. All Landfall Farm Fresh products are hormone and growth promotant free.

We are passionate about our meat and delivering our product to you at its absolute best.

We have pleasure in supplying you with this locally grown produce and we hope you enjoy your Landfall eating experience.
