Welcome

We invite you to attend our 46th Annual Autumn on property auction and are pleased to offer you 251 performance recorded rising two-year bulls.

Whilst sale day is merely one day in the year the presentation of these bulls is a journey that starts long before the day. For these bulls their conception took place in the Spring of 2021, the result of a huge commitment from the Landfall team to carry out the necessary tasks to synchronize and artificially breed all our females. In this offering 66% of the bulls are the result of AI and 30% are the result of ET, helping us to continually drive our rate of genetic gain forward and provide a performance package that remains relevant to commercial beef production. It can be challenging to make these predictions three years prior, therefore we look for continual improvement in our genetic production system to ensure that we repeatedly add value to our clients herds and the beef value chain.

The dominant sire lines in this offering are Te Mania Pheasantry P1479, Landfall New Ground N90 (and sons), Rennylea L519 (and sons) and we also see two new sire lines in Sitz Stellar and Sterling Pacific. One of the factors that drives our decision making when it comes to the use of sires in the Landfall herd is the daughter performance in the herd. Both New Ground and L519 have given us daughters that we see performing well in our production system whilst also being functional and phenotypically attractive.

The last 18 months has demonstrated that unpredictability is the only predictable we can look for in the beef market. We can only influence what we can control which most of the time is inside the farm gate. Focusing on the key profit drivers of fertility

and maximising kilograms of liveweight production will see better business performance rather than getting distracted with what we largely cannot control outside the farm gate.

We would like to take this opportunity to thank all the Landfall staff, family members and associates for their valuable contribution to our program. The commitment and dedication of these people is vital to our success. We would also like to thank you, our clients for your continued support of the Landfall program. We appreciate each one of you for the role you play in making Landfall Angus what it is.

We welcome inspection of the offering and the wider Landfall herd anytime in the lead up to the sale.

Kind Regards,

The Archer Family.

About Landfall Angus

Landfall Angus is a family owned and operated business located in the Tamar Valley in Northern Tasmania. Our cow herd consists of over 2500 registered females, making Landfall one of the largest Angus Seedstock herds in Australia.

Landfall Angus cattle perform well in the natural environments of Australia, a direct result of our strong focus on the commercial realities of beef production. The Landfall Angus cow herd is fertile, functional and high performing. Careful genetic selection and improved production management techniques ensure that Landfall is a leading Seedstock herd and producer of Angus genetics in Australia.

HISTORY

Landfall Angus was established in 1948 with the purchase of twelve females from the Australian mainland. The original Landfall cows were selected for their large frame and femininity. Sires from “Naranghi” in New South Wales, at that time bred by Mr. John Bott, were consistently breeding progeny that excelled in fertility and growth. They complimented the Landfall cows very well and these sires were used for 20 years.

In the early years of breeding bulls a small number were sold privately to regular Tasmanian and King Island clients. From 1975 an annual auction has been held offering bulls and females. In 2004 a spring sale was introduced and is held annually on property offering bulls.

We supply our clients with high quality Angus genetics that are fertile, structurally sound, easy doing and low maintenance without compromising the importance of growth and carcass performance.

TODAY

Landfall Angus is today owned and managed by the fourth and fifth generation of the Archer family. The Landfall herd now consists of over 5000 registered animals running over two main production centres in the Tamar Valley, calving in excess of 2500 registered females. The Angus herd is run alongside a self-replacing flock of composite sheep.

The Landfall herd is run under commercial conditions, in large contemporary groups. Artificial insemination and embryo transplant are used to increase the rate of genetic gain in our herd. Strict criteria is used for the selection of sires and dams within our breeding programs.

A strong emphasis is placed on the traits that contribute positively to the commercial profitability and sustainability of beef production. Firstly we aim to breed a functional female, focussing on structural soundness, docility, fertility and calving ease. Animals are joined for restricted periods resulting in short calving periods. Any animal not meeting the criteria is culled. The focus then moves towards growth and carcass quality with targets set above breed average whilst avoiding extremes. All registered animals are performance recorded with Breedplan and Landfall has been a member of Angus Breedplan since its inception in the early 1980's. Data is collected from animals run in large groups allowing us to directly compare genetics without the impact of environmental differentiation.

Annual sales are held on property in the Autumn and Spring, along with paddock sales throughout the year.

OUR GOALS AT LANDFALL ARE:

1. To provide our clients with superior genetics to help them achieve a sound investment and help to improve their bottom-line.
2. To produce genetics which perform well under the natural environments of Australia.
3. To have relationships of high integrity with our clients.

Sale Notes

1. Location

8 kilometres from the centre of Launceston, North on East Tamar Highway. Follow A8 towards Georgetown. See page 111 for map and travel information.

2. Rebates

4% rebate commission offered on all bulls to agents settling within 7 days of invoice. All purchasers must nominate their agent 24hrs prior to the sale with Nutrien Livestock. Please email livestocktas@nutrien.com.au or frank@landfall.com.au

3. Freight

Free freight on all bulls to Melbourne, Grassy and Lady Barron ports for lots sold by auction. Free freight on all bulls within mainland Tasmania. The vendor or his agent will make freight arrangements (conditions apply).

4. Nutrition

All bulls have been fed grass with supplement silage.

5. Animal Health

- All bulls have been semen tested and had their penis and testicles examined.
- All bulls have been tested as BVD P.I. negative.
- All bulls have been vaccinated with Vibrovax, Pestigard and Ultravac 7 in 1.

6. Recessive Genetic Conditions

All lots are clearly marked with their respective genetic status.

7. Bull Guarantee

All bulls covered by the Landfall Bull Guarantee (see details on page 100 of this catalogue).

8. Joining Sires

Lots 1 to 82 have been used for joining in the Landfall herd in the Spring of 2023. Please take this into account when assessing these bulls.

9. Semen Rights

Landfall Angus reserves the right to collect any bull sold for use in the Landfall herd. Collection will be at Landfall's expense and at the convenience of the purchaser.

10. Photos and Videos

Ben Hooper from Clear Vision Imaging has captured videos of all sale lots. They will be available Mid-February onwards at www.landfall.com.au

11. TACE EBV's

TACE EBV's are used throughout this catalogue. In moving to a new herd recording software we have had the usual transition challenges. A user error has resulted in some of the yearling bulls missing some analysed traits. This was only identified during the compilation of this catalogue. We have now rectified this issue, therefore for updated EBV's please refer to the August analysis.

11. Registrations

Please note: some lots are HBR registered and some are APR registered. All animals are eligible for transfer with their respective registration status.

12. Inspection

Bulls will be available for inspection on the morning of the sale from 9am. We welcome inspection any other time prior to the sale by appointment, please call:

Frank Archer - 0417 506 163
Ed Archer - 0417 337 144

PLEASE NOTE:

As vendors, the Archer family at Landfall want your valuable new purchase to be given every opportunity to travel and settle into their new environment with a minimum of stress.

To this end we ask you to nominate;

CLEAR DELIVERY INSTRUCTIONS.

Short notice requests for collection of animals will not be accepted.

Thank you for your co-operation.

DNA SUFFIX KEY:

The suffix displayed at the end of each animal's name indicates the DNA parentage verification that has been conducted by Angus Australia.

PV: both parents have been verified by DNA.

SV: the sire has been verified by DNA.

DV: the dam has been verified by DNA.

#: DNA verification has not been conducted.

E: DNA verification has identified that the sire and/or dam may possibly be incorrect, but this cannot be confirmed conclusively.

DISCLAIMER: Animal details included in this catalogue, including but not limited to pedigree, DNA information, Estimated Breeding Values (EBVs) and Index values, are based on information provided by the breeder or owner of the animal. Whilst all reasonable care has been taken to ensure that the information provided in this catalogue was correct at the time of publication, neither the vendor, Angus Australia or the selling agents assume any responsibility for the accuracy or completeness of the information, nor for the outcome (including consequential loss) of any action taken based on this information.

Notes

A carcass improvement sire that has attracted plenty of interest in the Angus world over the past 12 months. His sons topped sales at all four of the seedstock producers that had exclusive use. Three sons sold for \$190,000 or more with our own Landfall Signature selling to Dunoon Angus for \$240,000. His daughters have just weaned their first calves in the Landfall herd with good results. Whilst his daughters are generally of a flatter muscle pattern, they are not frail and have coped well with lactation and rejoining for their second pregnancy.

Notes

This catalogue brings another quality set of L519 sons. A sire that we have gone back to several times as he offers consistency in phenotype, function and docility. Well suited to use over moderately framed females, L519 adds length of body and growth. A well-balanced performance package that excels in the key production traits.

Notes

Another sire we keep going back to for his consistency and depth of breeding. New Ground is one of the most heavily used and consistent sires in the Angus breed over the last three years and we continue to receive positive feedback on the progeny he is leaving behind in other herds. Docility, doing ability, weight for age and length of body are just some of the areas that New Ground progeny excel in.

Notes

Inspected in the US in 2019, Stellar presented with tremendous power and muscle through the hind quarter whilst maintaining a clean front end. A sire that breeds sound and functional cattle we have been particularly impressed with his daughters in the Landfall herd. He possesses a balanced data set with a healthy birth to growth spread. We have used him on females with added carcass merit as that is the area he needs improvement. The first sons on offer at Landfall.

Notes

A power sire with excessive early growth. His progeny are moderate, high capacity and heavily muscled, typical of what we see from the Baldrige Isabel Y69 line. Expect to see Pacific sons with an early maturity style and ruggedness to them. The first sons on offer at Landfall.

Notes

Ashland is a high-performance sire with a well-balanced dataset except for rib and rump fat. Progeny are moderately framed, with good length and depth of body.

Stud stock insurance with all bulls purchased at the Landfall Angus Autumn Sale

For all bulls sold in this catalogue, specialist agricultural insurer Achmea Australia will provide 2 Star Mortality cover for three months (including accidental loss of use). This cover has been paid for by Landfall Angus.

At the end of the three months, if you would like to purchase cover, please contact our Farm Insurance Specialists who are attending the sale:
Michelle Stevens (0437 249 682) and Josh Pearce (0459 857 315)

Our flexible options include:

- ☆ 1 Star Mortality only (including transit)
- ☆☆ 2 Star Mortality including accidental loss of use
- ☆☆☆ 3 Star Mortality including accidental loss of use, sickness and disease.

Request an appointment with us today:

Caring For Your Bulls

More calves, more years

Your bull is an important investment. With proper management you can achieve a longer working life from your bull resulting in more calves at a reduced cost per calf.

1. Arrival on farm

- a. Have some quiet cows or steers in the yard when the bull arrives. He will often be unsettled as he has left his mates and travelled on a truck for his first time. Give him some time to adapt to his new surroundings.

2. Pre-Joining

- a. Your new bulls will benefit from exposure to some empty cows for 2-3 weeks prior to their normal breeding period. This exposure will allow them to service some females and become exposed to any of the normal pathogens in your cow herd. If you have purchased multiple bulls, expose them only two at a time. It is then important to give your bull time to recover following the exposure period before the joining season begins.
- b. Do a pre-joining Breeding Soundness Examination (BSE) on all bulls to evaluate; structure, testicles and serving capability. This is the opportunity to identify any bull which may delay cows going in calf. Also administer booster vaccinations.

3. Joining

- a. Don't over join new bulls (maximum of 40 cows).
- b. Multi-sire join where possible to minimize the risks associated with a bull breaking down in the joining period. If you need to single sire join observe closely and rotate with a proven bull for at least 1 cycle. New bulls are the most at risk of break down, ensure you check them regularly.
- c. Most bull fertility issues develop during the joining period rather than being pre-existing problems. This means regular checking of bulls is essential (2-3 times a week for the first 3 weeks then weekly).

Check for:

- Try to observe the bull serving (mounting is not a successful serve)
- Any signs for lameness
- Evidence of penile or preputial swelling
- Any signs of ill health (lethargic, etc)
- Number of cows cycling (5% cycling per day if not in calf, this should decrease as cows conceive)

4. Post Joining

- a. Your bulls will spend most of their life in the bull paddock. You need to try minimize bull paddock injuries (bull fights) by not overcrowding the paddocks and possibly removing aggressive dominant bulls. Ensure young bulls have access to adequate feed to continue growing. Mature bulls should not be allowed to get fat, keep them in condition score 3. Mature bulls kept in body condition score 3 will have a longer working life.
- b. Pregnancy test early to identify any joining issues. This early pregnancy test will not only give you more time to make better decisions but it will also help identify the potential case of sub-fertility and allow you to prevent the problem in subsequent years.

Understanding the TransTasman Angus Cattle Evaluation (TACE)

WHAT IS THE TRANSTASMAN ANGUS CATTLE EVALUATION?

The TransTasman Angus Cattle Evaluation is the genetic evaluation program adopted by Angus Australia for Angus and Angus influenced beef cattle. The TransTasman Angus Cattle Evaluation uses Best Linear Unbiased Prediction (BLUP) technology to produce Estimated Breeding Values (EBVs) of recorded cattle for a range of important production traits (e.g. weight, carcass, fertility).

The TransTasman Angus Cattle Evaluation is an international genetic evaluation and includes pedigree, performance and genomic information from the Angus Australia and Angus New Zealand databases, along with selected information from the American and Canadian Angus Associations.

The TransTasman Angus Cattle Evaluation utilises a range of genetic evaluation software, including the internationally recognised BLUPF90 family of programs, and BREEDPLAN® beef genetic evaluation analytical software, as developed by the Animal Genetics and Breeding Unit (AGBU), a joint institute of NSW Agriculture and the University of New England, and Meat and Livestock Australia Limited (MLA).

WHAT IS AN EBV?

An animal's breeding value can be defined as its genetic merit for each trait. While it is not possible to determine an animal's true breeding value, it is possible to estimate it. These estimates of an animal's true breeding value are called EBVs (Estimated Breeding Values).

EBVs are expressed as the difference between an individual animal's genetics and a historical genetic level (i.e. group of animals) within the TACE genetic evaluation, and are reported in the units in which the measurements are taken.

USING EBVS TO COMPARE THE GENETICS OF TWO ANIMALS

TACE EBVs can be used to estimate the expected difference in the genetics of two animals, with the expected difference equating to half the difference in the EBVs of the animals, all other things being equal (e.g. they are joined to the same animal/s).

For example, a bull with a 200 Day Growth EBV of +60 would be expected to produce progeny that are, on average, 10 kg heavier at 200 days of age than a bull with a 200 Day Growth EBV of +40 kg (i.e. 20 kg

difference between the sire's EBVs, then halved as the sire only contributes half the genetics).

Or similarly, a bull with an IMF EBV of +3.0 would be expected to produce progeny with on average, 1% more intramuscular fat in a 400 kg carcass than a bull with a IMF EBV of +1.0 (i.e. 2% difference between the sire's EBVs, then halved as the sire only contributes half the genetics).

USING EBVS TO BENCHMARK AN ANIMAL'S GENETICS WITH THE BREED

EBVs can also be used to benchmark an animal's genetics relative to the genetics of other Angus or Angus infused animals in Australia.

To benchmark an animal's genetics relative to other Angus animals, an animal's EBV can be compared to the EBV reference tables, which provide:

- the breed average EBV
- the percentile bands table

The current breed average EBV is listed on the bottom of each page in this publication, while the current EBV reference tables are included at the end of these introductory notes. For easy reference, the percentile band in which an animal's EBV ranks is also published in association with the EBV.

CONSIDERING ACCURACY

An accuracy value is published with each EBV, and is usually displayed as a percentage value immediately below the EBV.

The accuracy value provides an indication of the reliability of the EBV in estimating the animal's genetics (or true breeding value), and is an indication of the amount of information that has been used in the calculation of the EBV.

EBVs with accuracy values below 50% should be considered as preliminary or of low accuracy, 50-74% as of medium accuracy, 75-90% of medium to high accuracy, and 90% or greater as high accuracy.

DESCRIPTION OF TACE EBVS

EBVs are calculated for a range of traits within TACE, covering calving ease, growth, fertility, maternal performance, carcass merit, feed efficiency and structural soundness. A description of each EBV included in this publication is provided on the following page.

UNDERSTANDING ESTIMATED BREEDING VALUES (EBVs)

BIRTH

| | | | |
|--------|------|---|--|
| CEDir | % | Genetic differences in the ability of a sire's calves to be born unassisted from 2 year old heifers. | Higher EBVs indicate fewer calving difficulties in 2 year old heifers. |
| CEDtrs | % | Genetic differences in the ability of a sire's daughters to calve unassisted at 2 years of age. | Higher EBVs indicate fewer calving difficulties in 2 year old heifers. |
| GL | days | Genetic differences between animals in the length of time from the date of conception to the birth of the calf. | Lower EBVs indicate shorter gestation length. |
| BW | kg | Genetic differences between animals in calf weight at birth. | Lower EBVs indicate lighter birth weight. |

GROWTH

| | | | |
|---------|----|--|---|
| 200 Day | kg | Genetic differences between animals in live weight at 200 days of age due to genetics for growth. | Higher EBVs indicate heavier live weight. |
| 400 Day | kg | Genetic differences between animals in live weight at 400 days of age. | Higher EBVs indicate heavier live weight. |
| 600 Day | kg | Genetic differences between animals in live weight at 600 days of age. | Higher EBVs indicate heavier live weight. |
| MCW | kg | Genetic differences between animals in live weight of cows at 5 years of age. | Higher EBVs indicate heavier mature weight. |
| Milk | kg | Genetic differences between animals in live weight at 200 days of age due to the maternal contribution of its dam. | Higher EBVs indicate heavier live weight. |

FERTILITY

| | | | |
|-----|------|---|--|
| DtC | days | Genetic differences between animals in the time from the start of the joining period (i.e. when the female is introduced to a bull) until subsequent calving. | Lower EBVs indicate shorter time to calving. |
| SS | cm | Genetic differences between animals in scrotal circumference at 400 days of age. | Higher EBVs indicate larger scrotal circumference. |

CARCASE

| | | | |
|---------|-----------------|--|--|
| CWT | kg | Genetic differences between animals in hot standard carcase weight at 750 days of age. | Higher EBVs indicate heavier carcase weight. |
| EMA | cm ² | Genetic differences between animals in eye muscle area at the 12/13th rib site in a 400 kg carcase. | Higher EBVs indicate larger eye muscle area. |
| Rib Fat | mm | Genetic differences between animals in fat depth at the 12/13th rib site in a 400 kg carcase. | Higher EBVs indicate more fat. |
| P8 Fat | mm | Genetic differences between animals in fat depth at the P8 rump site in a 400 kg carcase. | Higher EBVs indicate more fat. |
| RBV | % | Genetic differences between animals in boned out saleable meat from a 400 kg carcase. | Higher EBVs indicate higher yield. |
| IMF | % | Genetic differences between animals in intramuscular fat (marbling) at the 12/13th rib site in a 400 kg carcase. | Higher EBVs indicate more intramuscular fat. |

OTHER

| | | | |
|-------|--------|--|---|
| NFI-F | kg/day | Genetic differences between animals in feed intake at a standard weight and rate of weight gain when animals are in a feedlot finishing phase. | Lower EBVs indicate more feed efficiency. |
| Doc | % | Genetic differences between animals in temperament. | Higher EBVs indicate better temperament. |

STRUCTURE

| | | | |
|------------|-------|--|--|
| Foot Angle | score | Genetic differences in foot angle (strength of pastern, depth of heel). | Lower EBVs indicate more desirable foot angle. |
| Claw Set | score | Genetic differences in claw set structure (shape and evenness of claws). | Lower EBVs indicate more desirable claw structure. |

SELECTION INDEXES

| | | | |
|------|----|--|---|
| \$A | \$ | Genetic differences between animals in net profitability per cow joined in a typical commercial self replacing herd using Angus bulls. This selection index is not specific to a particular production system or market end-point, but identifies animals that will improve overall profitability in the majority of commercial grass and grain finishing beef production systems. | Higher selection index values indicate greater profitability. |
| \$D | \$ | Genetic differences between animals in net profitability per cow joined in a commercial self replacing herd targeting the \$D supermarket trade. | Higher selection index values indicate greater profitability. |
| \$GN | \$ | Genetic differences between animals in net profitability per cow joined in a commercial self replacing herd targeting pasture grown steers with a 250 day feedlot finishing period for the grain fed high quality, highly marbled markets. | Higher selection index values indicate greater profitability. |
| \$GS | \$ | Genetic differences between animals in net profitability per cow joined in a commercial self replacing herd targeting pasture finished steers. | Higher selection index values indicate greater profitability. |

Bull Guarantee

At Landfall we understand and value the economic importance of fertility within a beef herd. Empty cows are a huge cost to a producer and at Landfall we are doing our utmost to limit the unexpected outcomes in a breeding situation.

In an endeavour to provide our clients with a professional service, we have implemented this bull guarantee. It is to ensure that both Landfall and you (our valued client) have a clear understanding of each others obligations.

Our breeding bulls are assessed under a stringent set of guidelines to ensure minimal exposure of our clients to fertility issues.

- ✓ All bulls are structurally assessed and those that don't meet the specifications are culled.
- ✓ All bulls are semen tested and have their penis checked by an independent veterinarian.

At Landfall we are aware that even after these stringent tests are carried out that there is a risk that a breeding bull may still not work to their expected potential. Therefore our guarantee covers that risk; however it does not replace good management and due care by the purchaser.

GUIDELINES

Landfall guarantees breeding bulls from the date of purchase against loss of fertility due to structural failure of the bull for a period of two years. For example, corkscrew penis or bad feet. Our guarantee does not cover situations such as broken penises, prolapsed prepuce and broken legs etc.

In the event of a less than acceptable mating outcome, the bull will be assessed by a veterinarian chosen by Landfall and if the bull is found to be the cause of the infertility then Landfall will offer compensation in the form of:

FIRST YEAR (12 month period from date of purchase)

100% of the purchase price in the form of:

- Replacement with an equivalent bull to the mutual agreement of both the vendor and purchaser.
- Credit for use with further purchases.

SECOND YEAR (12 to 24 month period after purchase date)

50% of the purchase price in the form of:

- Credit for use with further purchases.

In the event that one of the above credits is issued it must be used within 12 months of the issue date or it will be forfeited. If a credit is issued it is non-transferable.

(The original purchaser of the bull is the only eligible party to claim a credit).

The infertile bull is then to be slaughtered with proceeds of the sale to be paid to Landfall. Landfall will cover the veterinary expenses and transport costs of the bull to an abattoir.

Landfall will not be held liable and does not offer compensation for loss of income in the event of infertility resulting in non pregnant females.

The Obligation of the Purchaser

The Landfall Guarantee is not a replacement for sound management practices. The guarantee is provided to cover the performance of the bull where breeding cows are managed to recognised industry standards. The purchaser of the bull is expected to observe joining, monitor for later cycling and record any repeat cycling in the females. If any problems arise it is expected that the purchaser notifies Landfall within 3 months, after the end of the joining period.

At Landfall we recognise there is an infertility risk involved in breeding herds. We breed our bulls so as to limit the financial and production risks involved. If for any reason there are any unexpected

outcomes with Landfall bulls we stand by our product and do not expect you the producer to have to bear the entire financial burden. If you have a problem we want to be the first to know about it. We

have confidence in our bulls and offer a commitment to our clients that our product and service is of the highest quality achievable. Your success is ultimately our success.

FREIGHT

- Free sea freight to Melbourne, Grassy and Lady Barron on all bulls sold at auction
- Free freight within mainland Tasmania on the condition that all bulls sold by auction be delivered within one week of purchase

Landfall Prime Lamb frenched racks and cutlets with the cap on.

THANK YOU AND GOODBYE FROM THE LANDFALL FARM FRESH TEAM

A LITTLE BACKGROUND TO LANDFALL FARM FRESH...

Landfall Farm Fresh butcher was established in 2008 by the fifth generation Archer siblings. A family with an established reputation as one of Australia's leading Angus beef breeders and local farmers since 1876. Landfall Farm Fresh was a dream of their grandfather's and became one of Launceston's finest butchers.

Healthy stock and sustainable farming practices built the foundations for a butcher shop that provided consistent, quality produce.

The animals were hand-picked from their very own farm in the Tamar Valley each week, and their gluten and preservative free smallgoods were all made by hand.

The traditional approach to butchering, the whole animal processing, and the dry-aging technique resulted in a unique eating experience. Customers experienced the passion, pride, and integrity of Landfall.

In January 2024, the doors to Landfall Farm Fresh were closed for the last time. The fifth generation Archers turned their focus to the sixth generation.

After a rewarding and successful 15+ years of Landfall Farm Fresh, we have made the decision to close our business and will not re-open after the Christmas and New Year break. We will be focusing our attention on our precious kids. They are all growing up so fast and we don't want to look back with regret on this time while they are young.

The opportunity to value add to our farming business came at a time when the five of us siblings, Ed, Will, Frank, Ellie and Mimi were all young and child free. Now with a big bunch of beautiful kids and an expanded primary production business, we find family time is of the essence.

Growing up at Landfall, we learned what dedication and hard work is and understood the difficulties faced by farmers. In these more recent years, we have been exposed to the challenges faced by other sectors of the supply chain. Our respect for those selling red meat to consumers has grown significantly, and on a broader level for anyone managing the challenges of running a small business.

We thank everyone who has supported us throughout our journey and contributed to making Landfall Farm Fresh a success. From the early days of the Farmers Market and Festivals, to our retail shop and wholesale business. There have been exciting ups and character-building downs. It has been a huge learning curve, and we feel very blessed to have been

immersed in the Balfour & Charles Street community, the Launceston community, and the broader Tassie community.

"We are truly humbled by the support, understanding, and congratulations we have received. We will be forever grateful for all who believed in us and our produce."

To our customers – you have been a true delight, thank you. We feel very privileged to have met so many like-minded people. We are extremely grateful for how you have embraced us.

The shared learning, education, and celebration of our produce has been the pinnacle. Thank you for your tremendous loyalty towards us and our produce. We feel sad that we will not be seeing you all in the same capacity going forward.

To our wholesale customers and suppliers - who have been with us from the beginning, and those who have joined us more recently - thank you for your support and desire to support local. It has been a pleasure working with you all showcasing quality Tasmanian produce.

To our butcher and retail team - past and present, we thank you for your dedication and belief in our small business. We couldn't have done it without you and are forever appreciative of your hard work, commitment, and friendship. The traditional approach to butchering whole animals and dry ageing is an art and we are honoured to have

shared this passion with you. We are very proud of you and wish you the best with your next adventures.

To our farm team – thank you for the long hours you work to raise healthy, happy animals within sustainable farming practices. You are a true example of the devoted work Tassie farmers do to produce world class quality food and wine.

To our mentors and industry networks - thank you for your support and guidance over the years, we greatly respect the time and wisdom we have received.

To our families – thank you for believing in our passion and for your unwavering support. As a family we have been proud to share the provenance of our produce and promote the importance of local food production.

We have many fond memories, connections, and friendships to cherish and we feel very proud to have achieved so much over the last 15+ incredible years. We understand that this decision may come as a surprise and assure you it was made with careful consideration. It has been a very special experience we have sincerely loved and will miss.

Grace, Ellie, Jack, Tim, and Meg Wheeler in 2021 on the Landfall farm.

From our families to yours, we thank you from the bottom of our hearts and wish you great happiness.

Best wishes,

Ellie, Frank, and Mimi with families, and the Landfall Farm Fresh Team.

INSANELY GOOD OXTAIL STEW

Dark, sticky and super-tasty

Cooking Time: 6 hours Serves: 8

Ingredients

- 2.5 kg oxtail, chopped into 4cm chunks (ask your butcher to do this)
- olive oil
- 2 medium leeks
- 2 sticks of celery
- 4 medium carrots
- a few sprigs of fresh thyme
- a few sprigs of fresh rosemary
- 4 fresh bay leaves
- 4 cloves
- 2 heaped tablespoons plain flour
- 2 x 400 g tins of plum tomatoes 275 ml porter or red wine
- 1 litre organic beef stock
- Worcestershire sauce

Recipe from Jamie Olivers Food Tube: <https://www.jamieoliver.com/recipes/beef-recipes/insanely-good-oxtail-stew/>

Method

1. Preheat the oven to 220°C/425°F/gas 7. Place a large roasting tray in the oven to preheat.
2. Carefully remove the hot tray from the oven, then add the oxtail. Season and drizzle over a lug of olive oil, then toss to coat and place in the hot oven for around 20 minutes, or until golden and caramelized.
3. Meanwhile, trim and halve the leeks and celery lengthways, then chop into rough 2cm chunks. Peel and chop the carrots into 2cm pieces, then place into a large ovenproof casserole pan over a medium-low heat with 1 tablespoon of olive oil.
4. Pick, roughly chop and add the thyme and rosemary leaves, then add the bay and cook for around 20 minutes, or until soft and sweet, stirring frequently.
5. Meanwhile, remove the oxtail from the oven and set aside. Reduce the oven temperature to 170°C/325°F/gas 3.
6. Add the cloves and flour to the veg, stirring well to combine, then pour in the tomatoes and porter (or wine, if using). Add the oxtail and any roasting juices, cover with the beef stock or 1 litre of cold water and stir well.
7. Turn the heat up to high and bring to the boil, then pop the lid on and place in the hot oven for around 5 hours, or until the meat falls away from the bone, stirring every hour or so and adding a splash of water to loosen, if needed.
8. Remove the pan from the oven and leave to cool for about 10 minutes. Using rubber gloves, strip the meat from the bones and return to the pan, discarding the bones.
9. Add a good splash of Worcestershire sauce, season to taste and enjoy with creamy mash and seasonal steamed greens.

Trans Tasman Travel Bursary Scholarship 2023 Recipient ALEX FERGUSON

Woodbank Angus, Kaikoura

- 20 days
- 6 Angus Studs
- 2 Charolais Studs
- 5 Sheep Studs
- 2,655kms
- 4 Commercial Farms
- 1 day with an agronomist

Outside my comfort zone in an unfamiliar country making unforgettable memories and building skills and knowledge that will last me a life time. That is how I would begin to describe my experience.

Firstly, though a massive thanks and appreciation must go to the Angus Australia Foundation and the New England Travel Centre who provided this incredible opportunity for young agricultural professionals to be a part of. I am also incredibly fortunate to have an employer who supports and promotes these kinds of endeavours.

An enormous amount of thanks must go to the Archer Family, Landfall Angus Team and in particular Frank Archer who encouraged and supported me to apply for the scholarship and allowed me the time away from the farm, as well as assisting me to connect with contacts in New Zealand, something I will be forever grateful for.

From Woodbank Angus 30mins north of Kaikoura to Mt Linton Station 2 hours south of Queenstown and too many stops in between to mention them all. A common trend of all the places was I got to see magnificent countryside, productive and fit for purpose cattle, as well as meet the most incredible people.

Fodder Beet Crop – Pye Group Farming, Geraldine

Caroline and Ben Murray – Woodbank Angus

The exposure to various New Zealand agricultural sectors allowed me to come away with not only a better understanding of the New Zealand industry but also allowed me to reflect and develop a better understanding of the Australian industry.

Awakino Station - Trophy Stags

There is significant pressure on producers in New Zealand to maximise production with ever increasing overhead costs whilst adhering to strict government environmental protocols. As Australian producers I believe we need to be aware of what protocols have been implemented in New Zealand so we can be at the forefront of what could possibly also impact our future farming practices. If we can start implementing small changes to our practices now then our ability to adapt to these ever-increasing pressures of our social license to farm we will be much better off.

A main area of focus of my trip was to build a better understanding of the difference in breeding philosophy in which sees some seed stock producers registering and receiving genetic evaluation of their animals through Angus NZ whilst others through Angus Pro (Angus Australia). Unfortunately, I discovered this topic has created a significant divide in the Angus breed in New Zealand. Whilst this may be the case I visited producers on both sides of the equation and something that was evident on all farms was they knew there 'why' and 'who' they were producing a genetic package for and in my perspective that is one of the most important factors of the whole system.

Something that was commonly communicated was that sadly politics had gotten in the way of individuals ability to acknowledge that every producer in the Angus world and broader breeds makes management decisions that suit

Woodbank Angus, Kaikoura

their system and client base. If everyone had the same goal posts, the breed wouldn't be where it is today. Producing top quality genetics can be a harsh world and a highly rewarding one all at the same time and I can whole heartily say every farm I visited was doing their best to uphold the highest of standards for the Angus breed whilst doing their bit to continually work to improve what they had.

I was very fortunate to visit Matt and Katy Iremonger at Willesden Farms on the Banks Peninsula. They run a diverse operation consisting of hill country sheep and beef breeding, intensive irrigated finishing and dairy support, along with dairy farms and native and exotic forestry. Matt has just spent the last 12 months undertaking a Nuffield scholarship, travelling the world researching ways to solve the

bobby calf issue in the dairy industry. I was fortunate to see progeny of trial work Matt has been conducting using semen from high genetic merit beef animals and putting them in dairy animals to produce a high value premium beef product. The progress he has made was exciting to see and I look forward to seeing his final results for both the future of the dairy and beef industry.

I was very lucky to be hosted by some incredibly generous people who provided the best hospitality and most magnificent places to stay. I cannot thank every single person who I met in New Zealand enough for being so giving with their time and open and willing to share their knowledge and story. I hope to stay connected with these people and in years to come return the favour.

Alex Ferguson & Annabelle Subitil, Omarama Station

From the rolling hills of Yea to the banks of the Tamar

When I first moved to Launceston over seven years ago, it was my intention to retire from the cattle industry which I had been involved in for many years. However, this did not eventuate when I met with Frank Archer and for the past seven years I have assisted with the production of the Landfall bull sale catalogues and until now avoided including my personal profile. I have enlisted my brother Robert Walls to tell of my younger days and great friend Kim Chadband to tell my tale through her eyes for which I am grateful (I think!)

Both my brother and I were encouraged by our parents Vern and Phylly to participate in sport. I enjoyed netball and calisthenics. My brother was an 'all rounder' in most sports playing for Carlton in the VFL/AFL at age 16. Unfortunately our father died, never actually seeing Robert play with Carlton. My mother and I didn't miss too many of his 250 games including three premierships. Robert's playing, coaching and media career culminating in his induction into the Australian Football Hall of Fame made for one very proud sister.

I have enjoyed visits to a number of overseas destinations including USA, Canada, New Zealand and Europe. Our visits to St Remy, a small town in Provence in the South of France on two occasions allowed us the opportunity to see the French countryside and enjoy the French way of life. Morning visits to the Boulangerie didn't help with the diet!

My move from Melbourne to Yea back in the 1980's saw a massive change in my life, however, I was very fortunate to be welcomed by the Coonan family introducing me to rural/farming living. My husband, Anka and I, raised our two sons Heath and Leigh on what I can only describe as the perfect situation on our property 'Aneke' allowing our sons the freedom and stability to develop into the men they are today.

Following my move to Yea, I commenced work at the Yea Shire as PA to the CEO. During this time

Annette's family – Annette, Bohdi, Katy, Imogen, Tia, Emmett, Leigh, Macy, Heath & Melissa (Anka absent)

shire amalgamations commenced where Yea and Alexandra shires became the Murrindindi Shire, I was then appointed PA to the Commissioners and CEO. I then worked part time for Ythanbrae Angus which included stock recording. During this time I also managed the stock records at Cobungra Station in the spectacular High Country at Omeo. My quest for part time work soon turned into much more and after close to 15 years it was time for me to take a step back.

My involvement at Landfall with the Archer family has been instrumental in adjusting to life in Tasmania. I am in awe of the young people I have been involved with at Landfall and the passion they have for the industry, this together with the encouragement and guidance from the Archer family augers well for our agricultural/cattle industry.

We now have five grandchildren ranging in age from 17 to one year old, needless to say they are such a joy, we are blessed.

Who is Annette Coonan?

By Robert Walls

As her only sibling I am in a position to tell. 16 months older than me, we grew up in Melbourne in the inner suburb of Brunswick. In the 1950's and 60's life was simple and fun. Dad was a mechanic and our mother a stay at home Mum and also a great cook. Annette learnt well from her and became a fantastic cook herself. Most of our neighbours were first generation Italian and Greek families who joined in our street games and BBQ's whilst we marvelled at their cooking methods, in particular lamb on the spit.

Being tall Annette excelled in netball making junior Victorian teams and she was also an accomplished swimmer. I recall being forced to attend her annual callisthenic performances for ten years or more!

Was she bossy? You bet she was, her favourite trick was to draw an imaginary line across the back seat of the car as we regularly travelled to country Victoria to see our grandparents. I was told not to cross that line, of course I did just to hear her scream out 'Roberts on my side'.

This city girl loved fashion and shopping so it surprised us all when she married a farmer. For the next 32 years they lived on a beautiful property on the outskirts of Yea. There they raised two strapping sons and became fully immersed in the local community giving their time, effort and financial support to schools, sporting clubs, CFA and especially the Royal Children's Hospital and Challenge Cancer Support Network.

Pink Aurora Stadium – Annette & Katy Coonan

Annette, her husband Anka and son Leigh have all been touched by cancer and to this day they give back. Annette now does voluntary work for the Cancer Council of Tasmania whilst Anka gives his time driving patients to and from appointments. The family brush with cancer resulted in Annette taking a lifelong interest in fund raising for cancer research.

I am very proud of my sister, she has always been a giver with a big heart.

Annette Coonan – shy and retiring!

By Kim Chadband

Annette said she would rather resign than write her profile which is where I come in. I like to think of myself as her moral compass. Let us just think of me as her 'Ghost Writer'

Stage two of Annette's life commenced when the Yea football club did an end of season trip on the Rutherglen Red. Suffice to say this was where Annette and Anka first met and with Anka's debonair charm, it is no surprise that, as they say, the rest is history. Annette was captured by Anka's suave manners and cosmopolitan patter, (or too much vintage tawny port) what Anka was captured by, we will never

know. Being a true gentleman he escorted Annette to her home where he arrived in a rather untidy condition and immediately fell asleep on the couch. At which point Annette's mother gestured to the snoozing gent and said "What are you going to do with him?" Annette had no idea, so she married him.

After a whirlwind courtship Anka and Annette were married, and the family, including five year old Heath relocated to Yea. To this day I am not sure whether Anka adopted Heath or Heath adopted Anka, but it was a wonderful partnership which remains to this day.

Annette and Anka soon moved into their brand new home out on their farm where they welcomed the arrival of their son Leigh. Annette was again able to entertain in a style that she was accustomed. Annette settled into the country life and took to cattle, snakes and bushfires like a city chum.

Fire, 12 years of millennium drought, Black Saturday bushfires, floods and more fires. Personally, I think it was Black Saturday that was the catalyst, making the decision to move easier. Anka off with the CFA fighting one flank of the fire on the ridgeline above the house, and Annette with the sprinklers on watching for embers around the house and waiting powerless with trepidation and anxiety to hear whether her son and his family had made it out of Kinglake when so many others didn't. I have visions of Annette as the contemporary version of Henry Lawson's 'The Drover's Wife'.

The community of Yea was devastated to hear the news that they were really leaving and commenced a series of farewell events that would have made Madame Melba weep in envy. Annette had made the full circle from a flash house in Melbourne, to a large farmhouse in Homewood, finally to an apartment in Launceston.

Annette has long been a great and loyal friend and has attracted and maintains friends from all around the country who still keep in touch and drop in for very welcome visits.

We all still miss her, Tassies gain was our loss.

Spring Sale 2023 Round Up

Ash Cusick, Kate Nixon and Frank Archer with Lot 294 Landfall Quartz T247™ (AI)

Congratulations Taylor Hodges and Dan Crawford on your engagement!

Zara & Tom Archer, Ellie, Jack & Grace Wheeler

Landfall sponsored goal posts at Flinders Island football ground

While we may not see quite as many people attend the bull sales, the number of registrations continue to grow with Auctions Plus playing a major role keeping the Nutrien crew very busy for which we thank the team.

The decision to donate proceeds from the last lot selling in Spring saw Rural Alive and Well, a registered charity organisation based in Tasmania, receive \$11,000.

Love sure is in the air at Landfall, Dan Crawford and Taylor Hodges will be married in March just before the Autumn sale. Suffice to say there will be no immediate honeymoon.
