## WELCOME TO OUR 17TH ANNUAL SPRING SALE.

*On property bull sale  
Wednesday 16th September  
2020 at 2pm.*

**Buyers Instruction Slip** page 95

# Welcome

**We invite you to attend our 17th Annual Spring on property auction and are pleased to offer you 128 performance recorded two year old bulls and 32 yearling bulls.**

The sale offering is made up of sons of industry leading sires namely, Landfall Keystone, Bartel E7, EF Complement and VAR Discovery. A large proportion of the offering are sired by Landfall sires, in particular Leonardo, who is proving himself as one of the up and coming sires in the breed. We are proud of the balance our bull offering provides with a genetic package that is high performing in a functional and attractive phenotype.

What a year 2020 has been to date. So many challenges across several fronts but also so many opportunities. We are extremely pleased to see many of our clients experiencing favourable seasonal conditions after a prolonged period of drought. The rainfall received across the Eastern states was well timed given the challenges with supply to our export customers due to the pandemic. May it continue to allow some above average seasons to be strung together.

We see many breeders setting the strategy to either rebuild or further increase breeding female numbers. This has prompted us to catalogue an extra offering of calving ease bulls. There are 32 specially selected yearling bulls on offer starting at lot 129. These bulls are from highly proven calving ease pedigrees and are extremely well suited to joining maiden heifers.

There are a couple of minor changes to the layout of the catalogue and we would like to bring to your attention that we

have now included the percentile band that each individual EBV sits in for all the lots on offer. There is no longer shading of the top 5% or the top 20%. We feel this is a more appropriate way to rank the bulls against the breed as it highlights what areas a bull will offer value but also what areas they may fall short in.

We have once again partnered with Achmea Insurance to offer an automatic insurance cover on all bulls sold at this coming Autumn sale. All bulls will be covered for 3 months from the date of sale by Achmea's 2 star product for mortality including accidental loss of use and transit. We have arranged and paid for this insurance, so it is no cost to you. This is a unique offering in the market place and we thank Achmea for their continued support of the Landfall program.

We maintain our philosophy of breeding cattle in a commercially orientated production system to prove the performance, identify the outliers, multiply the high performers, and cull the under performers. Landfall genetics are produced in a high-density stocking rate environment. Our commitment is to create a genetic package that is continually improving and offering value to our client's breeding programs. We believe the true measure of our success is what you as our client's can achieve by partnering with us to drive forward your genetic improvement.

Whether you are a long time or potential new client we thank you

*We would like to take this opportunity to thank all the Landfall staff, family members and associates for their valuable contribution to our program. The commitment and dedication of these people is vital to our success.*

Ed and Frank Archer

for your interest in the Landfall program. We are tremendously proud of the Landfall herd and are passionate about what we do. We extend an invitation to anyone who would like to visit us outside of sale day to get a behind the scenes look at what Landfall is about. In addition to this, if you would like us to become more involved in what you do with your breeding program, we would appreciate the opportunity to visit with you to better understand what you set out to achieve in your operation.

We would like to take this opportunity to thank all the Landfall staff, family members and associates for their valuable contribution to our program. The commitment and dedication of these people is vital to our success.

**The Archer Family.**

# About Landfall Angus

**Landfall Angus is a family owned and operated business located in the Tamar Valley in Northern Tasmania. Our cow herd consists of over 2200 registered females, making Landfall one of the largest Angus Seedstock herds in Australia.**

Landfall Angus cattle perform well in the natural environments of Australia, a direct result of our strong focus on the commercial realities of beef production. The Landfall Angus cow herd is highly fertile, functional and high performing. Careful genetic selection and improved production management techniques ensure that Landfall is a leading Seedstock herd in Australia.

## HISTORY

Landfall Angus was established in 1948 with the purchase of twelve females from the Australian mainland. The original Landfall cows were selected for their large frame and femininity. Sires from “Naranghi” in New South Wales, at that time bred by Mr. John Bott, were consistently breeding progeny that excelled in fertility and growth. They complimented the Landfall cows very well and these sires were used for 20 years.

In the early years of breeding bulls a small number were sold privately to regular Tasmanian and King Island clients. From 1975 an annual auction has been held offering bulls and females.

In 2004 a spring sale was introduced and is held annually on property offering bulls.

*We supply our clients with high quality Angus genetics that are fertile, structurally sound, easy doing and low maintenance without compromising the importance of growth and carcass performance.*

## TODAY

Landfall Angus is today owned and managed by the fourth and fifth generation of the Archer family. The Landfall herd now consists of over 4000 registered animals running over two main production centres in the Tamar Valley, calving 2200 registered females. The Angus herd is run alongside a self-replacing flock of composite sheep.

The Landfall herd is run under commercial conditions, in large contemporary groups. Artificial insemination and embryo transplant are used to increase the rate of genetic gain in our herd. Strict criteria is used for the selection of sires and dams within our breeding programs.

A strong emphasis is placed on the traits that contribute positively to the commercial profitability and sustainability of beef production. Firstly we aim to breed a functional female, focussing on structural soundness, docility, fertility and calving ease. Animals are joined for restricted periods resulting in short calving periods. Any animal not meeting the criteria is culled. The focus then moves towards growth and carcass quality with targets set above breed average whilst avoiding extremes. All registered animals are performance recorded with Breedplan and Landfall has been a member of Angus Breedplan since its inception in the early 1980's. Data is collected from animals run in large groups allowing us to directly compare genetics without the impact of environmental differentiation.

Annual sales are held on property in the Autumn and Spring, with in excess of 600+ bulls being sold annually.

## OUR GOALS AT LANDFALL ARE:

1. To provide our clients with superior genetics to help them achieve a sound investment and help to improve their bottom-line.
2. To produce genetics which perform well under the natural environments of Australia.
3. To have relationships of high integrity with our clients.

# Sale Notes

## 1. Location

8 kilometres from the centre of Launceston, North on East Tamar Highway. Follow A8 towards Georgetown. See page 96 for map and travel information.

## 2. Covid Restrictions

The situation with Covid-19 is an ever changing landscape. We plan to hold the sale on property and welcome our clients who feel comfortable to be here. We will continually keep up to date with the restrictions that we need to have in place to keep everyone safe leading up to and on the day. Should anyone not feel comfortable to be here or is unable to travel from interstate please get in touch with us if you require assistance in making your selections to operate in the auction remotely. We learnt much from our Autumn Sale and feel confident we can navigate our way through to the best possible outcome for our clients. Your health, safety and level of comfort are of the highest priority to us. Food and refreshments will be offered with strict adherence to the Covid restrictions.

## 3. Rebates

4% rebate commission offered on all bulls and stud females to agents

settling within 7 days of invoice. All purchasers must nominate their agent 24hrs prior to the sale with Nutrien Livestock. Please email [studstock@robertsltd.com.au](mailto:studstock@robertsltd.com.au) or [frank@landfall.com.au](mailto:frank@landfall.com.au)

## 4. Freight

Free freight on all bulls to Melbourne, Grassy and Lady Barron ports for lots sold by auction. Free freight on all bulls within mainland Tasmania. The vendor or his agent will make freight arrangements (conditions apply).

## 5. EBVs

Angus Group Breedplan Figures are used throughout the catalogue.

## 6. Nutrition

All bulls have been grass fed with supplement silage.

## 7. Animal Health

- All bulls have been semen tested and had their penis and testicles examined.
- All bulls have been ear notched and tested as BVD P.I. negative.
- All bulls have been vaccinated with Vibrovax, Pestigard and Ultravac 7 in 1.

## 8. Recessive Genetic Conditions

All lots are clearly marked with their respective genetic status.

## 9. Bull Guarantee

All bulls covered by the Landfall Bull Guarantee (see details on page 86 of this catalogue).

## 10. Sire Bulls

Lots 1 through to 43 have been used for joining in the Landfall herd in the Spring of 2019. Please take this into account when assessing these bulls.

## 11. Photos and Videos

Ben Hooper from Clear Vision Imaging has captured videos of all sale lots. They are available at [www.landfall.com.au](http://www.landfall.com.au)

## 12. Registrations

Please note: some lots are HBR registered and some are APR registered. All animals are eligible for transfer with their respective registration status.

## 13. Inspection

All bulls will be available for inspection at Landfall on the morning of the sale from 10am. Inspection any other time is welcome by appointment.

### PLEASE NOTE:

As vendors, the Archer family at Landfall want your valuable new purchase to be given every opportunity to travel and settle into their new environment with a minimum of stress.

To this end we ask you to nominate;

### CLEAR DELIVERY INSTRUCTIONS.

Short notice requests for collection of animals will not be accepted.

You will note we have not included lot images of our bulls selling this Spring. Images and videos of most lots will be available on our recently updated website site closer to sale date.

**Thank you for your co-operation.**

### DNA SUFFIX KEY:

The suffix displayed at the end of each animal's name indicates the DNA parentage verification that has been conducted by Angus Australia.

**PV:** both parents have been verified by DNA.

**SV:** the sire has been verified by DNA.

**DV:** the dam has been verified by DNA.

**#:** DNA verification has not been conducted.

**E:** DNA verification has identified that the sire and/or dam may possibly be incorrect, but this cannot be confirmed conclusively.

**DISCLAIMER:** Animal details included in this catalogue, including but not limited to pedigree, DNA information, Estimated Breeding Values (EBVs) and Index values, are based on information provided by the breeder or owner of the animal. Whilst all reasonable care has been taken to ensure that the information provided in this catalogue was correct at the time of publication, neither the vendor, Angus Australia or the selling agents assume any responsibility for the accuracy or completeness of the information, nor for the outcome (including consequential loss) of any action taken based on this information.

**Notes**

A genuine curve bending sire, Keystone is cementing himself as one of the leading calving ease specialists in the breed. Keystone is continuing to see heavy use at both seedstock and commercial level across the country. An Edmund son with added frame and length, we are experiencing good foot and leg structure with a clean front end. Progeny are displaying above average frame and length with docility a strong point. A total of 39 sons on offer in this sale.

#### Notes

Leonardo came to the fore in our Autumn sale offering achieving both the highest average price and the highest individual price for his sons. A calving ease specialist, selected for AI use in the Landfall herd as a yearling for his well-balanced phenotype. Above average EMA and positive fat, progeny are moderately framed with an earlier maturity pattern. They possess thickness, ease of doing ability and sound structure. The perfect sire line to use over those bigger birth and later maturity pattern females that need an improvement in fat cover. A total of 17 sons on offer in this sale.

**Notes**

EF Complement possesses a well balanced data set. His progeny are medium frame cattle with good eye appeal and well covered with good muscle and width behind. His daughters are functional with good udders and maternal characteristics. Progeny performance to date suggest that Complement offspring are a good fit for grass fed beef production systems. A total of 12 sons on offer in this sale.

**Notes**

Capitalist is a calving ease sire with curve bending growth and moderate maturity pattern. His progeny are very appealing to the eye being well balanced with muscle and thickness. Above average for both EMA and fat cover. Inspected twice in the US with sound feet and legs both times we are seeing that follow through to his progeny. Nine sons on offer in this sale.

# Caring For Your Bulls

## More calves, more years

**Your bull is an important investment. With proper management you can achieve a longer working life from your bull resulting in more calves at a reduced cost per calf.**

### 1. Arrival on farm

- a. Have some quiet cows or steers in the yard when the bull arrives. He will often be unsettled as he has left his mates and travelled on a truck for his first time. Give him some time to adapt to his new surroundings.

### 2. Pre-Joining

- a. Your new bulls will benefit from exposure to some empty cows for 2-3 weeks prior to their normal breeding period. This exposure will allow them to service some females and become exposed to any of the normal pathogens in your cow herd. If you have purchased multiple bulls, expose them only two at a time. It is then important to give your bull time to recover following the exposure period before the joining season begins.
- b. Do a pre-joining Breeding Soundness Examination (BSE) on all bulls to evaluate; structure, testicles and serving capability. This is the opportunity to identify any bull which may delay cows going in calf. Also administer booster vaccinations.

### 3. Joining

- a. Don't over join new bulls (maximum of 40 cows).
- b. Multi-sire join where possible to minimize the risks associated with a bull breaking down in the joining period. If you need to single sire join observe closely and rotate with a proven bull for at least 1 cycle. New bulls are the most at risk of break down, ensure you check them regularly.
- c. Most bull fertility issues develop during the joining period rather than being pre-existing problems. This means regular checking of bulls is essential (2-3 times a week for the first 3 weeks then weekly).

Check for:

- Try to observe the bull serving (mounting is not a successful serve)
- Any signs for lameness
- Evidence of penile or preputial swelling
- Any signs of ill health (lethargic, etc)
- Number of cows cycling (5% cycling per day if not in calf, this should decrease as cows conceive)

### 4. Post Joining

- a. Your bulls will spend most of their life in the bull paddock. You need to try minimize bull paddock injuries (bull fights) by not overcrowding the paddocks and possibly removing aggressive dominant bulls. Ensure young bulls have access to adequate feed to continue growing. Mature bulls should not be allowed to get fat, keep them in condition score 3. Mature bulls kept in body condition score 3 will have a longer working life.
- b. Pregnancy test early to identify any joining issues. This early pregnancy test will not only give you more time to make better decisions but it will also help identify the potential case of sub-fertility and allow you to prevent the problem in subsequent years.

# Understanding the TransTasman Angus Cattle Evaluation (TACE)

## WHAT IS THE TRANSTASMAN ANGUS CATTLE EVALUATION?

The TransTasman Angus Cattle Evaluation (TACE) is the genetic evaluation program adopted by Angus Australia for Angus and Angus infused beef cattle. TACE uses Best Linear Unbiased Prediction (BLUP) technology to produce Estimated Breeding Values (EBVs) of recorded cattle for a range of important production traits (e.g. weight, carcase, fertility).

TACE includes pedigree, performance and genomic information from the Angus Australia and New Zealand Angus Association databases to evaluate the genetics of animals across Australia and New Zealand.

TACE analyses are conducted by the Agricultural Business Research Institute (ABRI), using beef genetic evaluation software developed by the Animal Genetics and Breeding Unit (AGBU), a joint institute of NSW Agriculture and the University of New England, and Meat and Livestock Australia Limited (MLA).

## WHAT IS AN EBV?

An animal's breeding value can be defined as its genetic merit for each trait. While it is not possible to determine an animal's true breeding value, it is possible to estimate it. These estimates of an animal's true breeding value are called EBVs (Estimated Breeding Values).

EBVs are expressed as the difference between an individual animal's genetics and a historical genetic level (i.e. group of animals) within the TACE genetic evaluation, and are reported in the units in which the measurements are taken.

## USING EBVS TO COMPARE THE GENETICS OF TWO ANIMALS

TACE EBVs can be used to estimate the expected difference in the genetics of two animals, with the expected difference equating to half the difference in the EBVs of the animals, all other things being equal (e.g. they are joined to the same animal/s).

For example, a bull with a 200 Day Growth EBV of +60 would be expected to produce progeny that are, on average, 10 kg heavier at 200 days of age than a bull with a 200 Day Growth EBV of +40 kg (i.e. 20 kg difference between the sire's EBVs, then halved as the sire only contributes half the genetics).

Or similarly, a bull with an IMF EBV of +3.0 would be expected to produce progeny with on average, 1% more intramuscular fat in a 400 kg carcase than a bull with a IMF EBV of +1.0 (i.e. 2% difference between the sire's EBVs, then halved as the sire only contributes half the genetics).

## USING EBVS TO BENCHMARK AN ANIMAL'S GENETICS WITH THE BREED

EBVs can also be used to benchmark an animal's genetics relative to the genetics of other Angus or Angus infused animals in Australia and New Zealand.

To benchmark an animal's genetics relative to other Angus animals, an animal's EBV can be compared to the EBV reference tables, which provide:

- the breed average EBV
- the percentile bands table

The current breed average EBV is listed on the bottom of each page in this publication, while the current EBV reference tables are included at the end of these introductory notes.

For easy reference, the percentile band in which an animal's EBV ranks is also published in association with the EBV.

## CONSIDERING ACCURACY

An accuracy value is published with each EBV, and is usually displayed as a percentage value immediately below the EBV.

The accuracy value provides an indication of the reliability of the EBV in estimating the animal's genetics (or true breeding value), and is an indication of the amount of information that has been used in the calculation of the EBV.

EBVs with accuracy values below 50% should be considered as preliminary or of low accuracy, 50-74% as of medium accuracy, 75-90% of medium to high accuracy, and 90% or greater as high accuracy.

## DESCRIPTION OF TACE EBVS

EBVs are calculated for a range of traits within TACE, covering calving ease, growth, fertility, maternal performance, carcase merit, feed efficiency and structural soundness. A description of each EBV included in this publication is provided on the following page.

## UNDERSTANDING ESTIMATED BREEDING VALUES (EBVS)

### BIRTH

Calving Ease Direct	%	Genetic differences in the ability of a sire's calves to be born unassisted from 2 year old heifers.	Higher EBVs indicate fewer calving difficulties in 2 year old heifers.
Calving Ease Daughters	%	Genetic differences in the ability of a sire's daughters to calve unassisted at 2 years of age.	Higher EBVs indicate fewer calving difficulties in 2 year old heifers.
Gestation Length	days	Genetic differences between animals in the length of time from the date of conception to the birth of the calf.	Lower EBVs indicate shorter gestation length.
Birth Weight	kg	Genetic differences between animals in calf weight at birth.	Lower EBVs indicate lighter birth weight.

### GROWTH

200 Day Growth	kg	Genetic differences between animals in live weight at 200 days of age due to genetics for growth.	Higher EBVs indicate heavier live weight.
400 Day Weight	kg	Genetic differences between animals in live weight at 400 days of age.	Higher EBVs indicate heavier live weight.
600 Day Weight	kg	Genetic differences between animals in live weight at 600 days of age.	Higher EBVs indicate heavier live weight.
Mature Cow Weight	kg	Genetic differences between animals in live weight of cows at 5 years of age.	Higher EBVs indicate heavier mature weight.
Milk	kg	Genetic differences between animals in live weight at 200 days of age due to the maternal contribution of its dam.	Higher EBVs indicate heavier live weight.

### FERTILITY

Days to Calving	days	Genetic differences between animals in the time from the start of the joining period (i.e. when the female is introduced to a bull) until subsequent calving.	Lower EBVs indicate shorter time to calving.
Scrotal Size	cm	Genetic differences between animals in scrotal circumference at 400 days of age.	Higher EBVs indicate larger scrotal circumference.

### CARCASS

Carcass Weight	kg	Genetic differences between animals in hot standard carcass weight at 750 days of age.	Higher EBVs indicate heavier carcass weight.
Eye Muscle Area	cm <sup>2</sup>	Genetic differences between animals in eye muscle area at the 12/13th rib site in a 400 kg carcass.	Higher EBVs indicate larger eye muscle area.
Rib Fat	mm	Genetic differences between animals in fat depth at the 12/13th rib site in a 400 kg carcass.	Higher EBVs indicate more fat.
Rump Fat	mm	Genetic differences between animals in fat depth at the P8 rump site in a 400 kg carcass.	Higher EBVs indicate more fat.
Retail Beef Yield	%	Genetic differences between animals in boned out saleable meat from a 400 kg carcass.	Higher EBVs indicate higher yield.
Intramuscular Fat	%	Genetic differences between animals in intramuscular fat (marbling) at the 12/13th rib site in a 400 kg carcass.	Higher EBVs indicate more intramuscular fat.

### FEED EFFICIENCY

Net Feed Intake (Feedlot)	kg/day	Genetic differences between animals in feed intake at a standard weight and rate of weight gain when animals are in a feedlot finishing phase.	Lower EBVs indicate more feed efficiency.
---------------------------	--------	--	---

### TEMPERAMENT

Dociility	%	Genetic differences between animals in temperament.	Higher EBVs indicate better temperament.
-----------	---	---	--

### STRUCTURE

Front Feet Angle	%	Genetic differences between animals in desirable front feet angle (strength of pastern, depth of heel).	Higher EBVs indicate more desirable structure.
Front Feet Claw Set	%	Genetic differences between animals in desirable front feet claw set structure (shape and evenness of claw).	Higher EBVs indicate more desirable structure.
Rear Feet Angle	%	Genetic differences between animals in desirable rear feet angle (strength of pastern, depth of heel).	Higher EBVs indicate more desirable structure.
Rear Leg Hind View	%	Genetic differences between animals in desirable rear leg structure when viewed from behind.	Higher EBVs indicate more desirable structure.
Rear Leg Side View	%	Genetic differences between animals in desirable rear leg structure when viewed from the side.	Higher EBVs indicate more desirable structure.

### SELECTION INDEXES

Angus Breeding Index	\$	Genetic differences between animals in net profitability per cow joined in a typical commercial self replacing herd using Angus bulls. This selection index is not specific to a particular production system or market end-point, but identifies animals that will improve overall profitability in the majority of commercial grass and grain finishing beef production systems.	Higher selection index values indicate greater profitability.
Domestic Index	\$	Genetic differences between animals in net profitability per cow joined in a commercial self replacing herd targeting the domestic supermarket trade.	Higher selection index values indicate greater profitability.
Heavy Grain Index	\$	Genetic differences between animals in net profitability per cow joined in a commercial self replacing herd targeting pasture grown steers with a 200 day feedlot finishing period for the grain fed high quality, highly marbled markets.	Higher selection index values indicate greater profitability.
Heavy Grass Index	\$	Genetic differences between animals in net profitability per cow joined in a commercial self replacing herd targeting pasture finished steers.	Higher selection index values indicate greater profitability.

# Bull Guarantee

**At Landfall we understand and value the economic importance of fertility within a beef herd. Empty cows are a huge cost to a producer and at Landfall we are doing our utmost to limit the unexpected outcomes in a breeding situation.**

In an endeavour to provide our clients with a professional service, we have implemented this bull guarantee. It is to ensure that both Landfall and you (our valued client) have a clear understanding of each others obligations.

Our breeding bulls are assessed under a stringent set of guidelines to ensure minimal exposure of our clients to fertility issues.

- ✓ All bulls are structurally assessed and those that don't meet the specifications are culled.
- ✓ All bulls are semen tested and have their penis checked by an independent veterinarian.

At Landfall we are aware that even after these stringent tests are carried out that there is a risk that a breeding bull may still not work to their expected potential. Therefore our guarantee covers that risk; however it does not replace good management and due care by the purchaser.

## GUIDELINES

Landfall guarantees breeding bulls from the date of purchase against loss of fertility due to structural failure of the bull for a period of two years. For example, corkscrew penis or bad feet. Our guarantee does not cover situations such as broken penises, prolapsed prepuce and broken legs etc.

In the event of a less than acceptable mating outcome, the bull will be assessed by a veterinarian chosen by Landfall and if the bull is found to be the cause of the infertility then Landfall will offer compensation in the form of:

### FIRST YEAR (12 month period from date of purchase)

100% of the purchase price in the form of:

- Replacement with an equivalent bull to the mutual agreement of both the vendor and purchaser.
- Credit for use with further purchases.

### SECOND YEAR (12 to 24 month period after purchase date)

50% of the purchase price in the form of:

- Credit for use with further purchases.

In the event that one of the above credits is issued it must be used within 12 months of the issue date or it will be forfeited. If a credit is issued it is non-transferable.

(The original purchaser of the bull is the only eligible party to claim a credit).

The infertile bull is then to be slaughtered with proceeds of the sale to be paid to Landfall. Landfall will cover the veterinary expenses and transport costs of the bull to an abattoir.

**Landfall will not be held liable and does not offer compensation for loss of income in the event of infertility resulting in non pregnant females.**

# The Obligation of the Purchaser

**The Landfall Guarantee is not a replacement for sound management practices. The guarantee is provided to cover the performance of the bull where breeding cows are managed to recognised industry standards. The purchaser of the bull is expected to observe joining, monitor for later cycling and record any repeat cycling in the females. If any problems arise it is expected that the purchaser notifies Landfall within 3 months, after the end of the joining period.**

At Landfall we recognise there is an infertility risk involved in breeding herds. We breed our bulls so as to limit the financial and production risks involved. If for any reason there are any unexpected

outcomes with Landfall bulls we stand by our product and do not expect you the producer to have to bear the entire financial burden. If you have a problem we want to be the first to know about it. We

have confidence in our bulls and offer a commitment to our clients that our product and service is of the highest quality achievable. Your success is ultimately our success.

## **FREIGHT**

- Free sea freight to Melbourne, Grassy and Lady Barron on all bulls sold at auction
- Free freight within mainland Tasmania on the condition that all bulls sold by auction be delivered within one week of purchase

# Autumn Sale 2020 Round Up

*“If we could depend on the weather this may be the format for future sales!”*

Don't put the foot down Gerald!

**Our Autumn 2020 Bull Sale was held just after our borders were closed and lockdown was in place. Fortunately, our catalogue was out and all testing requirements completed. Again we were very grateful that Ben Hooper had vision of all lots selling on our website, as social distancing meant we were restricted with the number of clients visiting Landfall.**

Like many businesses we were forced to come up with a plan to ensure the safety of visitors, staff and family. Thinking outside of the box (or the enclosed sales complex) the bulls were auctioned from the viewing pens by Nutrien auctioneer Warren Johnston with AuctionsPlus, Ben Hooper taking bids all from

the back of a tray truck stacked with sound speakers. The weather was perfect and the results outstanding.

We would like to thank the Nutrien team Warren Johnston, Jock Gibson, John Tuskin, Wendy Giles, Cooper Lamprey & Graeme Bligh for adjusting

to such unprecedented sale conditions at Landfall.

Zara, Kate and their team came up with pre-packaged boxed lunches which were a real hit.

If we could depend on the weather this may be the format for future sales!

Pen numbers in place

Social Distancing pre sale

*“The weather was perfect and the results outstanding.”*

## A LITTLE BACKGROUND TO LANDFALL FARM FRESH...

Landfall Farm Fresh is our specialist butcher and fresh food business in Launceston, providing our very own Landfall Angus Beef and Prime Lamb direct from our farm to our loyal and wide-ranging customers.

Our fully integrated, true paddock to plate supply chain, delivers a transparent and trusted red meat choice. Customers appreciate knowing the provenance, story and integrity of our free range and grass-fed beef and lamb. We credit this largely to the success of our primary production business and the work and dedication of previous generations. Our grandfather, Robbie Archer, always held the vision of having a butcher shop in the family business.

We strive to build positive relationships with our customers and create positive eating experiences. We are passionate and proud to provide locally grown, consistent premium quality produce, and exceptional customer service.

We welcome you to visit us in store Wednesday to Saturday at 49 Balfour Street Launceston, and to follow us on Facebook and Instagram.

49 Balfour St, Launceston

# Trusted farmers and specialty butchers.

Pictured: Landfall Angus dry-aged rib eye steaks

**COVID-19 has forced many small businesses like ours to adapt and to think outside the square. The challenge of implementing change in a very short period of time has kept us on our toes and shed light on our strengths as a team.**

Our dedicated staff have stepped up to the mark and have been exceptional in ensuring our customers safety. A new online component has been added to our business along with the option for a click and collect service or a contactless home delivery.

Through recent months the importance of supporting our local businesses has become very apparent. We have been lucky to have access to the team at Clever Creative who promptly put together our online store. In addition to this they have been involved in the development of our new electronic order processing system and our digital marketing. A huge thank you must go to local boys Jason, Joseph and Isaac for their recent input and sharing of expert knowledge.

The loyalty of our customers, both retail and wholesale, has been highlighted yet again. Many new

faces have walked through the door or enjoyed ordering online after the push to support local and the forced need to cook at home. Repeat customers are those who bring joy to our business and make it all worthwhile. We hear about the cooking adventures of our customers on a regular basis and love providing ideas and education to those seeking something more than just a steak!

*“Repeat customers are those who bring joy to our business and make it all worthwhile.”*

We have recently welcomed two new staff members in Mel and Chippa. With Ellie and Tim preparing for baby number three we have handed the role of retail and wholesale coordinator to Chippa who brings years of

**Above: Chipppa**  
our new retail and wholesale coordinator

**Below: Tim and Scott**  
in front of the shop, trusted farmers since 1876, specialty butchers since 2008

food knowledge to the table. A fully qualified chef and local boy himself we now have even more opportunity to develop our business in differing ways. Mel joins us as a casual retail assistant and has slotted into the team with great enthusiasm.

Our online store is simple and easy to use, we encourage you to check it out, otherwise we look forward to seeing you in store soon.

Regards,

**The team at Landfall Farm Fresh**

## Roast rack of lamb with rosemary salt

Peter Gilmore

🕒 Time: 30 mins - 1hr 🍽️ Serves: 4

### Ingredients

- 2x frenched lamb racks, cap on
- 2 heaped tsp finely chopped fresh rosemary
- 2 tsp fine sea salt
- 100ml olive oil

### Method

#### Step 1

Preheat your oven to 200C. Mix the rosemary and sea salt together and lightly season the lamb racks with half the sea salt and rosemary.

#### Step 2

Heat a heavy-based frying pan on the stove until hot. Add a drizzle of olive oil and place the lamb racks in the hot pan and sear all the sides. Once well coloured, remove the lamb racks and place on a cake rack in a roasting tray.

#### Step 3

Roast the lamb in the oven for about 20-25 minutes. This should produce a medium rare to medium lamb rack. Remove from the oven, season with the remaining rosemary salt and drizzle with the remaining olive oil. Allow to rest for 10 minutes before serving. Place the lamb racks on a platter and garnish with fresh rosemary sprigs if available.

Serve with Gilmore's potatoes with anchovy, parsley and lemon butter and spring pea salad.

Specialty cut side of lamb available to order online

**Quick Tip:**  
Ask your butcher to french trim your lamb racks

# This great bloke needs two introductions....

**Firstly as Landfall's Assistant Manager and, secondly as the husband of Ellie (now Wheeler, nee Archer). It takes roughly half an hour in the cattle yards to realise Tim's natural ability with stock and his endearing love of animals. Another half an hour and you've probably worked out that his greatest love is his family, closely followed by the game of Aussie rules.**

Born in 1983 as the eldest son of Robyn and Ian Wheeler, Tim grew up only 10 minutes north of Landfall with one brother, two sisters and a close-knit extended family. A country kid at heart, Tim lived in Swan Bay until he was 10 before moving to a property in Mount Direction. Whilst growing up his passion for animals was extremely evident to all those around him. He enjoyed raising calves, lambs and pigs and appreciated his rural upbringing, making the most of any animal related opportunity.

Tim attended the local school where he quickly became involved in the showing of both sheep and cattle, and the carcass competitions. Junior show judging was a strength of Tim's with a real eye for, and interest in cattle. His judging was taken to a whole new level when he decided to try his hand at the showgirl competition

and as the first ever fella to take the cake, he remains a very proud winner of the title - Miss Devonport Showgirl.

*“Whilst growing up his passion for animals was extremely evident to all those around him.”*

By high school Tim had made the firm decision he would find a career path that incorporated his natural athleticism with his love for animals. Something outdoors would be a bonus and his decision to be a farmer was made! Tim was introduced to Landfall Angus through the Ag Science program at Brooks High School. It was at this same time that he was introduced to Lou and Gerald's eldest daughter - Ellie. The story goes that Ellie

first asked Tim out when painting fences....? and given his track record of being the most honest bloke you'd know, we actually believe him (also the fact that Ellie didn't generally offer up her services for jobs such as painting, it seems she may have had another agenda!!!). Being the boss's daughter with three older brothers, Tim's intentions were kept on the straight and narrow. A shotgun interrogation from a mindful older brother and his mates reminded Tim that there was to be no messing around!

With sights on a career in agriculture now consolidated Tim went on to complete his apprenticeship part time at Landfall and part time on the Brooks High School farm (2000 to 2001). Tim then continued working at Greenhythe with Ed in 2002 before moving to Victoria in 2003 to study Agriculture at Melbourne

Breaking away for Hillwood against Rocherlea 2015

The Dookie lads working on their PhD in alcohol at Chops' wedding, Willaura 2016

University's Dookie Campus. He completed an Advanced Diploma and a Bachelor of Agriculture - potentially also a PhD in alcohol consumption. The highlights of his time at Dookie were the comradery with a close group of mates and the connection with the local community through the Dookie United Football and Netball Club.

Many miles were travelled up and down the Hume freeway in his little yellow Datsun 1200 ute. Whether it was visiting Ellie in Melbourne or catching a game of footy, Tim thoroughly enjoyed his time abroad. Tim also spent time with Betty and Harry Williams in Glenrowan where he shared his love for black cattle, football and Dookie with Harry.

Valuable knowledge was gained across his roles at the Marriott's lamb feedlot at 'Yarralah' near Benalla, and as a research technician for the University of Melbourne on irrigation management projects at the Dookie Campus. Being the family man he is, Tim happily returned home at the end of 2008 to be able to spend precious time with his grandparents.

Over the past ten years Tim has worked alongside Frank and Gerald at Landfall taking on many various roles. Whilst cattle are his main interest, the breeding and genetics of both the sheep flock and cattle are part of his

day to day duties. Tim willingly and successfully took on the role of the Black and White Suffolk stud breeding program manager whilst this was operational. Today he plays a large part in the hand selection of lambs for the Landfall Farm Fresh butcher each week.

*“Over the past ten years Tim has worked alongside Frank and Gerald at Landfall taking on many various roles.”*

Getting to work with some very talented industry professionals involved in the Landfall program has been a privilege Tim has greatly appreciated and respected. Tim travelled to the states with Ed in 2013 and solo in 2017 getting to visit many large American Angus studs. Investigating and viewing some of the animals that have had big impacts on the breed has definitely been a career highlight. Tim's desire to better himself and the Landfall business was clearly highlighted when he attended the Rabobank farm managers program in 2014. Winning the final project award for his research into increasing lamb survival rates amongst the Landfall flock.

Another great highlight for Tim was marrying Ellie on the Landfall

property in 2012. Now a family of five with three beautiful kids, Grace, 4, Jack, 2 and the recent addition of Meg, born mid-July. Recent years have seen Tim and his family move from Landfall back to his old stomping ground of Swan Bay. Purchasing Gaunt's Hill Farm in 2017 was extremely fitting. Land that was once owned by Landfall, where Gerald and Robbie ran sale bulls in the early 1980's and only just around the corner from where Tim grew up.

With a solid, longstanding connection to Landfall and an absolute heart of gold Tim is a valuable member of both the Landfall Angus business and the Archer family.

Family time out with Grace & Goose at Binalong Bay
