WELCOME TO OUR 43RD ANNUAL AUTUMN ON PROPERTY AUCTION

*On property bull sale
Monday 22nd March
2021 at 1pm.*

All photos of N90 taken by:
Brandon Sykes of BJS Photography

Buyers Instruction Slip page 116

Welcome

We invite you to attend our 43rd Annual Autumn on property auction and are pleased to offer you 200 performance recorded rising two-year bulls.

Upon reflecting on the last 12 to 18 months it would be hard to imagine the seasonal situations across much of Australia being so changeable. Much of the eastern seaboard is experiencing well above average rainfall and subsequently above average pasture growth. What is most pleasing is that we have all seen the stringing together of a few above average seasons. The challenge is finding enough mouths to eat the surplus of feed with record prices for all classes of stock making the acquisition of cattle a challenge. The current supply and demand equation has certainly put the breeding sector in a strong position to capitalise on improved fiscal returns.

This autumn sale sees our largest offering to date with 200 bulls being catalogued. The decision to continue to increase our sale offering comes from our desire to drive value in the genetics marketplace. An increased sale offering is not just about more bulls, as we are committed to ensuring that the quality of each offering also improves so we have the challenge of more bulls being better bulls. We have confidence that in this offering we have achieved that.

Featured in this sale are 41 sons of Landfall New Ground N90 who sold in the Autumn of 2019 to Absolute Angus and ABS for a Tasmanian record of \$75,000. We are proud of the quality and consistency in New Ground's progeny and feel that his genetics are a good fit for where much of the industry is heading with its breeding direction. This is also our first offering of Baldrige Beast Mode sons with his progeny offering performance in a thick and high-capacity phenotype. There are several sons of Clunes Crossing Dusty who offers a well-balanced data set. Also on offer are sons of Keystone, Mojo, Leonardo, GAR Inertia, Capitalist, Fail Safe and Bartel amongst others. The comparative performance of the Landfall sires alongside other industry leading sires is pleasing and a good reflection on the depth of the Landfall breeding program.

We are proud of the balance our bull offering provides with a genetic package that is high performing in a functional and attractive phenotype.

We genuinely hope that all of you in interstate locations can easily and safely travel to be

with us on sale day. We missed seeing you all here during 2020 and welcome you to Landfall throughout 2021. Regardless of the situation our sale will go ahead as planned on site and interfaced with Auctions Plus.

We have once again partnered with Achmea Insurance to offer an automatic insurance cover on all bulls sold at this coming Autumn sale. All bulls will be covered for 3 months from the date of sale by Achmea's 2-star product for mortality including accidental loss of use and transit. We have arranged and paid for this insurance, so it is no cost to you. This is a unique offering in the marketplace, and we thank Achmea for their continued support of the Landfall program.

We would like to take this opportunity to thank all the Landfall staff, family members and associates for their valuable contribution to our program. The commitment and dedication of these people is vital to our success.

Kind Regards,

The Archer Family.

About Landfall Angus

Landfall Angus is a family owned and operated business located in the Tamar Valley in Northern Tasmania. Our cow herd consists of over 2200 registered females, making Landfall one of the largest Angus Seedstock herds in Australia.

Landfall Angus cattle perform well in the natural environments of Australia, a direct result of our strong focus on the commercial realities of beef production. The Landfall Angus cow herd is highly fertile, functional and high performing. Careful genetic selection and improved production management techniques ensure that Landfall is a leading Seedstock herd in Australia.

HISTORY

Landfall Angus was established in 1948 with the purchase of twelve females from the Australian mainland. The original Landfall cows were selected for their large frame and femininity. Sires from “Naranghi” in New South Wales, at that time bred by Mr. John Bott, were consistently breeding progeny that excelled in fertility and growth. They complimented the Landfall cows very well and these sires were used for 20 years.

In the early years of breeding bulls a small number were sold privately to regular Tasmanian and King Island clients. From 1975 an annual auction has been held offering bulls and females.

In 2004 a spring sale was introduced and is held annually on property offering bulls.

We supply our clients with high quality Angus genetics that are fertile, structurally sound, easy doing and low maintenance without compromising the importance of growth and carcass performance.

TODAY

Landfall Angus is today owned and managed by the fourth and fifth generation of the Archer family. The Landfall herd now consists of over 4000 registered animals running over two main production centres in the Tamar Valley, calving 2200 registered females. The Angus herd is run alongside a self-replacing flock of composite sheep.

The Landfall herd is run under commercial conditions, in large contemporary groups. Artificial insemination and embryo transplant are used to increase the rate of genetic gain in our herd. Strict criteria is used for the selection of sires and dams within our breeding programs.

A strong emphasis is placed on the traits that contribute positively to the commercial profitability and sustainability of beef production. Firstly we aim to breed a functional female, focussing on structural soundness, docility, fertility and calving ease. Animals are joined for restricted periods resulting in short calving periods. Any animal not meeting the criteria is culled. The focus then moves towards growth and carcass quality with targets set above breed average whilst avoiding extremes. All registered animals are performance recorded with Breedplan and Landfall has been a member of Angus Breedplan since its inception in the early 1980's. Data is collected from animals run in large groups allowing us to directly compare genetics without the impact of environmental differentiation.

Annual sales are held on property in the Autumn and Spring, with in excess of 600+ bulls being sold annually.

OUR GOALS AT LANDFALL ARE:

1. To provide our clients with superior genetics to help them achieve a sound investment and help to improve their bottom-line.
2. To produce genetics which perform well under the natural environments of Australia.
3. To have relationships of high integrity with our clients.

Sale Notes

1. Location

8 kilometres from the centre of Launceston, North on East Tamar Highway. Follow A8 towards Georgetown. See page 115 for map and travel information.

2. Covid Restrictions

The situation with Covid-19 is an ever changing landscape. We plan to hold the sale on property and welcome our clients who feel comfortable to be here. We will continually keep up to date with the restrictions that we need to have in place to keep everyone safe leading up to and on the day. Should anyone not feel comfortable to be here or is unable to travel from interstate please get in touch with us if you require assistance in making your selections to operate in the auction remotely. We learnt much from our 2020 Sales and feel confident we can navigate our way through to the best possible outcome for our clients. Your health, safety and level of comfort are of the highest priority to us. Food and refreshments will be offered with strict adherence to the Covid restrictions.

3. Rebates

4% rebate commission offered on all bulls to agents settling within

7 days of invoice. All purchasers must nominate their agent 24hrs prior to the sale with Nutrien Livestock. Please email studstock@robertsltd.com.au or frank@landfall.com.au

4. Freight

Free freight on all bulls to Melbourne, Grassy and Lady Barron ports for lots sold by auction. Free freight on all bulls within mainland Tasmania. The vendor or his agent will make freight arrangements (conditions apply).

5. Nutrition

All bulls have been grass fed with supplement silage.

6. Animal Health

- All bulls have been semen tested and had their penis and testicles examined.
- All bulls have been tested as BVD P.I. negative.
- All bulls have been vaccinated with Vibrovax, Pestigard and Ultravac 7 in 1.

7. Recessive Genetic Conditions

All lots are clearly marked with their respective genetic status.

8. Bull Guarantee

All bulls covered by the Landfall Bull Guarantee (see details on page 106 of this catalogue).

9. Sire Bulls

Lots 1 through to 51 have been used for joining in the Landfall herd in the Spring of 2020. Please take this into account when assessing these bulls.

10. Photos and Videos

Ben Hooper from Clear Vision Imaging has captured videos of all sale lots. They are available at www.landfall.com.au Sale bull photos also taken by Ben Hooper.

11. Registrations

Please note: some lots are HBR registered and some are APR registered. All animals are eligible for transfer with their respective registration status.

12. Inspection

Sale bulls will be available for paddock viewing on Sunday the 21st of March from 9am onwards. All bulls will be penned by 10am on the morning of the sale. Inspection any other time is welcome by appointment.

PLEASE NOTE:

As vendors, the Archer family at Landfall want your valuable new purchase to be given every opportunity to travel and settle into their new environment with a minimum of stress.

To this end we ask you to nominate;

CLEAR DELIVERY INSTRUCTIONS.

Short notice requests for collection of animals will not be accepted.

Images and videos of most lots will be available on our website closer to sale date.

Thank you for your co-operation.

DNA SUFFIX KEY:

The suffix displayed at the end of each animal's name indicates the DNA parentage verification that has been conducted by Angus Australia.

PV: both parents have been verified by DNA.

SV: the sire has been verified by DNA.

DV: the dam has been verified by DNA.

#: DNA verification has not been conducted.

E: DNA verification has identified that the sire and/or dam may possibly be incorrect, but this cannot be confirmed conclusively.

DISCLAIMER: Animal details included in this catalogue, including but not limited to pedigree, DNA information, Estimated Breeding Values (EBVs) and Index values, are based on information provided by the breeder or owner of the animal. Whilst all reasonable care has been taken to ensure that the information provided in this catalogue was correct at the time of publication, neither the vendor, Angus Australia or the selling agents assume any responsibility for the accuracy or completeness of the information, nor for the outcome (including consequential loss) of any action taken based on this information.

Notes

We are excited to be offering the first sons of New Ground in this sale. New Ground was used heavily in the Landfall artificial breeding programs in 2018 after being collected as a yearling. He was then sold in our Autumn 2019 sale for a Tasmanian record price of \$75,000 to Absolute Angus and ABS. New Ground is from a high-quality female line and we expect daughter quality to be one of his strong points. His progeny are very well balanced with even performance and quiet temperament. A total of 41 sons on offer.

Stud stock insurance with all bulls purchased at the Landfall Angus Autumn Sale

Achmea, one of Australia's specialist farm insurers, is delighted to attend the Landfall Angus Spring Sale and provide 2 star cover for 3 months for all bulls sold in this catalogue. This cover has been paid for by Landfall Angus for your convenience.

If you wish to purchase cover at the end of the 3 month period please contact Achmea Farm Insurance Specialist Peter Wilkinson 0408 746 254 or Tom Reinmuth 0419 122 499, who will be attending the sale.

Achmea offers Stud Stock insurance, designed to protect the stud bull from the moment the hammer falls.

With our Stud Stock insurance cover, you decide what you need, when you need it and how you need it.

Our flexible options include:

- **1 Star** Mortality only (including transit)
- **2 Star** Mortality including accidental loss of use
- **3 Star** Mortality including accidental loss of use, sickness and disease.

Caring For Your Bulls

More calves, more years

Your bull is an important investment. With proper management you can achieve a longer working life from your bull resulting in more calves at a reduced cost per calf.

1. Arrival on farm

- a. Have some quiet cows or steers in the yard when the bull arrives. He will often be unsettled as he has left his mates and travelled on a truck for his first time. Give him some time to adapt to his new surroundings.

2. Pre-Joining

- a. Your new bulls will benefit from exposure to some empty cows for 2-3 weeks prior to their normal breeding period. This exposure will allow them to service some females and become exposed to any of the normal pathogens in your cow herd. If you have purchased multiple bulls, expose them only two at a time. It is then important to give your bull time to recover following the exposure period before the joining season begins.
- b. Do a pre-joining Breeding Soundness Examination (BSE) on all bulls to evaluate; structure, testicles and serving capability. This is the opportunity to identify any bull which may delay cows going in calf. Also administer booster vaccinations.

3. Joining

- a. Don't over join new bulls (maximum of 40 cows).
- b. Multi-sire join where possible to minimize the risks associated with a bull breaking down in the joining period. If you need to single sire join observe closely and rotate with a proven bull for at least 1 cycle. New bulls are the most at risk of break down, ensure you check them regularly.
- c. Most bull fertility issues develop during the joining period rather than being pre-existing problems. This means regular checking of bulls is essential (2-3 times a week for the first 3 weeks then weekly).

Check for:

- Try to observe the bull serving (mounting is not a successful serve)
- Any signs for lameness
- Evidence of penile or preputial swelling
- Any signs of ill health (lethargic, etc)
- Number of cows cycling (5% cycling per day if not in calf, this should decrease as cows conceive)

4. Post Joining

- a. Your bulls will spend most of their life in the bull paddock. You need to try minimize bull paddock injuries (bull fights) by not overcrowding the paddocks and possibly removing aggressive dominant bulls. Ensure young bulls have access to adequate feed to continue growing. Mature bulls should not be allowed to get fat, keep them in condition score 3. Mature bulls kept in body condition score 3 will have a longer working life.
- b. Pregnancy test early to identify any joining issues. This early pregnancy test will not only give you more time to make better decisions but it will also help identify the potential case of sub-fertility and allow you to prevent the problem in subsequent years.

Understanding the TransTasman Angus Cattle Evaluation (TACE)

WHAT IS THE TRANSTASMAN ANGUS CATTLE EVALUATION?

The TransTasman Angus Cattle Evaluation is the genetic evaluation program adopted by Angus Australia for Angus and Angus influenced beef cattle. The TransTasman Angus Cattle Evaluation uses Best Linear Unbiased Prediction (BLUP) technology to produce Estimated Breeding Values (EBVs) of recorded cattle for a range of important production traits (e.g. weight, carcass, fertility).

The TransTasman Angus Cattle Evaluation is an international genetic evaluation and includes pedigree, performance and genomic information from the Angus Australia and Angus New Zealand databases, along with selected information from the American and Canadian Angus Associations.

The TransTasman Angus Cattle Evaluation utilises a range of genetic evaluation software, including the internationally recognised BLUPF90 family of programs, and BREEDPLAN® beef genetic evaluation analytical software, as developed by the Animal Genetics and Breeding Unit (AGBU), a joint institute of NSW Agriculture and the University of New England, and Meat and Livestock Australia Limited (MLA).

WHAT IS AN EBV?

An animal's breeding value can be defined as its genetic merit for each trait. While it is not possible to determine an animal's true breeding value, it is possible to estimate it. These estimates of an animal's true breeding value are called EBVs (Estimated Breeding Values).

EBVs are expressed as the difference between an individual animal's genetics and a historical genetic level (i.e. group of animals) within the TACE genetic evaluation, and are reported in the units in which the measurements are taken.

USING EBVS TO COMPARE THE GENETICS OF TWO ANIMALS

TACE EBVs can be used to estimate the expected difference in the genetics of two animals, with the expected difference equating to half the difference in the EBVs of the animals, all other things being equal (e.g. they are joined to the same animal/s).

For example, a bull with a 200 Day Growth EBV of +60 would be expected to produce progeny that are, on average, 10 kg heavier at 200 days of age than a bull with a 200 Day Growth EBV of +40 kg (i.e. 20 kg

difference between the sire's EBVs, then halved as the sire only contributes half the genetics).

Or similarly, a bull with an IMF EBV of +3.0 would be expected to produce progeny with on average, 1% more intramuscular fat in a 400 kg carcass than a bull with a IMF EBV of +1.0 (i.e. 2% difference between the sire's EBVs, then halved as the sire only contributes half the genetics).

USING EBVS TO BENCHMARK AN ANIMAL'S GENETICS WITH THE BREED

EBVs can also be used to benchmark an animal's genetics relative to the genetics of other Angus or Angus infused animals in Australia.

To benchmark an animal's genetics relative to other Angus animals, an animal's EBV can be compared to the EBV reference tables, which provide:

- the breed average EBV
- the percentile bands table

The current breed average EBV is listed on the bottom of each page in this publication, while the current EBV reference tables are included at the end of these introductory notes. For easy reference, the percentile band in which an animal's EBV ranks is also published in association with the EBV.

CONSIDERING ACCURACY

An accuracy value is published with each EBV, and is usually displayed as a percentage value immediately below the EBV.

The accuracy value provides an indication of the reliability of the EBV in estimating the animal's genetics (or true breeding value), and is an indication of the amount of information that has been used in the calculation of the EBV.

EBVs with accuracy values below 50% should be considered as preliminary or of low accuracy, 50-74% as of medium accuracy, 75-90% of medium to high accuracy, and 90% or greater as high accuracy.

DESCRIPTION OF TACE EBVS

EBVs are calculated for a range of traits within TACE, covering calving ease, growth, fertility, maternal performance, carcass merit, feed efficiency and structural soundness. A description of each EBV included in this publication is provided on the following page.

UNDERSTANDING ESTIMATED BREEDING VALUES (EBVs)

BIRTH

CEDir	%	Genetic differences in the ability of a sire's calves to be born unassisted from 2 year old heifers.	Higher EBVs indicate fewer calving difficulties in 2 year old heifers.
CEDtrs	%	Genetic differences in the ability of a sire's daughters to calve unassisted at 2 years of age.	Higher EBVs indicate fewer calving difficulties in 2 year old heifers.
GL	days	Genetic differences between animals in the length of time from the date of conception to the birth of the calf.	Lower EBVs indicate shorter gestation length.
BW	kg	Genetic differences between animals in calf weight at birth.	Lower EBVs indicate lighter birth weight.

GROWTH

200 Day	kg	Genetic differences between animals in live weight at 200 days of age due to genetics for growth.	Higher EBVs indicate heavier live weight.
400 Day	kg	Genetic differences between animals in live weight at 400 days of age.	Higher EBVs indicate heavier live weight.
600 Day	kg	Genetic differences between animals in live weight at 600 days of age.	Higher EBVs indicate heavier live weight.
MCW	kg	Genetic differences between animals in live weight of cows at 5 years of age.	Higher EBVs indicate heavier mature weight.
Milk	kg	Genetic differences between animals in live weight at 200 days of age due to the maternal contribution of its dam.	Higher EBVs indicate heavier live weight.

FERTILITY

DtC	days	Genetic differences between animals in the time from the start of the joining period (i.e. when the female is introduced to a bull) until subsequent calving.	Lower EBVs indicate shorter time to calving.
SS	cm	Genetic differences between animals in scrotal circumference at 400 days of age.	Higher EBVs indicate larger scrotal circumference.

CARCASE

CWT	kg	Genetic differences between animals in hot standard carcass weight at 750 days of age.	Higher EBVs indicate heavier carcass weight.
EMA	cm ²	Genetic differences between animals in eye muscle area at the 12/13th rib site in a 400 kg carcass.	Higher EBVs indicate larger eye muscle area.
Rib Fat	mm	Genetic differences between animals in fat depth at the 12/13th rib site in a 400 kg carcass.	Higher EBVs indicate more fat.
P8 Fat	mm	Genetic differences between animals in fat depth at the P8 rump site in a 400 kg carcass.	Higher EBVs indicate more fat.
RBV	%	Genetic differences between animals in boned out saleable meat from a 400 kg carcass.	Higher EBVs indicate higher yield.
IMF	%	Genetic differences between animals in intramuscular fat (marbling) at the 12/13th rib site in a 400 kg carcass.	Higher EBVs indicate more intramuscular fat.

OTHER

NFI-F	kg/day	Genetic differences between animals in feed intake at a standard weight and rate of weight gain when animals are in a feedlot finishing phase.	Lower EBVs indicate more feed efficiency.
Doc	%	Genetic differences between animals in temperament.	Higher EBVs indicate better temperament.

STRUCTURE

Foot Angle	score	Genetic differences in foot angle (strength of pastern, depth of heel).	Lower EBVs indicate more desirable foot angle.
Claw Set	score	Genetic differences in claw set structure (shape and evenness of claws).	Lower EBVs indicate more desirable claw structure.

SELECTION INDEXES

ABI	\$	Genetic differences between animals in net profitability per cow joined in a typical commercial self replacing herd using Angus bulls. This selection index is not specific to a particular production system or market end-point, but identifies animals that will improve overall profitability in the majority of commercial grass and grain finishing beef production systems.	Higher selection index values indicate greater profitability.
DOM	\$	Genetic differences between animals in net profitability per cow joined in a commercial self replacing herd targeting the domestic supermarket trade.	Higher selection index values indicate greater profitability.
HGRN	\$	Genetic differences between animals in net profitability per cow joined in a commercial self replacing herd targeting pasture grown steers with a 250 day feedlot finishing period for the grain fed high quality, highly marbled markets.	Higher selection index values indicate greater profitability.
HGRS	\$	Genetic differences between animals in net profitability per cow joined in a commercial self replacing herd targeting pasture finished steers.	Higher selection index values indicate greater profitability.

Bull Guarantee

At Landfall we understand and value the economic importance of fertility within a beef herd. Empty cows are a huge cost to a producer and at Landfall we are doing our utmost to limit the unexpected outcomes in a breeding situation.

In an endeavour to provide our clients with a professional service, we have implemented this bull guarantee. It is to ensure that both Landfall and you (our valued client) have a clear understanding of each others obligations.

Our breeding bulls are assessed under a stringent set of guidelines to ensure minimal exposure of our clients to fertility issues.

- ✓ All bulls are structurally assessed and those that don't meet the specifications are culled.
- ✓ All bulls are semen tested and have their penis checked by an independent veterinarian.

At Landfall we are aware that even after these stringent tests are carried out that there is a risk that a breeding bull may still not work to their expected potential. Therefore our guarantee covers that risk; however it does not replace good management and due care by the purchaser.

GUIDELINES

Landfall guarantees breeding bulls from the date of purchase against loss of fertility due to structural failure of the bull for a period of two years. For example, corkscrew penis or bad feet. Our guarantee does not cover situations such as broken penises, prolapsed prepuce and broken legs etc.

In the event of a less than acceptable mating outcome, the bull will be assessed by a veterinarian chosen by Landfall and if the bull is found to be the cause of the infertility then Landfall will offer compensation in the form of:

FIRST YEAR (12 month period from date of purchase)

100% of the purchase price in the form of:

- Replacement with an equivalent bull to the mutual agreement of both the vendor and purchaser.
- Credit for use with further purchases.

SECOND YEAR (12 to 24 month period after purchase date)

50% of the purchase price in the form of:

- Credit for use with further purchases.

In the event that one of the above credits is issued it must be used within 12 months of the issue date or it will be forfeited. If a credit is issued it is non-transferable.

(The original purchaser of the bull is the only eligible party to claim a credit).

The infertile bull is then to be slaughtered with proceeds of the sale to be paid to Landfall. Landfall will cover the veterinary expenses and transport costs of the bull to an abattoir.

Landfall will not be held liable and does not offer compensation for loss of income in the event of infertility resulting in non pregnant females.

The Obligation of the Purchaser

The Landfall Guarantee is not a replacement for sound management practices. The guarantee is provided to cover the performance of the bull where breeding cows are managed to recognised industry standards. The purchaser of the bull is expected to observe joining, monitor for later cycling and record any repeat cycling in the females. If any problems arise it is expected that the purchaser notifies Landfall within 3 months, after the end of the joining period.

At Landfall we recognise there is an infertility risk involved in breeding herds. We breed our bulls so as to limit the financial and production risks involved. If for any reason there are any unexpected

outcomes with Landfall bulls we stand by our product and do not expect you the producer to have to bear the entire financial burden. If you have a problem we want to be the first to know about it. We

have confidence in our bulls and offer a commitment to our clients that our product and service is of the highest quality achievable. Your success is ultimately our success.

FREIGHT

- Free sea freight to Melbourne, Grassy and Lady Barron on all bulls sold at auction
- Free freight within mainland Tasmania on the condition that all bulls sold by auction be delivered within one week of purchase

A LITTLE BACKGROUND TO LANDFALL FARM FRESH...

Landfall Farm Fresh is our specialist butcher and fresh food business in Launceston. We provide our very own Landfall Angus Beef and Prime Lamb direct from our farm to our loyal and wide-ranging customers.

Our fully integrated, true paddock to plate supply chain, delivers a transparent and trusted red meat choice. Customers appreciate knowing the provenance, story and integrity of our free range and grass-fed beef and lamb. We credit this largely to the success of our primary production business and the work and dedication of previous generations. Our grandfather, Robbie Archer, always held the vision of opening a butcher shop – so today his dream lives on!

We strive to build positive relationships with our customers and create positive eating experiences. We are passionate and proud to provide locally grown, consistent premium quality produce, and exceptional customer service.

We welcome you to visit us in store Wednesday to Saturday at 49 Balfour Street Launceston, and to follow us on Facebook and Instagram.

49 Balfour St, Launceston
www.landfallfarmfresh.com.au
(03) 6334 5751

A recent experience that sums up why we do what we do...

...rarely do we have a 33 degree day in Tasmania and rarely do we get to the East Coast, however just this week we were lucky enough to experience both on the very same day!

The calling for a late afternoon swim resulted in us paddling the cool waters of Honeymoon Bay at the northern end of The Gardens. You all know the feeling when you see a face you recognise but have difficulty placing them quickly. As it tends to, in that scenario, the conversation started with “gosh your face is familiar – where do I know you from”. “School...no”, “work...no”, “maybe the butcher shop...” “ah yes of course, Landfall”.

My work associated with the butcher shop is vastly behind the scenes however at Christmas time all hands are on deck and I spent a solid week serving customers. My single Christmas week encounter with Melanie (who won't mind me sharing her name), became much more than that when we recognised one another at the beach. Her comment (like most!) was “of course, you look just like your sister Ellie who I see at the shop regularly”. After solving our short lived mystery we chatted about kids, school, family, busy motherhood and finally, the butcher shop.

Melanie's interest in food and local quality produce quickly shone and before we knew it 20 minutes of chatting had passed. Her desire to feed herself and her young family preservative free fresh meat resulted in her changing her ways. She talked about eating less meat but eating better quality meat which resonates well with our business values and beliefs.

Not only are we striving to offer exceptional produce and service, but we're also striving to relate to our environment. Most people who walk through our door do so because they have an interest in the provenance of their food. Our team find great pleasure in educating our customers on our point of difference and our focus on minimising waste. Our vision is to continue processing whole animals and to continue the community shift towards eating the whole animal rather than just the eye fillet!

“Besides eating better quality meat and less of it, consumers needed to eat more of the animals raised for slaughter, not just the 12 per cent that make up premium cuts”

– Anthony Puharich
Victor Churchill Meats

We have a longstanding love for farming and a newly found passion for butchering. It's always a pleasure to hear from our customers and Melanie's story was a fresh reminder that we definitely do share common values and beliefs with many of you.

We look forward to seeing you in the shop, or maybe even on the beach.

Mimi Churchill (nee Archer)

Braised oyster blade with parsnip puree

By Miele

🕒 Prep Time: 20mins 🍳 Cooking Time: 4hrs 🍽️ Serves: 6

Ingredients

- 6x 200g pieces of oyster blade steak
- Extra virgin olive oil
- 2 brown onions, diced
- 2 carrots, diced
- 2 celery sticks, diced
- 2 bay leaves
- ¼ bunch thyme
- 300ml red wine
- 750ml beef stock
- Salt flakes and pepper
- 750g parsnip, peeled, diced
- 300g butter
- 2-3 tbs salt flakes

Method

Braised oyster blade

Step 1 Heat casserole dish on high heat. Place oil into the dish and sear the pieces of beef until browned. Remove the beef from the casserole dish and set aside.

Step 2 Add some more oil to the dish along with the onions, carrots and celery. Cook until softened and beginning to caramelise. Add the bay leaves and thyme, followed by the wine and reduce by half.

Step 3 Add the stock and bring to the boil, then turn the heat off. Return the meat back to the casserole dish.

Step 4 Place casserole dish into a 130°C preheated oven. Cook for 3½ hours.

Step 5 Once the beef is cooked, remove the pieces of meat and strain the liquid. Reduce on high heat.

Parsnip puree

Step 1 Diced parsnip into large cubes and steam for 20 minutes.

Step 2 Transfer to a blender with the butter and half of the salt and blend until smooth. Check for seasoning and add the extra salt if required.

To serve

Step 1 Spoon puree into the middle of a bowl, pushing the mixture outwards, place a piece of beef in the middle, and pour over some of the sauce.

Step 2 Garnish with parsley and red vein sorrel.

A commitment to innovation

Ferghal was born in Scotland in 1989 and spent the first 8 years of his life living on his parents' farm on the Isle of Islay. He has fond memories of playing with his sister and two brothers on their farm.

His family moved to Australia in 1997 following a beautiful and enjoyable holiday in Queensland. They moved to Longreach in Western Queensland and experienced both climate and culture shock. Ferghal quickly lost his Scottish accent in the State primary school playground. Although farming was a major part of the family's life in Scotland, Longreach provided other opportunities. Ferghal found a passion for swimming which began as a way to escape the hot days and resulted in competitions each weekend.

Halfway through high school he was awarded a swimming scholarship at St Peters Lutheran College in Brisbane. Their swimming program is one of the best in Australia, and Ferghal found himself training morning and night alongside State and National competition winners. Despite thoroughly enjoying swimming, when his final year at school was over, he decided to move in the direction of his other passion, agriculture.

He attended the University of New England following high school, studying a Bachelor of Agriculture. His study confirmed that farming was the career he wanted to pursue. On completion of his degree he decided that before making the commitment to life on the farm, he should explore the world a little, so he spent 12 months working and living in Greece and France. There he gained valuable life experience in working with a range of people from many different backgrounds.

Upon return to Australia he was offered employment at a chicken farm not far from where his parents had moved to, near Brisbane. He worked there for 12 months and then took a position with Sustainable Ag at one of their farms, on King Island. He spent two years on King Island and enjoyed learning and working alongside Tas Loane, Tim Schuurung and Chris Flemming. This experience taught Ferghal a lot about managing large mobs of cattle and rotational grazing techniques. Although island life provided many perks, gaining experience at a variety of farms was always the plan for Ferghal and he moved to Victoria in 2014 to work at Te Mania Angus in Mortlake.

At Te Mania, Tom Gubbins supported Ferghal to gain skills and knowledge on all matters concerned with managing bulls and the breeding and genetics side of cattle production. He enjoyed the opportunities to refine his understanding of rotational grazing, pasture management and stock handling techniques.

It was not long after moving that he met his girlfriend, Emily, and after a couple of years together at Te Mania, they decided a change of scenery was in order. Having never been to mainland Tasmania before, they made a quick trip to Launceston and Hobart and were impressed with the beautiful landscape and scenery and settled on the move to Landfall.

At Landfall, Ferghal has found Frank Archer to be a first-class mentor and support. Ferghal was tasked to manage the irrigation side of Landfall, another opportunity to increase his knowledge and experience.

Outside of work Ferghal enjoys exploring the many hiking trails Tassie has to offer, propagating and growing a variety of plants and trees in their home garden, and construction projects with wood and metal.

Like many young farmers, he aspires to eventually manage his own farm and has been able

Pictured above Emily and Ferghal exploring Freycinet National Park

to purchase a small property where he spends much of his 'free time' trialing, testing and experimenting with farming concepts and turning ideas into reality.

Ferghal has found inspiration in the positive team mentality at Landfall, the ambition, passion and drive, encouraging him to continue to push the boundaries. Working at Landfall has confirmed

“He enjoys the challenge of managing cattle under irrigation to achieve optimal livestock production.”

his own passion for farming and commitment to innovation within the farming context.

He is a believer in continual learning, development and growth and is grateful for the opportunities to attend a variety of courses, conferences and local meetings to learn from others in the industry.

Ferghal feels grateful for the amazing team at Landfall and privileged to work for such a supportive and genuine farming family. The Landfall 'community' has provided opportunities and support for both Ferghal and Emily during their 3 years here and they look forward to what the future brings.

Pictured above Ferghal and Emily at the top of Mt Wellington, Hobart.

2020 Spring Round Up

As you would be aware, both our Autumn and Spring sales held on property last year followed the border closure and social distancing requirements that were in place.

This Autumn restrictions have been eased (at this stage), however, weather permitting we will continue auctioning direct from the sale pens.

Following the success of the last two outdoor auctions Gerald, Will and their teams have been busy increasing the number of sale pens to allow a more efficient viewing and auctioning flow.

We would like to think the outdoor selling procedure will be the norm for Landfall, however, Mother Nature may have other ideas!

Always greener on the other side- Winter Fodder Beet grazing.

Kate and Zara, the ladies behind the healthy lunch boxes, thank you.

Kate Littlejohn, Zara, Winnie, Hedley & Joe Archer

Time to move on to the next selling pen, Issie seated recording data.

Lunch during Covid lockdown.

Christmas celebrations, staff & family fun in the woolshed.

Sixth generation - Gerald & Lou's grandchildren.

Ice cream time – Jack Wheeler & Winnie Archer

Private Data Protection notice: We are collecting and processing this personal data being necessary for the purposes of the legitimate interests pursued by and necessary for protecting against serious cross-border threats to health. We do this as preventive measures for our community to mitigate the risk of a novel Coronavirus disease (COVID-19) outbreak in our saleyard facility. This data will help the authorities to trace a human-to-human transmission of the Virus. This data sheet will be stored in our office and is not shared with any third party, unless there will be an official request by the local authorities for reasons of public interest in the area of public health. The datasheet will be deleted one month after collection, unless a longer period is required by the public authorities

Location Map
