## **We invite you to attend our 18th Annual Spring on property auction and are pleased to offer you 112 performance recorded two year old and 88 yearling bulls.**

The bulls on offer represent the Landfall breeding objective of balancing performance and phenotype. The performance data across the catalogue is towards the top end of the breed in a phenotype that is attractive, functional and well suited to modern commercial breeding programs.

Over 60% of this offering are direct sons of Landfall sires with industry recognised bulls New Ground, Keystone and Leonardo featuring. Sons sold to date from these sires have been well received by our clientele. There are also the first sons of up-and-coming Landfall sires on offer, namely, Nobleman N106, Leonardo P145 and Prominent P317. Clunes Crossing Dusty is also strongly represented along with international sires Beast Mode and Foreman.

The yearling bulls we offered in the Spring Sale last year met strong demand in the market. We also continue to see many of our client base further increase breeding female numbers.

For these two reasons we have selected 88 yearling bulls to offer alongside the two-year-old bulls this year. Many of these young bulls are from proven calving ease pedigrees and are well suited to heifer joining. Our increased offering for this Spring Sale is driven by our motivation to be the best value provider of Angus genetics to the commercial sector. Importantly, more bulls on offer are coming from more females in the Landfall herd with our annual calf drop increasing year by year on the back of expanded AI and embryo transfer programs.

We have continued our partnership with Achmea Insurance to offer an automatic insurance cover on all bulls sold in this sale. All bulls will be covered for 3 months from the date of sale by Achmea's 2-star product for mortality including accidental loss of use and transit. We have arranged and paid for this insurance, so it is no cost to you. We are receiving positive feedback from our clients that this initiative is furthering to

reduce their exposure to the risk of introducing new bulls to their herds. This is a unique offering in the marketplace, and we thank Achmea for their continued support of the Landfall program.

Our production system aims to mirror that of many of our clients, resulting in our genetic production taking place in a system with adequate pressure to identify the outliers on either end of the bell curve. This is achieved with a grazing system targeting optimum stocking rates to maximise pasture growth and utilisation. The value to users of Landfall genetics is that we can better match a genetic package to their breeding objectives and desired outcomes.

We would like to take this opportunity to thank all the Landfall staff, family members and associates for their valuable contribution to our program. The commitment and dedication of these people is vital to our success.

**The Archer Family.**

# About Landfall Angus

**Landfall Angus is a family owned and operated business located in the Tamar Valley in Northern Tasmania. Our cow herd consists of over 2200 registered females, making Landfall one of the largest Angus Seedstock herds in Australia.**

Landfall Angus cattle perform well in the natural environments of Australia, a direct result of our strong focus on the commercial realities of beef production. The Landfall Angus cow herd is highly fertile, functional and high performing. Careful genetic selection and improved production management techniques ensure that Landfall is a leading Seedstock herd in Australia.

## HISTORY

Landfall Angus was established in 1948 with the purchase of twelve females from the Australian mainland. The original Landfall cows were selected for their large frame and femininity. Sires from “Naranghi” in New South Wales, at that time bred by Mr. John Bott, were consistently breeding progeny that excelled in fertility and growth. They complimented the Landfall cows very well and these sires were used for 20 years.

In the early years of breeding bulls a small number were sold privately to regular Tasmanian and King Island clients. From 1975 an annual auction has been held offering bulls and females.

In 2004 a spring sale was introduced and is held annually on property offering bulls.

*We supply our clients with high quality Angus genetics that are fertile, structurally sound, easy doing and low maintenance without compromising the importance of growth and carcass performance.*

## TODAY

Landfall Angus is today owned and managed by the fourth and fifth generation of the Archer family. The Landfall herd now consists of over 4000 registered animals running over two main production centres in the Tamar Valley, calving 2300 registered females. The Angus herd is run alongside a self-replacing flock of composite sheep.

The Landfall herd is run under commercial conditions, in large contemporary groups. Artificial insemination and embryo transplant are used to increase the rate of genetic gain in our herd. Strict criteria is used for the selection of sires and dams within our breeding programs.

A strong emphasis is placed on the traits that contribute positively to the commercial profitability and sustainability of beef production. Firstly we aim to breed a functional female, focussing on structural soundness, docility, fertility and calving ease. Animals are joined for restricted periods resulting in short calving periods. Any animal not meeting the criteria is culled. The focus then moves towards growth and carcass quality with targets set above breed average whilst avoiding extremes. All registered animals are performance recorded with Breedplan and Landfall has been a member of Angus Breedplan since its inception in the early 1980's. Data is collected from animals run in large groups allowing us to directly compare genetics without the impact of environmental differentiation.

Annual sales are held on property in the Autumn and Spring, with in excess of 600+ bulls being sold annually.

## OUR GOALS AT LANDFALL ARE:

1. To provide our clients with superior genetics to help them achieve a sound investment and help to improve their bottom-line.
2. To produce genetics which perform well under the natural environments of Australia.
3. To have relationships of high integrity with our clients.

# Sale Notes

## 1. Location

8 kilometres from the centre of Launceston, North on East Tamar Highway. Follow A8 towards Georgetown. See page 107 for map and travel information.

## 2. Covid Restrictions

The situation with Covid-19 is an ever changing landscape. We plan to hold the sale on property and welcome our clients who feel comfortable to be here.

We will continually keep up to date with the restrictions that we need to have in place to keep everyone safe leading up to and on the day. Should anyone not feel comfortable to be here or is unable to travel from interstate please get in touch with us if you require assistance in making your selections to operate in the auction remotely.

Page 106 includes our QR code allowing check in convenience on day of sale. Your health, safety and level of comfort are of the highest priority to us.

Food and refreshments will be offered with strict adherence to the Covid restrictions. QR Code check in will be required – further details on page 106.

## 3. Rebates

4% rebate commission offered on all bulls to agents settling within 7 days of invoice. All purchasers must nominate their agent 24hrs prior to the sale with Nutrien Livestock. Please email [livestocktas@nutrien.com.au](mailto:livestocktas@nutrien.com.au) or [frank@landfall.com.au](mailto:frank@landfall.com.au)

## 4. Freight

Free freight on all bulls to Melbourne, Grassy and Lady Barron ports for lots sold by auction. Free freight on all bulls within mainland Tasmania. The vendor or his agent will make freight arrangements (conditions apply).

## 5. Nutrition

All bulls have been fed grass and/or turnips with supplement silage.

## 6. Animal Health

- All bulls have been semen tested and had their penis and testicles examined.
- All bulls have been tested as BVD P.I. negative.
- All bulls have been vaccinated with Vibrovax, Pestigard and Ultravac 7 in 1.

## 7. Recessive Genetic Conditions

All lots are clearly marked with their respective genetic status.

## 8. Bull Guarantee

All bulls covered by the Landfall Bull Guarantee (see details on page 98 of this catalogue).

## 9. Sire Bulls

Lots 1 through to 36 have been used for joining in the Landfall herd in the Spring of 2020. Please take this into account when assessing these bulls.

## 10. Photos and Videos

Ben Hooper from Clear Vision Imaging has captured videos of all sale lots. They will be available late August at [www.landfall.com.au](http://www.landfall.com.au)

## 11. Registrations

Please note: some lots are HBR registered and some are APR registered. All animals are eligible for transfer with their respective registration status.

## 12. Inspection

All bulls will be available for inspection at Landfall on the morning of the sale from 10am. Inspection any other time is welcome by appointment.

### PLEASE NOTE:

As vendors, the Archer family at Landfall want your valuable new purchase to be given every opportunity to travel and settle into their new environment with a minimum of stress.

To this end we ask you to nominate;

### CLEAR DELIVERY INSTRUCTIONS.

Short notice requests for collection of animals will not be accepted.

Images and videos of most lots will be available on our website closer to sale date.

**Thank you for your co-operation.**

### DNA SUFFIX KEY:

The suffix displayed at the end of each animal's name indicates the DNA parentage verification that has been conducted by Angus Australia.

**PV:** both parents have been verified by DNA.

**SV:** the sire has been verified by DNA.

**DV:** the dam has been verified by DNA.

**#:** DNA verification has not been conducted.

**E:** DNA verification has identified that the sire and/or dam may possibly be incorrect, but this cannot be confirmed conclusively.

**DISCLAIMER:** Animal details included in this catalogue, including but not limited to pedigree, DNA information, Estimated Breeding Values (EBVs) and Index values, are based on information provided by the breeder or owner of the animal. Whilst all reasonable care has been taken to ensure that the information provided in this catalogue was correct at the time of publication, neither the vendor, Angus Australia or the selling agents assume any responsibility for the accuracy or completeness of the information, nor for the outcome (including consequential loss) of any action taken based on this information.

**Notes**

New Ground is from a high-quality female line, and we expect daughter quality to be one of his strong points. First daughters have calves hitting the ground now and have come through a tight feed period preserving good body condition and calving well. His progeny are, very well balanced with even performance and quiet temperament. A total of 41 sons sold to strong demand in our Autumn Sale averaging \$16k. New Ground is now seeing heavy use across the industry. A total of 27 sons on offer in this sale.

#### Notes

Keystone is one of the highest use bulls across the industry over the last two years, he is a genuine curve bending sire, who breeds consistency in his progeny. An Edmund son with added frame and length, we are experiencing good foot and leg structure with a clean front end. Progeny are displaying above average frame and length with docility a strong point. A total of 31 sons on offer in this sale.

**Notes**

The lot 2 bull from our 2019 Autumn Sale, he was purchased by the Blyth Family at Fernleigh Angus in Victoria. A larger frame sire with attractive phenotype and very sound structure. We have inspected the bull twice since he sold and he continues to meet expectation. Nobleman is seeing use across the industry with his sons featuring in other seedstock sales this Spring. Seven sons on offer in this sale.

#### Notes

The calving ease specialist, Leonardo possesses above average EMA and positive fat, progeny are moderately framed with an earlier maturity pattern. They are thick set, with ease of doing ability and sound structure. The perfect sire line to use over those bigger birth and later maturity pattern females that need an improvement in fat cover. Standing at Landfall, he maintains condition with minimal intake. A total of 5 sons on offer in this sale.

# Stud stock insurance with all bulls purchased at the Landfall Angus Spring Sale

**Achmea Australia, Australia's specialist farm insurer, is delighted to attend the Landfall Angus Spring Sale. For all bulls sold in this catalogue Achmea Australia will provide 2 star cover for 3 months. This cover has been paid for by Landfall Angus.**

At the end of the 3 months if you want to purchase cover, please contact our Farm Insurance Specialists: Tom Reinmuth (0419 122 499) and Peter Wilkinson (0408 746 254) both will be attending the sale.

Achmea offers Stud Stock insurance, designed to protect the stud bull from the moment the hammer falls.

With our Stud Stock insurance cover, you decide what you need, when you need it and how you need it.

Our flexible options include:

- **1 Star** Mortality only (including transit)
- **2 Star** Mortality including accidental loss of use
- **3 Star** Mortality including accidental loss of use, sickness and disease.

**[achmea.com.au](http://achmea.com.au)**

# Caring For Your Bulls

## More calves, more years

**Your bull is an important investment. With proper management you can achieve a longer working life from your bull resulting in more calves at a reduced cost per calf.**

### 1. Arrival on farm

- a. Have some quiet cows or steers in the yard when the bull arrives. He will often be unsettled as he has left his mates and travelled on a truck for his first time. Give him some time to adapt to his new surroundings.

### 2. Pre-Joining

- a. Your new bulls will benefit from exposure to some empty cows for 2-3 weeks prior to their normal breeding period. This exposure will allow them to service some females and become exposed to any of the normal pathogens in your cow herd. If you have purchased multiple bulls, expose them only two at a time. It is then important to give your bull time to recover following the exposure period before the joining season begins.
- b. Do a pre-joining Breeding Soundness Examination (BSE) on all bulls to evaluate; structure, testicles and serving capability. This is the opportunity to identify any bull which may delay cows going in calf. Also administer booster vaccinations.

### 3. Joining

- a. Don't over join new bulls (maximum of 40 cows).
- b. Multi-sire join where possible to minimize the risks associated with a bull breaking down in the joining period. If you need to single sire join observe closely and rotate with a proven bull for at least 1 cycle. New bulls are the most at risk of break down, ensure you check them regularly.
- c. Most bull fertility issues develop during the joining period rather than being pre-existing problems. This means regular checking of bulls is essential (2-3 times a week for the first 3 weeks then weekly).

Check for:

- Try to observe the bull serving (mounting is not a successful serve)
- Any signs for lameness
- Evidence of penile or preputial swelling
- Any signs of ill health (lethargic, etc)
- Number of cows cycling (5% cycling per day if not in calf, this should decrease as cows conceive)

### 4. Post Joining

- a. Your bulls will spend most of their life in the bull paddock. You need to try minimize bull paddock injuries (bull fights) by not overcrowding the paddocks and possibly removing aggressive dominant bulls. Ensure young bulls have access to adequate feed to continue growing. Mature bulls should not be allowed to get fat, keep them in condition score 3. Mature bulls kept in body condition score 3 will have a longer working life.
- b. Pregnancy test early to identify any joining issues. This early pregnancy test will not only give you more time to make better decisions but it will also help identify the potential case of sub-fertility and allow you to prevent the problem in subsequent years.

# Understanding the TransTasman Angus Cattle Evaluation (TACE)

## WHAT IS THE TRANSTASMAN ANGUS CATTLE EVALUATION?

The TransTasman Angus Cattle Evaluation is the genetic evaluation program adopted by Angus Australia for Angus and Angus influenced beef cattle. The TransTasman Angus Cattle Evaluation uses Best Linear Unbiased Prediction (BLUP) technology to produce Estimated Breeding Values (EBVs) of recorded cattle for a range of important production traits (e.g. weight, carcass, fertility).

The TransTasman Angus Cattle Evaluation is an international genetic evaluation and includes pedigree, performance and genomic information from the Angus Australia and Angus New Zealand databases, along with selected information from the American and Canadian Angus Associations.

The TransTasman Angus Cattle Evaluation utilises a range of genetic evaluation software, including the internationally recognised BLUPF90 family of programs, and BREEDPLAN® beef genetic evaluation analytical software, as developed by the Animal Genetics and Breeding Unit (AGBU), a joint institute of NSW Agriculture and the University of New England, and Meat and Livestock Australia Limited (MLA).

## WHAT IS AN EBV?

An animal's breeding value can be defined as its genetic merit for each trait. While it is not possible to determine an animal's true breeding value, it is possible to estimate it. These estimates of an animal's true breeding value are called EBVs (Estimated Breeding Values).

EBVs are expressed as the difference between an individual animal's genetics and a historical genetic level (i.e. group of animals) within the TACE genetic evaluation, and are reported in the units in which the measurements are taken.

## USING EBVS TO COMPARE THE GENETICS OF TWO ANIMALS

TACE EBVs can be used to estimate the expected difference in the genetics of two animals, with the expected difference equating to half the difference in the EBVs of the animals, all other things being equal (e.g. they are joined to the same animal/s).

For example, a bull with a 200 Day Growth EBV of +60 would be expected to produce progeny that are, on average, 10 kg heavier at 200 days of age than a bull with a 200 Day Growth EBV of +40 kg (i.e. 20 kg

difference between the sire's EBVs, then halved as the sire only contributes half the genetics).

Or similarly, a bull with an IMF EBV of +3.0 would be expected to produce progeny with on average, 1% more intramuscular fat in a 400 kg carcass than a bull with a IMF EBV of +1.0 (i.e. 2% difference between the sire's EBVs, then halved as the sire only contributes half the genetics).

## USING EBVS TO BENCHMARK AN ANIMAL'S GENETICS WITH THE BREED

EBVs can also be used to benchmark an animal's genetics relative to the genetics of other Angus or Angus infused animals in Australia.

To benchmark an animal's genetics relative to other Angus animals, an animal's EBV can be compared to the EBV reference tables, which provide:

- the breed average EBV
- the percentile bands table

The current breed average EBV is listed on the bottom of each page in this publication, while the current EBV reference tables are included at the end of these introductory notes. For easy reference, the percentile band in which an animal's EBV ranks is also published in association with the EBV.

## CONSIDERING ACCURACY

An accuracy value is published with each EBV, and is usually displayed as a percentage value immediately below the EBV.

The accuracy value provides an indication of the reliability of the EBV in estimating the animal's genetics (or true breeding value), and is an indication of the amount of information that has been used in the calculation of the EBV.

EBVs with accuracy values below 50% should be considered as preliminary or of low accuracy, 50-74% as of medium accuracy, 75-90% of medium to high accuracy, and 90% or greater as high accuracy.

## DESCRIPTION OF TACE EBVS

EBVs are calculated for a range of traits within TACE, covering calving ease, growth, fertility, maternal performance, carcass merit, feed efficiency and structural soundness. A description of each EBV included in this publication is provided on the following page.

## UNDERSTANDING ESTIMATED BREEDING VALUES (EBVs)

### BIRTH

CEDir	%	Genetic differences in the ability of a sire's calves to be born unassisted from 2 year old heifers.	Higher EBVs indicate fewer calving difficulties in 2 year old heifers.
CEDtrs	%	Genetic differences in the ability of a sire's daughters to calve unassisted at 2 years of age.	Higher EBVs indicate fewer calving difficulties in 2 year old heifers.
GL	days	Genetic differences between animals in the length of time from the date of conception to the birth of the calf.	Lower EBVs indicate shorter gestation length.
BW	kg	Genetic differences between animals in calf weight at birth.	Lower EBVs indicate lighter birth weight.

### GROWTH

200 Day	kg	Genetic differences between animals in live weight at 200 days of age due to genetics for growth.	Higher EBVs indicate heavier live weight.
400 Day	kg	Genetic differences between animals in live weight at 400 days of age.	Higher EBVs indicate heavier live weight.
600 Day	kg	Genetic differences between animals in live weight at 600 days of age.	Higher EBVs indicate heavier live weight.
MCW	kg	Genetic differences between animals in live weight of cows at 5 years of age.	Higher EBVs indicate heavier mature weight.
Milk	kg	Genetic differences between animals in live weight at 200 days of age due to the maternal contribution of its dam.	Higher EBVs indicate heavier live weight.

### FERTILITY

DtC	days	Genetic differences between animals in the time from the start of the joining period (i.e. when the female is introduced to a bull) until subsequent calving.	Lower EBVs indicate shorter time to calving.
SS	cm	Genetic differences between animals in scrotal circumference at 400 days of age.	Higher EBVs indicate larger scrotal circumference.

### CARCASE

CWT	kg	Genetic differences between animals in hot standard carcass weight at 750 days of age.	Higher EBVs indicate heavier carcass weight.
EMA	cm <sup>2</sup>	Genetic differences between animals in eye muscle area at the 12/13th rib site in a 400 kg carcass.	Higher EBVs indicate larger eye muscle area.
Rib Fat	mm	Genetic differences between animals in fat depth at the 12/13th rib site in a 400 kg carcass.	Higher EBVs indicate more fat.
P8 Fat	mm	Genetic differences between animals in fat depth at the P8 rump site in a 400 kg carcass.	Higher EBVs indicate more fat.
RBV	%	Genetic differences between animals in boned out saleable meat from a 400 kg carcass.	Higher EBVs indicate higher yield.
IMF	%	Genetic differences between animals in intramuscular fat (marbling) at the 12/13th rib site in a 400 kg carcass.	Higher EBVs indicate more intramuscular fat.

### OTHER

NFI-F	kg/day	Genetic differences between animals in feed intake at a standard weight and rate of weight gain when animals are in a feedlot finishing phase.	Lower EBVs indicate more feed efficiency.
Doc	%	Genetic differences between animals in temperament.	Higher EBVs indicate better temperament.

### STRUCTURE

Foot Angle	score	Genetic differences in foot angle (strength of pastern, depth of heel).	Lower EBVs indicate more desirable foot angle.
Claw Set	score	Genetic differences in claw set structure (shape and evenness of claws).	Lower EBVs indicate more desirable claw structure.

### SELECTION INDEXES

ABI	\$	Genetic differences between animals in net profitability per cow joined in a typical commercial self replacing herd using Angus bulls. This selection index is not specific to a particular production system or market end-point, but identifies animals that will improve overall profitability in the majority of commercial grass and grain finishing beef production systems.	Higher selection index values indicate greater profitability.
DOM	\$	Genetic differences between animals in net profitability per cow joined in a commercial self replacing herd targeting the domestic supermarket trade.	Higher selection index values indicate greater profitability.
HGRN	\$	Genetic differences between animals in net profitability per cow joined in a commercial self replacing herd targeting pasture grown steers with a 250 day feedlot finishing period for the grain fed high quality, highly marbled markets.	Higher selection index values indicate greater profitability.
HGRS	\$	Genetic differences between animals in net profitability per cow joined in a commercial self replacing herd targeting pasture finished steers.	Higher selection index values indicate greater profitability.

# Bull Guarantee

**At Landfall we understand and value the economic importance of fertility within a beef herd. Empty cows are a huge cost to a producer and at Landfall we are doing our utmost to limit the unexpected outcomes in a breeding situation.**

In an endeavour to provide our clients with a professional service, we have implemented this bull guarantee. It is to ensure that both Landfall and you (our valued client) have a clear understanding of each others obligations.

Our breeding bulls are assessed under a stringent set of guidelines to ensure minimal exposure of our clients to fertility issues.

- ✓ All bulls are structurally assessed and those that don't meet the specifications are culled.
- ✓ All bulls are semen tested and have their penis checked by an independent veterinarian.

At Landfall we are aware that even after these stringent tests are carried out that there is a risk that a breeding bull may still not work to their expected potential. Therefore our guarantee covers that risk; however it does not replace good management and due care by the purchaser.

## GUIDELINES

Landfall guarantees breeding bulls from the date of purchase against loss of fertility due to structural failure of the bull for a period of two years. For example, corkscrew penis or bad feet. Our guarantee does not cover situations such as broken penises, prolapsed prepuce and broken legs etc.

In the event of a less than acceptable mating outcome, the bull will be assessed by a veterinarian chosen by Landfall and if the bull is found to be the cause of the infertility then Landfall will offer compensation in the form of:

### FIRST YEAR (12 month period from date of purchase)

100% of the purchase price in the form of:

- Replacement with an equivalent bull to the mutual agreement of both the vendor and purchaser.
- Credit for use with further purchases.

### SECOND YEAR (12 to 24 month period after purchase date)

50% of the purchase price in the form of:

- Credit for use with further purchases.

In the event that one of the above credits is issued it must be used within 12 months of the issue date or it will be forfeited. If a credit is issued it is non-transferable.

(The original purchaser of the bull is the only eligible party to claim a credit).

The infertile bull is then to be slaughtered with proceeds of the sale to be paid to Landfall. Landfall will cover the veterinary expenses and transport costs of the bull to an abattoir.

**Landfall will not be held liable and does not offer compensation for loss of income in the event of infertility resulting in non pregnant females.**

# The Obligation of the Purchaser

**The Landfall Guarantee is not a replacement for sound management practices. The guarantee is provided to cover the performance of the bull where breeding cows are managed to recognised industry standards. The purchaser of the bull is expected to observe joining, monitor for later cycling and record any repeat cycling in the females. If any problems arise it is expected that the purchaser notifies Landfall within 3 months, after the end of the joining period.**

At Landfall we recognise there is an infertility risk involved in breeding herds. We breed our bulls so as to limit the financial and production risks involved. If for any reason there are any unexpected

outcomes with Landfall bulls we stand by our product and do not expect you the producer to have to bear the entire financial burden. If you have a problem we want to be the first to know about it. We

have confidence in our bulls and offer a commitment to our clients that our product and service is of the highest quality achievable. Your success is ultimately our success.

## **FREIGHT**

- Free sea freight to Melbourne, Grassy and Lady Barron on all bulls sold at auction
- Free freight within mainland Tasmania on the condition that all bulls sold by auction be delivered within one week of purchase

## A LITTLE BACKGROUND TO LANDFALL FARM FRESH...

Landfall Farm Fresh is our specialist butcher and fresh food business in Launceston. We provide our very own Landfall Angus Beef and Prime Lamb direct from our farm to our loyal and wide-ranging customers.

Our fully integrated, true paddock to plate supply chain, delivers a transparent and trusted red meat choice. Customers appreciate knowing the provenance, story and integrity of our free range and grass-fed beef and lamb. We credit this largely to the success of our primary production business and the work and dedication of previous generations. Our grandfather, Robbie Archer, always held the vision of opening a butcher shop – so today his dream lives on!

We strive to build positive relationships with our customers and create positive eating experiences. We are passionate and proud to provide locally grown, consistent premium quality produce, and exceptional customer service.

We welcome you to visit us in store Wednesday to Saturday at 49 Balfour Street Launceston, and to follow us on Facebook and Instagram.

# What's so good about dry-aged beef?

In essence, dry aging is when you take a piece of meat and put it into a controlled open-air environment to go through a flavour transformation. By exposing the meat to air, moisture is pulled out and the natural enzymes in the beef break the muscles down slowly over time, making it more tender. When the surface of the beef dries, it creates a crust over the muscle, but what's inside stays moist and red.

Pictured: Dry aged Landfall Angus scotch fillet steaks

### How does dry aging work?

The truth is all meat benefits from some amount of aging. Most of the beef we consume has been wet aged – a process where the meat has been sealed in a bag to retain its moisture. The chemical transformation that happens to beef occurs regardless of whether the meat is left outside of a bag to dry age or inside a vacuum-sealed bag to wet age. The difference comes in the flavour.

### When you dry age beef, two things happen:

1. Moisture is pulled out of the meat. The fat portion retains more water than the lean portion, causing the lean muscle to shrink around the fat; the fat becomes more pronounced, thus giving the beef more flavour.
2. Bacteria formed in the aging process produces a robust flavour profile that is highly desirable.

### How does dry aged beef not spoil?

The key to dry aging is consistency – controlling the decomposition so that the meat ages, not rots. It all

comes down to three key factors: air flow to help form a crust, humidity control to slow down the migration of moisture and keep natural juices from running out, and temperature control to stop the meat from spoiling.

The meat is also protected by the bones and fat which is why, if you're dry aging at home, it's important to choose high quality large cuts with the bones still in. Once the aging process is completed, the dried-out layers around the exterior are cut away, leaving you with a beautifully aged, edible dark-red piece of meat.

### Is dry aged beef really better than the alternatives?

Those who enjoy meat are really starting to better understand the benefits of dry aged beef. When you first open up a packet of dry aged beef, you'll probably notice a distinctively intense, rich smell. Once cooked, the molecules inside the beef begin to wake up with heat and that smell wafts up to our noses and senses. This is where dry aging takes a step beyond cooking just a regular steak.

## Whole roasted scotch fillet with crispy potatoes

🕒 Prep Time: 20mins 🍳 Cooking Time: 1hr 20mins 🍽️ Serves: 8

### Method

**Step 1** Preheat oven to 200°C/400°F. Line two shallow medium baking dishes with baking paper.

**Step 2** Scrub beetroot; place in one dish. Place potatoes and garlic in second dish. Drizzle beetroot and potatoes with 1 tablespoon of oil each; toss to coat. Roast 20 minutes.

**Step 3** Meanwhile, tie kitchen string around beef at 3cm (1¼-inch) intervals. Heat 1 tablespoon of the remaining oil in a large frying pan over high heat; cook beef, turning, until browned all over. Season; scatter with herbs.

**Step 4** After 20 minutes of potato cooking time, remove garlic from dish. Place beef on potatoes; return to oven, cook with vegetables for further 40 minutes or until beef is done as desired. Transfer beef to a tray; cover, stand 10 minutes. Cover vegetables to keep warm.

**Step 5** Heat remaining oil in a wok or large frying pan over high heat; cook spinach 1 minute or until wilted. Season to taste.

**Step 6** Serve slices of beef with potatoes, beetroot, spinach and sauce of your choice.

### Ingredients

- 1.5 kilogram baby beetroot, trimmed
- 1 kilogram baby new potatoes
- 1/3 cup olive oil
- 1.5 kilogram beef scotch fillet
- 2 tablespoon fresh rosemary leaves
- 1 tablespoon fresh thyme leaves
- 500 gram baby spinach

# 2021 Autumn Round Up

Frank Archer, Jo Moore, Alec Moore and Tom French of Weeran Angus, bought the top-priced bull (Landfall New Ground Q494) as part of a seedstock syndicate comprising Weeran Angus in Victoria, Mandayen and Bull Oak Well in South Australia.

It has been another difficult year for everyone navigating the Covid restrictions. Despite the uncertainty of interstate travel our Autumn sale fell whilst bans were lifted. We were thrilled to see many of our mainland and local clients being with us on property.

Your assistance in using the 'Check In Tas' App at future sales would be appreciated (see page 106). Of course, our team will be able to assist if necessary.

Thanks again to Warren Johnston and the Nutrien team together with AuctionsPlus representative, Ben Hooper, who was again kept busy.

# Cowboy Life – Rodeos, Riding and Roping

**Wade was born in 1977 to a horse breeding and rodeo family where he learnt to ride horses and rope at an early age.**

He did all the other normal things for a kid growing up, playing football, cricket, riding BMX but he always just wanted to be a cowboy, with a passion for all things related to horses and rodeo.

It wasn't until Wade was 13, when his parents purchased a small property in the Flinders Ranges, that he got on his first bull. His parents really wanted him to stay down the roping end of the arena but the thrill of riding bulls had him hooked. Wade was very fortunate, having Australia's best to teach him, Scott and Danny

A selection of Wade's rodeo buckles mounted on 4R Bar Leather work.

Fraser whose father owned a rodeo company. Nearly every weekend it was up to the practice pen to get on some roughstock.

Bull riding became his number one focus. Wade still played football through winter to keep fit winning a couple of premierships with the BMW football team but gave away cricket, as rodeo was his new summer sport.

At the age of 14 he commenced competitive rodeo, making the National finals in the junior steer ride and the next year winning the second division bull ride title in South Australia, whilst breaking into the pro ranks the same year. Rodeo didn't pay that well back then, so straight out of high school Wade worked at General Motors Holden on the production line. Working inside a factory wasn't for Wade, he loved the farm life. A good friend introduced him to a family in

America who had their own rodeo company and took bulls to the Professional Bull Riders (PBR), so off to America he went for the first time, not knowing anyone at all. All Wade knew when he reached Dallas was someone was going to be there to pick him up to take him on a short drive out of Dallas to the 44 Bar Ranch in Oklahoma.

He really started to fall in love with the cowboy lifestyle in Oklahoma. The appeal of all cattle work being done on horseback, and seeing the benefits of having good bloodlines dating back to the 50's, allowing for the breeding of good buckers, was a great opportunity for Wade. After his first three month stint in the States he came home hitting the rodeo road, hoping to win enough money to get him back over there. While home he organised a work visa, won enough money and headed back over for a year.

It was a great year, getting to travel, seeing 20 odd states in America, but unfortunately was sidelined with an injury for six months. Once again Wade came home, working on farms including Stanbroke Beef, while at the same time moving to areas where rodeos were held. Wade competed at the International Invitational rodeo twice, held at the Rod Laver arena in Melbourne, coming 3rd the first time and winning the event the 2nd time.

Wade went back another three times to America. After his fifth trip, while visiting his parents he met a girl call Jennifer. Jennifer and Wade got engaged, moved to Tasmania onto a dairy farm where their two children were born. Their next move was back to South Australia to Mayura Station, breeders of wagyu. It was there

that Wade had the opportunity to learn a lot about AI, more about bloodlines, rotational feeding and feed lots before going back to his roots, breaking in horses.

The family moved back to Tasmania for family reasons with Wade taking a factory job until a position with Ed Archer at Greenhythe became available, where a number of Landfall's mature females are run. While at Landfall Wade was still riding bulls, but he decided to hang his spurs up after winning his fourth State title at the age of 42. His spare time now is getting his boys into riding and working on his leatherworks business, 4R Bar Leather.

Wade's dream is to one day have his own property where he can commence a breeding program for rodeo cattle.

*“My dream is to breed rodeo cattle on my own property while working on my leatherworks business – 4R Bar Leather”*

Wade & Jennifer with 'Garth Brooks' on their wedding day. Painthorse - Garth Brooks – trained by Wade's Mum is in the Painthorse Hall of Fame at Dubbo for his accomplishments.

Wade riding Ron Woodall's bull, 'Coffee Break'.
