# Welcome

We invite you to attend our 20th Annual Spring on property auction and are pleased to offer you 137 performance recorded two-year-old and 157 yearling bulls.

The main sire lines represented in this offering are Te Mania Pheasantry P1479, Landfall New Ground N90, Rennylea L519, Landfall Q6, Landfall P145, Chiltern Park Moe and Lawsons Momentous M518.

Once again, we feel this group of sale bulls brings to the fore the Landfall philosophy of producing genetics that work across varying environments. These bulls are the result of a breeding program and production system that ensures the accurate identification of outlier animals so we can make informed decisions on which animals to move forward with and which ones to move away from. Put simply, our breeding objectives in order of priority are fertility, function, performance and eye appeal.

The beef industry has seen a shift in proceedings over the last 6 months, coming off record high

prices and record low interest rates. The economic environment that we are experiencing now makes it even more important to focus on gains that can be made in your business through increased productivity.

We are proud to support Rural Alive and Well and the Blue Tree Project. These organisations both raise awareness for and provide community support for mental health. Landfall now has its own Blue Tree in a prominent position along the East Tamar Highway. We will also support Rural Alive and Well by donating the proceeds from the last bull sold in this sale to them. See the features in the back of the catalogue.

Relationships are the key to not only a successful business but also a fulfilled life. We strive to develop and maintain quality relationships with high integrity. Honest and direct feedback about our product and service

delivery is appreciated as it helps us to build a stronger business, to better deliver on our value proposition.

We would like to take this opportunity to thank all the Landfall staff, family members and associates for their valuable contribution to our program. The commitment and dedication of these people is vital to our success. We would also like to thank you, our clients for your continued support of the Landfall program. We appreciate each one of you for the role you play in making Landfall Angus what it is.

We welcome inspection of the offering and the wider Landfall herd anytime in the lead up to the sale.

Kind Regards,

**The Archer Family.**

# About Landfall Angus

Landfall Angus is a family owned and operated business located in the Tamar Valley in Northern Tasmania. Our cow herd consists of over 2500 registered females, making Landfall one of the largest Angus Seedstock herds in Australia.

Landfall Angus cattle perform well in the natural environments of Australia, a direct result of our strong focus on the commercial realities of beef production. The Landfall Angus cow herd is fertile, functional and high performing. Careful genetic selection and improved production management techniques ensure that Landfall is a leading Seedstock herd and producer of Angus genetics in Australia.

## HISTORY

Landfall Angus was established in 1948 with the purchase of twelve females from the Australian mainland. The original Landfall cows were selected for their large frame and femininity. Sires from “Naranghi” in New South Wales, at that time bred by Mr. John Bott, were consistently breeding progeny that excelled in fertility and growth. They complimented the Landfall cows very well and these sires were used for 20 years.

In the early years of breeding bulls a small number were sold privately to regular Tasmanian and King Island clients. From 1975 an annual auction has been held offering bulls and females. In 2004 a spring sale was introduced and is held annually on property offering bulls.

*We supply our clients with high quality Angus genetics that are fertile, structurally sound, easy doing and low maintenance without compromising the importance of growth and carcass performance.*

## TODAY

Landfall Angus is today owned and managed by the fourth and fifth generation of the Archer family. The Landfall herd now consists of over 5000 registered animals running over two main production centres in the Tamar Valley, calving in excess of 2500 registered females. The Angus herd is run alongside a self-replacing flock of composite sheep.

The Landfall herd is run under commercial conditions, in large contemporary groups. Artificial insemination and embryo transplant are used to increase the rate of genetic gain in our herd. Strict criteria is used for the selection of sires and dams within our breeding programs.

A strong emphasis is placed on the traits that contribute positively to the commercial profitability and sustainability of beef production. Firstly we aim to breed a functional female, focussing on structural soundness, docility, fertility and calving ease. Animals are joined for restricted periods resulting in short calving periods. Any animal not meeting the criteria is culled. The focus then moves towards growth and carcass quality with targets set above breed average whilst avoiding extremes. All registered animals are performance recorded with Breedplan and Landfall has been a member of Angus Breedplan since its inception in the early 1980's. Data is collected from animals run in large groups allowing us to directly compare genetics without the impact of environmental differentiation.

Annual sales are held on property in the Autumn and Spring, along with paddock sales throughout the year.

## OUR GOALS AT LANDFALL ARE:

1. To provide our clients with superior genetics to help them achieve a sound investment and help to improve their bottom-line.
2. To produce genetics which perform well under the natural environments of Australia.
3. To have relationships of high integrity with our clients.

# Sale Notes

## 1. Location

8 kilometres from the centre of Launceston, North on East Tamar Highway. Follow A8 towards Georgetown. See page 119 for map and travel information.

## 2. Rebates

4% rebate commission offered on all bulls to agents settling within 7 days of invoice. All purchasers must nominate their agent 24hrs prior to the sale with Nutrien Livestock. Please email [livestocktas@nutrien.com.au](mailto:livestocktas@nutrien.com.au) or [frank@landfall.com.au](mailto:frank@landfall.com.au)

## 3. Freight

Free freight on all bulls to Melbourne, Grassy and Lady Barron ports for lots sold by auction. Free freight on all bulls within mainland Tasmania. The vendor or his agent will make freight arrangements (conditions apply).

## 4. Nutrition

All bulls have been fed grass with supplement silage.

## 5. Animal Health

- All bulls have been semen tested and had their penis and testicles examined.
- All bulls have been tested as BVD P.I. negative.
- All bulls have been vaccinated with Vibrovax, Pestigard and Ultravac 7 in 1.

## 6. Recessive Genetic Conditions

All lots are clearly marked with their respective genetic status.

## 7. Bull Guarantee

All bulls covered by the Landfall Bull Guarantee (see details on page 108 of this catalogue).

## 8. Joining Sires

Lots 1 to 56 have been used for joining in the Landfall herd in the Spring of 2022. Please take this into account when assessing these bulls.

## 9. Semen Rights

Landfall Angus reserves the right to collect any bull sold for use in the Landfall herd. Collection will be at Landfall's expense and at the convenience of the purchaser.

## 10. Photos and Videos

Ben Hooper from Clear Vision Imaging has captured videos of all sale lots. They will be available Mid-August onwards at [www.landfall.com.au](http://www.landfall.com.au)

## 11. TACE EBV's

TACE EBV's are used throughout this catalogue. In moving to a new herd recording software we have had the usual transition challenges. A user error has resulted in some of the yearling bulls missing some analysed traits. This was only identified during the compilation of this catalogue. We have now rectified this issue, therefore for updated EBV's please refer to the August analysis.

## 11. Registrations

Please note: some lots are HBR registered and some are APR registered. All animals are eligible for transfer with their respective registration status.

## 12. Inspection

All bulls will be available for inspection prior to the sale by appointment, please ring:

**Frank Archer** - 0417 506 163  
**Ed Archer** - 0417 337 144

### PLEASE NOTE:

As vendors, the Archer family at Landfall want your valuable new purchase to be given every opportunity to travel and settle into their new environment with a minimum of stress.

To this end we ask you to nominate;

### CLEAR DELIVERY INSTRUCTIONS.

Short notice requests for collection of animals will not be accepted.

Images and videos of most lots will be available on our website closer to sale date.

**Thank you for your co-operation.**

### DNA SUFFIX KEY:

The suffix displayed at the end of each animal's name indicates the DNA parentage verification that has been conducted by Angus Australia.

**PV:** both parents have been verified by DNA.

**SV:** the sire has been verified by DNA.

**DV:** the dam has been verified by DNA.

**#:** DNA verification has not been conducted.

**E:** DNA verification has identified that the sire and/or dam may possibly be incorrect, but this cannot be confirmed conclusively.

**DISCLAIMER:** Animal details included in this catalogue, including but not limited to pedigree, DNA information, Estimated Breeding Values (EBVs) and Index values, are based on information provided by the breeder or owner of the animal. Whilst all reasonable care has been taken to ensure that the information provided in this catalogue was correct at the time of publication, neither the vendor, Angus Australia or the selling agents assume any responsibility for the accuracy or completeness of the information, nor for the outcome (including consequential loss) of any action taken based on this information.

**Notes**

A sire that has created plenty of interest throughout 2023 with sons topping sales at three seedstock sales in the Autumn, with the highlight being Landfall Signature S1755 selling to Dunoon Angus for \$240,000. Pheasantry was used for his ability to rapidly increase our genetic merit for carcass quality with him being in the top 4% of the breed for EMA and the top 1% for IMF. He has achieved this whilst maintaining a functional and attractive phenotype. The areas we have identified that Pheasantry needs protection is growth and carcass weight, hence we have endeavoured to join him to our more powerful females. His first drop of daughters are calving now and we look forward to seeing how they develop with calves by their side.

**Notes**

New Ground is one of the most heavily used and consistent sires in the Angus breed over the last two years. We often receive feedback from both seedstock and commercial producers with how impressed they are with their New Ground progeny. We have many New Ground daughters in the Landfall herd, and they continue to impress us with their phenotype, performance, ease of doing ability and functionality. New Ground is a sire that breeds quality daughters and sons with their quiet temperament being a standout. Three full sisters of New Ground have been in the donor team now for several years so along with our heavy use of New Ground himself we are set to see this pedigree have a significant impact on the Landfall herd for years to come.

**Notes**

L519 is another sire that offers consistency in phenotype, function and docility. His progeny can tend to be larger frame with plenty of length and growth. He possesses a performance package that offers balance across the key production traits. Best used over a moderate type of female we have many L519 daughters in the Landfall herd who are offering plenty of value to our breeding program.

**Notes**

The first of the New Ground sons that we selected to use more widely in our artificial breeding programs as he offers a more moderate mature weight than his sire along with improved IMF. He was sold to Rennylea Angus and McRae Pastoral from our Autumn 2021 sale offering after being used in the Landfall herd as a yearling for natural mating. When last inspected he impressed us with his balanced phenotype, quiet nature and structural soundness.

**Notes**

The top selling bull from the Landfall Autumn Sale in 2020 to Absolute Angus in Victoria. A moderate frame bull with length, depth and width. He stands on a sound set of feet and legs and moves freely. His progeny are moderately framed with terrific length of body. We have several of his daughters calving now with good results.

# Stud stock insurance with all bulls purchased at the Landfall Angus Spring Sale

For all bulls sold in this catalogue, specialist agricultural insurer Achmea Australia will provide 2 Star Mortality cover for three months (including accidental loss of use). This cover has been paid for by Landfall Angus.

At the end of the three months, if you would like to purchase cover, please contact our Farm Insurance Specialists who are attending the sale:  
**Michelle Stevens (0437 249 682) and Mark Gaetani (0408 915 441)**

### Our flexible options include:

- ☆ **1 Star** Mortality only (including transit)
- ☆☆ **2 Star** Mortality including accidental loss of use
- ☆☆☆ **3 Star** Mortality including accidental loss of use, sickness and disease.

**Request an appointment with us today:**

# Caring For Your Bulls

## More calves, more years

Your bull is an important investment. With proper management you can achieve a longer working life from your bull resulting in more calves at a reduced cost per calf.

### 1. Arrival on farm

- a. Have some quiet cows or steers in the yard when the bull arrives. He will often be unsettled as he has left his mates and travelled on a truck for his first time. Give him some time to adapt to his new surroundings.

### 2. Pre-Joining

- a. Your new bulls will benefit from exposure to some empty cows for 2-3 weeks prior to their normal breeding period. This exposure will allow them to service some females and become exposed to any of the normal pathogens in your cow herd. If you have purchased multiple bulls, expose them only two at a time. It is then important to give your bull time to recover following the exposure period before the joining season begins.
- b. Do a pre-joining Breeding Soundness Examination (BSE) on all bulls to evaluate; structure, testicles and serving capability. This is the opportunity to identify any bull which may delay cows going in calf. Also administer booster vaccinations.

### 3. Joining

- a. Don't over join new bulls (maximum of 40 cows).
- b. Multi-sire join where possible to minimize the risks associated with a bull breaking down in the joining period. If you need to single sire join observe closely and rotate with a proven bull for at least 1 cycle. New bulls are the most at risk of break down, ensure you check them regularly.
- c. Most bull fertility issues develop during the joining period rather than being pre-existing problems. This means regular checking of bulls is essential (2-3 times a week for the first 3 weeks then weekly).

Check for:

- Try to observe the bull serving (mounting is not a successful serve)
- Any signs for lameness
- Evidence of penile or preputial swelling
- Any signs of ill health (lethargic, etc)
- Number of cows cycling (5% cycling per day if not in calf, this should decrease as cows conceive)

### 4. Post Joining

- a. Your bulls will spend most of their life in the bull paddock. You need to try minimize bull paddock injuries (bull fights) by not overcrowding the paddocks and possibly removing aggressive dominant bulls. Ensure young bulls have access to adequate feed to continue growing. Mature bulls should not be allowed to get fat, keep them in condition score 3. Mature bulls kept in body condition score 3 will have a longer working life.
- b. Pregnancy test early to identify any joining issues. This early pregnancy test will not only give you more time to make better decisions but it will also help identify the potential case of sub-fertility and allow you to prevent the problem in subsequent years.

# Understanding the TransTasman Angus Cattle Evaluation (TACE)

## WHAT IS THE TRANSTASMAN ANGUS CATTLE EVALUATION?

The TransTasman Angus Cattle Evaluation is the genetic evaluation program adopted by Angus Australia for Angus and Angus influenced beef cattle. The TransTasman Angus Cattle Evaluation uses Best Linear Unbiased Prediction (BLUP) technology to produce Estimated Breeding Values (EBVs) of recorded cattle for a range of important production traits (e.g. weight, carcass, fertility).

The TransTasman Angus Cattle Evaluation is an international genetic evaluation and includes pedigree, performance and genomic information from the Angus Australia and Angus New Zealand databases, along with selected information from the American and Canadian Angus Associations.

The TransTasman Angus Cattle Evaluation utilises a range of genetic evaluation software, including the internationally recognised BLUPF90 family of programs, and BREEDPLAN® beef genetic evaluation analytical software, as developed by the Animal Genetics and Breeding Unit (AGBU), a joint institute of NSW Agriculture and the University of New England, and Meat and Livestock Australia Limited (MLA).

## WHAT IS AN EBV?

An animal's breeding value can be defined as its genetic merit for each trait. While it is not possible to determine an animal's true breeding value, it is possible to estimate it. These estimates of an animal's true breeding value are called EBVs (Estimated Breeding Values).

EBVs are expressed as the difference between an individual animal's genetics and a historical genetic level (i.e. group of animals) within the TACE genetic evaluation, and are reported in the units in which the measurements are taken.

## USING EBVS TO COMPARE THE GENETICS OF TWO ANIMALS

TACE EBVs can be used to estimate the expected difference in the genetics of two animals, with the expected difference equating to half the difference in the EBVs of the animals, all other things being equal (e.g. they are joined to the same animal/s).

For example, a bull with a 200 Day Growth EBV of +60 would be expected to produce progeny that are, on average, 10 kg heavier at 200 days of age than a bull with a 200 Day Growth EBV of +40 kg (i.e. 20 kg

difference between the sire's EBVs, then halved as the sire only contributes half the genetics).

Or similarly, a bull with an IMF EBV of +3.0 would be expected to produce progeny with on average, 1% more intramuscular fat in a 400 kg carcass than a bull with a IMF EBV of +1.0 (i.e. 2% difference between the sire's EBVs, then halved as the sire only contributes half the genetics).

## USING EBVS TO BENCHMARK AN ANIMAL'S GENETICS WITH THE BREED

EBVs can also be used to benchmark an animal's genetics relative to the genetics of other Angus or Angus infused animals in Australia.

To benchmark an animal's genetics relative to other Angus animals, an animal's EBV can be compared to the EBV reference tables, which provide:

- the breed average EBV
- the percentile bands table

The current breed average EBV is listed on the bottom of each page in this publication, while the current EBV reference tables are included at the end of these introductory notes. For easy reference, the percentile band in which an animal's EBV ranks is also published in association with the EBV.

## CONSIDERING ACCURACY

An accuracy value is published with each EBV, and is usually displayed as a percentage value immediately below the EBV.

The accuracy value provides an indication of the reliability of the EBV in estimating the animal's genetics (or true breeding value), and is an indication of the amount of information that has been used in the calculation of the EBV.

EBVs with accuracy values below 50% should be considered as preliminary or of low accuracy, 50-74% as of medium accuracy, 75-90% of medium to high accuracy, and 90% or greater as high accuracy.

## DESCRIPTION OF TACE EBVS

EBVs are calculated for a range of traits within TACE, covering calving ease, growth, fertility, maternal performance, carcass merit, feed efficiency and structural soundness. A description of each EBV included in this publication is provided on the following page.

## UNDERSTANDING ESTIMATED BREEDING VALUES (EBVs)

### BIRTH

CEDir	%	Genetic differences in the ability of a sire's calves to be born unassisted from 2 year old heifers.	Higher EBVs indicate fewer calving difficulties in 2 year old heifers.
CEDtrs	%	Genetic differences in the ability of a sire's daughters to calve unassisted at 2 years of age.	Higher EBVs indicate fewer calving difficulties in 2 year old heifers.
GL	days	Genetic differences between animals in the length of time from the date of conception to the birth of the calf.	Lower EBVs indicate shorter gestation length.
BW	kg	Genetic differences between animals in calf weight at birth.	Lower EBVs indicate lighter birth weight.

### GROWTH

200 Day	kg	Genetic differences between animals in live weight at 200 days of age due to genetics for growth.	Higher EBVs indicate heavier live weight.
400 Day	kg	Genetic differences between animals in live weight at 400 days of age.	Higher EBVs indicate heavier live weight.
600 Day	kg	Genetic differences between animals in live weight at 600 days of age.	Higher EBVs indicate heavier live weight.
MCW	kg	Genetic differences between animals in live weight of cows at 5 years of age.	Higher EBVs indicate heavier mature weight.
Milk	kg	Genetic differences between animals in live weight at 200 days of age due to the maternal contribution of its dam.	Higher EBVs indicate heavier live weight.

### FERTILITY

DtC	days	Genetic differences between animals in the time from the start of the joining period (i.e. when the female is introduced to a bull) until subsequent calving.	Lower EBVs indicate shorter time to calving.
SS	cm	Genetic differences between animals in scrotal circumference at 400 days of age.	Higher EBVs indicate larger scrotal circumference.

### CARCASE

CWT	kg	Genetic differences between animals in hot standard carcase weight at 750 days of age.	Higher EBVs indicate heavier carcase weight.
EMA	cm <sup>2</sup>	Genetic differences between animals in eye muscle area at the 12/13th rib site in a 400 kg carcase.	Higher EBVs indicate larger eye muscle area.
Rib Fat	mm	Genetic differences between animals in fat depth at the 12/13th rib site in a 400 kg carcase.	Higher EBVs indicate more fat.
P8 Fat	mm	Genetic differences between animals in fat depth at the P8 rump site in a 400 kg carcase.	Higher EBVs indicate more fat.
RBV	%	Genetic differences between animals in boned out saleable meat from a 400 kg carcase.	Higher EBVs indicate higher yield.
IMF	%	Genetic differences between animals in intramuscular fat (marbling) at the 12/13th rib site in a 400 kg carcase.	Higher EBVs indicate more intramuscular fat.

### OTHER

NFI-F	kg/day	Genetic differences between animals in feed intake at a standard weight and rate of weight gain when animals are in a feedlot finishing phase.	Lower EBVs indicate more feed efficiency.
Doc	%	Genetic differences between animals in temperament.	Higher EBVs indicate better temperament.

### STRUCTURE

Foot Angle	score	Genetic differences in foot angle (strength of pastern, depth of heel).	Lower EBVs indicate more desirable foot angle.
Claw Set	score	Genetic differences in claw set structure (shape and evenness of claws).	Lower EBVs indicate more desirable claw structure.

### SELECTION INDEXES

\$A	\$	Genetic differences between animals in net profitability per cow joined in a typical commercial self replacing herd using Angus bulls. This selection index is not specific to a particular production system or market end-point, but identifies animals that will improve overall profitability in the majority of commercial grass and grain finishing beef production systems.	Higher selection index values indicate greater profitability.
\$D	\$	Genetic differences between animals in net profitability per cow joined in a commercial self replacing herd targeting the \$D supermarket trade.	Higher selection index values indicate greater profitability.
\$GN	\$	Genetic differences between animals in net profitability per cow joined in a commercial self replacing herd targeting pasture grown steers with a 250 day feedlot finishing period for the grain fed high quality, highly marbled markets.	Higher selection index values indicate greater profitability.
\$GS	\$	Genetic differences between animals in net profitability per cow joined in a commercial self replacing herd targeting pasture finished steers.	Higher selection index values indicate greater profitability.

# Bull Guarantee

At Landfall we understand and value the economic importance of fertility within a beef herd. Empty cows are a huge cost to a producer and at Landfall we are doing our utmost to limit the unexpected outcomes in a breeding situation.

In an endeavour to provide our clients with a professional service, we have implemented this bull guarantee. It is to ensure that both Landfall and you (our valued client) have a clear understanding of each others obligations.

Our breeding bulls are assessed under a stringent set of guidelines to ensure minimal exposure of our clients to fertility issues.

- ✓ All bulls are structurally assessed and those that don't meet the specifications are culled.
- ✓ All bulls are semen tested and have their penis checked by an independent veterinarian.

At Landfall we are aware that even after these stringent tests are carried out that there is a risk that a breeding bull may still not work to their expected potential. Therefore our guarantee covers that risk; however it does not replace good management and due care by the purchaser.

## GUIDELINES

Landfall guarantees breeding bulls from the date of purchase against loss of fertility due to structural failure of the bull for a period of two years. For example, corkscrew penis or bad feet. Our guarantee does not cover situations such as broken penises, prolapsed prepuce and broken legs etc.

In the event of a less than acceptable mating outcome, the bull will be assessed by a veterinarian chosen by Landfall and if the bull is found to be the cause of the infertility then Landfall will offer compensation in the form of:

### FIRST YEAR (12 month period from date of purchase)

100% of the purchase price in the form of:

- Replacement with an equivalent bull to the mutual agreement of both the vendor and purchaser.
- Credit for use with further purchases.

### SECOND YEAR (12 to 24 month period after purchase date)

50% of the purchase price in the form of:

- Credit for use with further purchases.

In the event that one of the above credits is issued it must be used within 12 months of the issue date or it will be forfeited. If a credit is issued it is non-transferable.

(The original purchaser of the bull is the only eligible party to claim a credit).

The infertile bull is then to be slaughtered with proceeds of the sale to be paid to Landfall. Landfall will cover the veterinary expenses and transport costs of the bull to an abattoir.

**Landfall will not be held liable and does not offer compensation for loss of income in the event of infertility resulting in non pregnant females.**

# The Obligation of the Purchaser

The Landfall Guarantee is not a replacement for sound management practices. The guarantee is provided to cover the performance of the bull where breeding cows are managed to recognised industry standards. The purchaser of the bull is expected to observe joining, monitor for later cycling and record any repeat cycling in the females. If any problems arise it is expected that the purchaser notifies Landfall within 3 months, after the end of the joining period.

At Landfall we recognise there is an infertility risk involved in breeding herds. We breed our bulls so as to limit the financial and production risks involved. If for any reason there are any unexpected

outcomes with Landfall bulls we stand by our product and do not expect you the producer to have to bear the entire financial burden. If you have a problem we want to be the first to know about it. We

have confidence in our bulls and offer a commitment to our clients that our product and service is of the highest quality achievable. Your success is ultimately our success.

## **FREIGHT**

- Free sea freight to Melbourne, Grassy and Lady Barron on all bulls sold at auction
- Free freight within mainland Tasmania on the condition that all bulls sold by auction be delivered within one week of purchase

# Vale Heather May Archer

1922 - 2023

Nanny's tribe celebrating her life at Landfall on the 10th of July, 2023.

## On the 13th of June the Archer Family and Landfall lost Heather May Archer (Nanny) after 101 fabulous years.

Heather was born to parents Bruce and May Scott on the 8th of March 1922. She was a fifth-generation member of the family to reside at "Woodside" at Hagley in Tasmania.

After her schooling, she attended kindergarten teacher training. Heather worked in this role at Methodist Ladies College in Launceston and other various kindergartens.

Heather married Rob Archer in 1949 and they went on to have 7 children, 6 daughters and one son, Gerald. She was a much-loved mother to her 7 children and their spouses along with 23 grandchildren and a whopping 48 great grandchildren. Heather spent many of her early years at Landfall busy being the mother of her family. She was a great support person for Rob as the

farmer's wife. She was a great cook, extending her hospitality to many generously.

As their children became young adults and more independent, Heather travelled with Rob to Scotland and New Zealand for Angus world forums and to visit breeders from whom they imported genetics for use in the Landfall herd. Unfortunately, Rob passed away in 1983 when Heather was just 61 years old. She stayed at Landfall for a further 13 years before moving to her home in Launceston.

Heather will be remembered for many things. Most significantly, her love of sport, music and photography. She was also well known for her competitive spirit. Many people have wonderful memories of playing tennis at Landfall. She played tennis until the ripe old age of 92.

On the 10th of July our family sent Nanny off with a fitting memorial at Landfall. It was a wonderful reflection of her dedication to family with her tribe of just over 100 people being present.

Heather wrote her own eulogy before passing and we would like to share with you some of her advice, how to live a long and wonderful life.

*"Never stop running while there is petrol in the tank."*

*"You don't stop laughing because you grow old, you grow old because you stop laughing."*

*"Exercise when you can. Gym is in fashion, but better if you walk in the fresh air."*

*"Socialise often with friends and relatives, make new friends, it is not too late".*

*"Learn something new every day".*

*"Above all, do everything in moderation and keep yourselves busy".*

Nanny, thank you for the positive contribution you made to all our lives. Rest in peace, you will be deeply missed by all of us.

# What is the Blue Tree Project?

The mission of the Project is to help spark difficult conversations and encourage people to speak up when times are tough.

By spreading the paint and spreading the message that "it's OK to not be OK", we can help break down stigma attached to mental health and encourage people to talk.

## ***Promoting conversation, one blue tree at a time.***

The project's inception was in WA, after a young man took his own life in 2018. Sadly this story is by no means unique, but the legacy of the many passed remains.

The Blue Tree Project has flourished as a charity, supporting the way we talk about mental health. The blue trees dotted across Australia and other parts of the world act as beacons of hope and conversation starters.

The Tasmanian Arboricultural Organisation (TAO) received a generous grant from Responsible Wood, enabling the painting of two blue trees. Community support was unexpectedly overwhelming, with several businesses and individuals stepping forward to donate goods and services.

They were:

- **Responsible Wood** – overall project funding, including lunch for participants

- **Landfall Farm** – kindly supplied the first tree to be painted by TAO
- **Wattyl Paints** – 45 litres of paint – colour 'blue tree'
- **Direct Access & Equipment** – Elevated Work Platform Hire (cherry picker)
- **Island Vegetation** – project management
- **Trent O'Shea and Sammy Roberts** – professional arborists operating EWP and painting

There are currently 12 Blue trees in Tasmania including one on the Landfall property 8 kms North of Launceston on the East Tamar Highway. Tas Arboricultural Organisation is in negotiations with further landowners to secure permission to spread more blue paint and positive conversations, with professional arborists standing by to donate their time.

We always have options.

Butcher, Lindsay preparing scotch fillet steaks.

# WHY YOU SHOULD NEVER COOK A STEAK THAT HAS COME STRAIGHT OUT OF THE FRIDGE

Article taken directly from [www.steaksschool.com](http://www.steaksschool.com)

## A LITTLE BACKGROUND TO LANDFALL FARM FRESH...

Landfall Farm Fresh butcher was established in 2008 by the fifth generation Archer siblings. A family with an established reputation as one of Australia's leading Angus beef breeders and local farmers since 1876. Landfall Farm Fresh was a dream of their grandfather's and has become one of Launceston's finest butchers.

Healthy stock and sustainable farming practices have built the foundations for a butcher shop that provides consistent, quality produce.

Their animals are hand-picked from their very own farm in the Tamar Valley each week, and their gluten and preservative free smallgoods are all made by hand.

The traditional approach to butchering, the whole animal processing, and the dry-aging technique results in a unique eating experience. Experience the passion, pride, and integrity of Landfall.

We welcome you to visit us in store Tuesday to Friday at 49 Balfour Street, Launceston, and to follow us on Facebook and Instagram.

49 Balfour St, Launceston  
[www.landfallfarmfresh.com.au](http://www.landfallfarmfresh.com.au)  
 (03) 6334 5751

It's pretty well known that you should rest your steak after cooking, but taking some time to prepare your meat is also all-important to cooking the perfect steak. Some even say that if this process is performed correctly and the steak is slow cooked or reverse seared, that resting afterward isn't even necessary. And, if you're telling a steak lover they don't need to wait to hook into their freshly cooked or barbecued steak, they are hardly going to need an explanation. But here goes.

The quality of a cooked steak comes down to two things, the appropriate doneness or temperature that it's cooked to, and the cooking method used (i.e. grill, barbecue, sous vide, reverse sear, etc). So with steak temperature contributing to a big part of the steak's performance, it makes sense to give this appropriate attention.

### Why steak preparation and temperature go hand in hand

It's as simple as planning ahead and taking your steaks out of the fridge ahead of time.

Steaks cook from the outside in, meaning the outside of the steak will always cook faster than the middle. This is great for achieving a nice crust on the outside, but it means there's a high chance of overcooking while you're waiting for the inside to catch up. This is why testing

doneness should be done with a meat thermometer that can gauge the internal temperature of a steak. But it also explains why cooking a freezing cold steak often results in a bad outcome.

To avoid chucking a cold steak straight into the pan or the barbecue, letting your steaks warm up before you cook them is key. This is even more important if they've previously been frozen.

### How early to take them out of the fridge

To help get closer to the perfectly cooked steak, notable chefs and butchers from around Australia suggest taking your steaks out of the fridge up to an hour before you plan to cook. This should give them ample time to come to a temperature that will ensure a much more even cook.

Some say 30-40 minutes is more than enough. But the temperature of your room will play a part in this (i.e. an Australian summer may require much less time to warm your steaks).

### A common misconception

The goal here isn't to get your steaks to "room temperature", as we know that leaving meat out for extended periods of time can encourage bacteria growth resulting in food poisoning. Think of it more as taking the edge off and letting your steaks come to a more appropriate temperature for cooking evenly.

Managing Director Ellie Wheeler (nee Archer) showcasing our point of difference - whole animal butchering and waste minimisation.

## WHY YOU SHOULD ALWAYS REST YOUR STEAK AFTER COOKING

### Meat and heat

When you cook meat the protein in it sets. Generally, the softer it feels, the less cooked it is and vice versa. And cooking your steak to your liking is a skill that comes with time and a few overcooked dinners too.

### Does resting steak actually work?

If you cut straight into your beautiful piece of steak after cooking it, it kind of defeats the purpose. The reason it needs to rest is because the juices need time to redistribute. Otherwise, it will just flow away, leaving you with a brown, overcooked piece of meat.

Another important thing to know is the residual heat will continue to cook your steak after you've removed it from the grill or the pan. So, if your desired temperature is say 55°C/130°F, then it's best to remove the meat a few degrees south of this. It will come up to the desired temperature during the resting period, giving you a perfectly cooked steak.

### How long should you rest your beef?

It fully depends on the size of the cut of beef but as a guide, bigger roasts should rest for 10-20 minutes, and your steak should breathe for at least five minutes. But experiment with what works the best and you'll be cooking mouth-watering, juicy steaks in no time.

## FRENCH HANGER STEAK

Onglet à l'échalote

🕒 Prep Time: 10mins 🍳 Cooking Time: 15mins ✂ Serves: 2

### Ingredients

- 2 cuts of hanger steak (around 160-180g each)
- 2 to 4 large, sliced shallots
- 1 tbsp of chopped parsley
- 1 tbsp of grapeseed or vegetable oil
- 30g of unsalted butter, cut into small cubes (about 10g for cooking the meat and 20g for cooking the shallots)
- 50ml of red wine vinegar
- Salt and pepper to taste

### Method

1. Preheat your oven to 70°C. Prepare the meat by removing from the fridge earlier and seasoning it with salt and pepper just prior to cooking.
2. Add the oil and butter to the skillet or frying pan and bring to a high heat.
3. Add the steaks to the pan and sear for 2-3 minutes on each side, keeping the meat rare.
4. Remove the steaks from the pan and transfer them to a roasting pan or plate. Cover it with foil and keep it warm in the oven while you make the caramelised shallots.
5. Add the shallots to the same pan on a high heat and caramelize for 2 minutes, stirring continuously.
6. Add the red wine vinegar or wine to the pan and let it reduce on high for around 30 seconds. Turn the heat to low and stir through the rest of the butter.
7. Take out the steaks from the oven and pour any excess meat juices into the pan, incorporating gently into the shallot mix. Adjust the seasoning with salt and pepper to taste.
8. Rest steaks then cut into rough slices and serve on a bed of caramelised shallots, keeping some aside to garnish the top, along with chopped parsley.  
Bon appetite!

# AMANDA Not just a number cruncher

Amanda was born in Tasmania in 1981. The youngest of two daughters, she grew up in the family home where her mum still resides today.

Amanda & her handsome fur-child Beau

Amanda remembers her childhood fondly telling stories of the quiet cul-de-sac that she lived in, with a large reserve over the back fence. The reserve saw all the neighbours get together for many popular bonfire and firecracker nights. The cul-de-sac was constantly overrun by neighbourhood children riding their bikes, playing cricket and running through the reserve, and each other's houses and backyards until the streetlights came on.

Being a sporting family, specifically basketball and

Echo, fondly remembered as her 'silver lining'

netball, the young family would travel Australia with her parents representing the state in basketball. As a result, basketball and netball became a large part of her life and she grew up sharing this passion with her parents and her sister Mel, playing into her late teens.

Much to her parent's horror, horses began to be agisted in the reserve and a new chapter began in the girls lives as they gained a keen interest in horses. The family bought their first pony when she was 10. Amanda's dad would now be responsible for taking the lawn mower over to the reserve and mowing out arenas and helping to build cross country and show jumping courses. To this day horses continue to play a large role in their lives.

Amanda's dad was a Vietnam Veteran, who would become a butcher at Coles, where he worked for more than 40 years. Amanda remembers working alongside her dad, packing and wrapping in the meat room for many years. Jimmy had a knack for number crunching,

and Amanda soon followed in his footsteps as she began her career in the accounting industry.

Her mum was a kindergarten teacher for more than 35 years, and her sister Mel would follow in her footsteps in the early childhood sector, owning and operating a successful Childcare Centre for 28 years. Jimmy initially helped Mel run her business with his paper payroll and accounting systems. Eight years later he would retire from this role as Amanda introduced electronic accounting systems and she continued in that role for another 20 years.

Cardona Ski Field - NZ (my favourite ski field)

Amanda attended Prospect High School and Launceston College, before attending University of Tasmania, at the Launceston Campus. She completed her Bachelor of Commerce, with majors in accounting and business management, graduating with her name on the deans roll of excellence.

Initially working in an accounting firm, Amanda moved into industry accounting before turning her focus towards small business in 2008.

Amanda began working for both Landfall Angus and Landfall Farm Fresh in 2011, providing all aspects of the administration role. Over the past 12 years, she has seen both businesses continue to grow and develop into the enterprises that they are today. Working closely with the Archer Family, especially Frank and Ellie, Amanda has seen firsthand what hard work and long hours achieve. She is extremely grateful and honoured to be part of the team, especially considering many of those team members are not just work colleagues, but also good friends.

In 2002, touch football took over other sporting interests. At the commencement of the 2012 season Amanda was able to coerce several of the Landfall crew into playing mixed touch football successfully for many years. Tim Wheeler, the trophy collector and Ferghal Berry were the main stayers of the team.

In 2014 Amanda faced her toughest challenge, as she was diagnosed with secondary breast cancer, after only 4 years in remission. She recognises and appreciates the support shown by the Archer family and Landfall team during this time, which was second to none. This strong support would continue over the coming years, as she faced the loss of her dad in 2020 after a 5-year long battle with dementia. This support was not only offered in the workplace but extended

*"Amanda's dedication to her role at Landfall Farm Fresh can be highly commended. She continues to be an integral team member and has facilitated our streamline approach to navigating the retail world. With a smile on her face she turns-up and has never let a five cent pass by her diligent and accurate processes. Outside of work Amanda is a great friend and the sort of daughter we all want - her dedication to her parents and family life doesn't go unnoticed. We appreciate her knowledgeable and sound advice, along with her kind nature".*

—Ellie Wheeler & Mimi Churchill

to the family home with Mimi's caring OT guidance towards Jimmy's care.

Amanda has always had a love for the country life, as did the rest of her family. Mel and her husband Alan have a property at Carrick running a small herd of Angus cattle sired by Landfall bulls – a couple of them shamelessly known to the Landfall crew as 'Bevin and Magic'.

Ella, her 9-year-old niece is the apple of Amanda's eye. She loves the outdoors and is a fearless farm kid. Ella is a 'mini-me' with a passion for going fast, riding horses, snow skiing, playing basketball and her love of dogs. Amanda takes great pride in having taught her how to ride a pushbike, and they often pack the bikes and go for a ride together.

Amanda's fur child Beau, a handsome black Labrador is always by her side, except for when the 'bark bus' collects him to take him to doggy day care or his hydro-therapy sessions. One would say he is a totally pampered pooch.

Amanda enjoys travelling and looks forward to her annual snow skiing trip to New Zealand. After

a 4-year hiatus due to COVID, she is excited to finally be returning to their slopes in August this year.

In her free time Amanda spends as much time as possible exploring various parts of Tasmanian waters on the back of her Jetski. A local favourite is the Tamar and Esk rivers, where Amanda enjoys waving to staff who are working out on the farm at Landfall. She often slows down near Landfall and Greenhythe, proudly showing other riders where she works.

Another hobby is riding her motor bike, a Triumph Street Triple with a group of like-minded friends exploring the Tasmanian countryside. When time permits, she enjoys hiking in the wilderness, Dove Lake is a favourite spot to visit with friends.

Amanda is very family orientated, referring to her dad Jimmy as her hero, and her mum Wendy being 'the strongest person she has ever met'. She attributes her strength, compassion and 'do anything for anyone' attitude to them. Her life philosophy is to believe in yourself and to never, ever, give up.

# Autumn Sale 2023 Round Up

*Auctioneer Warren Johnston questioned Frank 'Are you sure you want to sell Lot 15 at \$240,000?'*

Chris Saunders, Russell Robinson, Jamie Roebuck & Andrew Robinson

Young budding cattle breeders

Grant Hall & Darryl Hazelwood

Anthony Barnes, Martin & Drew Gaffney

We listened to our clients preference for auction conditions and conducted our Autumn sale along the same lines as last year's Spring sale.

We welcomed many local and interstate visitors who were able to view the bulls whilst enjoying refreshments provided by Buzz Coffee, the Landfall ladies catering team and the Old L's football club.

Lou & Gerald Archer with their 13 grandchildren and daughter Ellie Wheeler

Ed Archer, Gary & Clare Lindsay

The tall and not so tall at Landfall, Declan Underwood & Mitch Stackhouse

David Ball & Will Archer

Ferghal Berry, Tim Wheeler & Blayne Pinner

Tim & Ellie Wheeler

Jarrod McKay, Scott Cavanagh & Alan Beckett

Zara, Winnie, Tom, Joe & Hedley Archer

Ross & Ken Heywood, Richard & Alex Orton

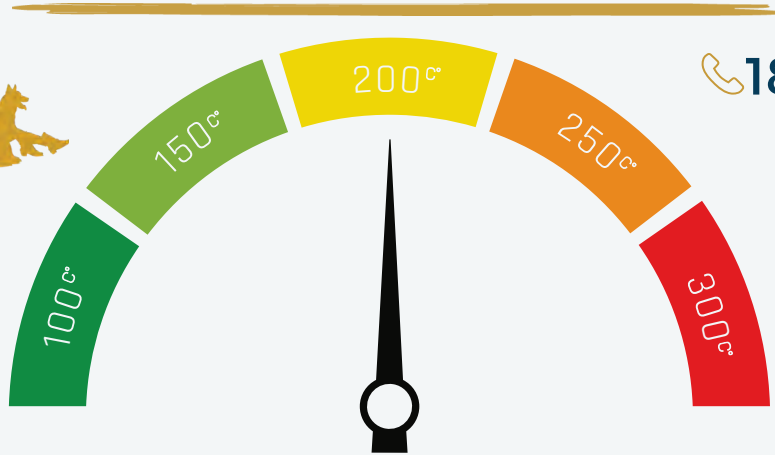

**Rural Alive & Well (RAW) is a local not for profit, building mentally healthy and resilient rural, agricultural and primary industry communities.**

RAW specialises providing proactive outreach and one-on-one support that addresses situational stressors and increases protective factors, to minimise the risk of suicide.

RAW's staff have first-hand experience with the complexities of living and/or working in rural, remote and primary industry sectors. Staff each have backgrounds in Dairy, Livestock, Cropping, Mining, Wool Production, Fruit Growing, Forestry, Transport and Seafood.

RAW is 'non-clinical', genuine and non-intrusive. The service is confidential with no fees for participants.

If you or someone you know is experiencing a challenging period, we encourage you to reach out today.
