# Welcome

**We invite you to attend our 19th Annual Spring on property auction and are pleased to offer you 117 performance recorded two-year-old and 158 yearling bulls.**

The main sire lines represented in this offering are Landfall New Ground, Rennylea L519 and Landfall Leonardo P145 with just under 50% sired by these bulls. More than half of the catalogue represents Landfall sires with our strategy of identifying our elite sires at a young age and multiplying them in the herd, playing an important role in helping us to meet our breeding objectives.

Yearling bulls will feature heavily in this offering on the back of strong demand in our Spring Sale last year and continued market acceptance. We are seeing many benefits in the use of yearling bulls in breeding programs across our client base. We have said each sale for a few years, that the increased offering is driven by our desire to be the best valuer provider of Angus genetics in the market. Maintaining quality in our offering is a key consideration, the ratio of bulls that make sale

to bulls born has not changed on the back of a continued increase in the number of breeding females in the Landfall herd. The Landfall production system provides us the opportunity to accurately identify animal performance in the herd and make sound decisions on where each individual ranks in the population.

The year 2022 continues to be an incredible year for the Australian Beef Industry. Sustained strong demand for beef products both domestically and internationally are driving confidence across all sectors of the value chain. We have seen heavy investment in expansion at all levels of production across the industry to ensure that we can continue to meet demand and capitalise on the opportunities presented to us.

As history shows there are external factors that effect the beef market and right now

there are some changes to our economic environment along with a biosecurity risk that are shaping some change. It is important that we don't become reactionary to things that are largely out of our control. At an individual business level our strongest position is built by implementing sound and well-structured systems that focus on best practice giving high quality outcomes.

We would like to take this opportunity to thank all the Landfall staff, family members and associates for their valuable contribution to our program. The commitment and dedication of these people is vital to our success.

We welcome inspection of the offering and the wider Landfall herd anytime in the lead up to the sale.

Kind Regards,

**The Archer Family.**

# About Landfall Angus

**Landfall Angus is a family owned and operated business located in the Tamar Valley in Northern Tasmania. Our cow herd consists of over 2500 registered females, making Landfall one of the largest Angus Seedstock herds in Australia.**

Landfall Angus cattle perform well in the natural environments of Australia, a direct result of our strong focus on the commercial realities of beef production. The Landfall Angus cow herd is highly fertile, functional and high performing. Careful genetic selection and improved production management techniques ensure that Landfall is a leading Seedstock herd in Australia.

## HISTORY

Landfall Angus was established in 1948 with the purchase of twelve females from the Australian mainland. The original Landfall cows were selected for their large frame and femininity. Sires from “Naranghi” in New South Wales, at that time bred by Mr. John Bott, were consistently breeding progeny that excelled in fertility and growth. They complimented the Landfall cows very well and these sires were used for 20 years.

In the early years of breeding bulls a small number were sold privately to regular Tasmanian and King Island clients. From 1975 an annual auction has been held offering bulls and females.

In 2004 a spring sale was introduced and is held annually on property offering bulls.

*We supply our clients with high quality Angus genetics that are fertile, structurally sound, easy doing and low maintenance without compromising the importance of growth and carcass performance.*

## TODAY

Landfall Angus is today owned and managed by the fourth and fifth generation of the Archer family. The Landfall herd now consists of over 4000 registered animals running over two main production centres in the Tamar Valley, calving 2500 registered females. The Angus herd is run alongside a self-replacing flock of composite sheep.

The Landfall herd is run under commercial conditions, in large contemporary groups. Artificial insemination and embryo transplant are used to increase the rate of genetic gain in our herd. Strict criteria is used for the selection of sires and dams within our breeding programs.

A strong emphasis is placed on the traits that contribute positively to the commercial profitability and sustainability of beef production. Firstly we aim to breed a functional female, focussing on structural soundness, docility, fertility and calving ease. Animals are joined for restricted periods resulting in short calving periods. Any animal not meeting the criteria is culled. The focus then moves towards growth and carcass quality with targets set above breed average whilst avoiding extremes. All registered animals are performance recorded with Breedplan and Landfall has been a member of Angus Breedplan since its inception in the early 1980's. Data is collected from animals run in large groups allowing us to directly compare genetics without the impact of environmental differentiation.

Annual sales are held on property in the Autumn and Spring, with in excess of 600+ bulls being sold annually.

## OUR GOALS AT LANDFALL ARE:

1. To provide our clients with superior genetics to help them achieve a sound investment and help to improve their bottom-line.
2. To produce genetics which perform well under the natural environments of Australia.
3. To have relationships of high integrity with our clients.

# Sale Notes

## 1. Location

8 kilometres from the centre of Launceston, North on East Tamar Highway. Follow A8 towards Georgetown. See page 115 for map and travel information.

## 2. Covid Restrictions

The situation with Covid-19 is an ever changing landscape. We plan to hold the sale on property and welcome our clients who feel comfortable to be here.

We will continually keep up to date with the restrictions that we need to have in place to keep everyone safe leading up to and on the day. Should anyone not feel comfortable to be here or is unable to travel from interstate please get in touch with us if you require assistance in making your selections to operate in the auction remotely.

Food and refreshments will be offered with strict adherence to the Covid restrictions.

## 3. Rebates

4% rebate commission offered on all bulls to agents settling within 7 days of invoice. All purchasers must nominate their agent 24hrs prior to the sale with Nutrien Livestock. Please email [livestocktas@nutrien.com.au](mailto:livestocktas@nutrien.com.au) or [frank@landfall.com.au](mailto:frank@landfall.com.au)

## 4. Freight

Free freight on all bulls to Melbourne, Grassy and Lady Barron ports for lots sold by auction. Free freight on all bulls within mainland Tasmania. The vendor or his agent will make freight arrangements (conditions apply).

## 5. Nutrition

All bulls have been fed grass with supplement silage.

## 6. Animal Health

- All bulls have been semen tested and had their penis and testicles examined.
- All bulls have been tested as BVD P.I. negative.
- All bulls have been vaccinated with Vibrovax, Pestigard and Ultravac 7 in 1.

## 7. Recessive Genetic Conditions

All lots are clearly marked with their respective genetic status.

## 8. Bull Guarantee

All bulls covered by the Landfall Bull Guarantee (see details on page 104 of this catalogue).

## 9. Joining Sires

Lots 1-51 except Lot 12, plus Lot 107 have been used for joining in the Landfall herd in the Spring of 2021. Please take this into account when assessing these bulls.

## 10. Semen Rights

Landfall Angus reserves the right to collect any bull sold for use in the Landfall herd. Collection will be at Landfall's expense and at the convenience of the purchaser.

## 11. Photos and Videos

Ben Hooper from Clear Vision Imaging has captured videos of all sale lots. They will be available late August at [www.landfall.com.au](http://www.landfall.com.au)

## 12. Registrations

Please note: some lots are HBR registered and some are APR registered. All animals are eligible for transfer with their respective registration status.

## 13. Inspection

All bulls will be available for inspection at Landfall on Wednesday 14th of September from 9am until 1pm. Inspection any other time is welcome by appointment, ring:

Frank Archer - 0417 506 163

Ed Archer - 0417 337 144

### PLEASE NOTE:

As vendors, the Archer family at Landfall want your valuable new purchase to be given every opportunity to travel and settle into their new environment with a minimum of stress.

To this end we ask you to nominate;

### CLEAR DELIVERY INSTRUCTIONS.

Short notice requests for collection of animals will not be accepted.

Images and videos of most lots will be available on our website closer to sale date.

**Thank you for your co-operation.**

### DNA SUFFIX KEY:

The suffix displayed at the end of each animal's name indicates the DNA parentage verification that has been conducted by Angus Australia.

**PV:** both parents have been verified by DNA.

**SV:** the sire has been verified by DNA.

**DV:** the dam has been verified by DNA.

**#:** DNA verification has not been conducted.

**E:** DNA verification has identified that the sire and/or dam may possibly be incorrect, but this cannot be confirmed conclusively.

**DISCLAIMER:** Animal details included in this catalogue, including but not limited to pedigree, DNA information, Estimated Breeding Values (EBVs) and Index values, are based on information provided by the breeder or owner of the animal. Whilst all reasonable care has been taken to ensure that the information provided in this catalogue was correct at the time of publication, neither the vendor, Angus Australia or the selling agents assume any responsibility for the accuracy or completeness of the information, nor for the outcome (including consequential loss) of any action taken based on this information.

**Notes**

New Ground is fast becoming one of the go to sires of the breed for balanced breeding outcomes. His progeny display tremendous length of body with extra width and depth. Docility of progeny is outstanding being a pleasure to handle. Daughters in the Landfall herd are now at 3 years of age and are stand out females in the Landfall herd, demonstrating the depth of quality in the female side of New Ground's pedigree. A total of 49 sons on offer in this sale.

**Notes**

The top selling bull from the Landfall Autumn Sale in 2020 to Absolute Angus in Victoria. A moderate frame bull with length, depth and width. A bull that moves well with a sound set of feet and legs. A high calving ease option that is above average for growth and a very moderate mature weight. We expect P145 to breed females that excel in the Landfall production system and consequently in commercial beef breeding systems. A total of 34 sons on offer.

### Notes

A genuine curve bending sire, who breeds consistency in his progeny. Still breeding bulls towards the top end of the catalogue, Keystone is one of the highest use bulls across the industry over the last three years, we are experiencing good foot and leg structure with a clean front end. Progeny are displaying above average frame and length with docility a strong point. A total of 11 sons on offer in this sale.

DOC,Structure(Clav Setx 1, Foot Angle x 1),Genomics

**Notes**

Pheasantry was purchased at the Te Mania sale in 2020 by a syndicate involving Landfall. A purpose bull we selected to increase carcase quality, in particular marbling. We inspected him in March of this year and found him very sound in the feet and legs with extra length of body. Five sons on offer in this sale.

# Stud stock insurance with all bulls purchased at the Landfall Angus Spring Sale

For all bulls sold in this catalogue, Achmea Australia, Australia's specialist farm insurer, will provide **2 Star Mortality cover for three months (including accidental loss of use).** This cover has been paid for by Landfall Angus.

At the end of the three months, if you would like to purchase additional cover, please contact our Farm Insurance Specialists:  
Michelle Stevens (0437 249 682) and Mark Gaetani (0408 915 441) who are attending the sale.

### Our flexible options include:

- ☆ **1 Star** Mortality only (including transit)
- ☆☆ **2 Star** Mortality including accidental loss of use
- ☆☆☆ **3 Star** Mortality including accidental loss of use, sickness and disease.

# Caring For Your Bulls

## More calves, more years

**Your bull is an important investment. With proper management you can achieve a longer working life from your bull resulting in more calves at a reduced cost per calf.**

### 1. Arrival on farm

- a. Have some quiet cows or steers in the yard when the bull arrives. He will often be unsettled as he has left his mates and travelled on a truck for his first time. Give him some time to adapt to his new surroundings.

### 2. Pre-Joining

- a. Your new bulls will benefit from exposure to some empty cows for 2-3 weeks prior to their normal breeding period. This exposure will allow them to service some females and become exposed to any of the normal pathogens in your cow herd. If you have purchased multiple bulls, expose them only two at a time. It is then important to give your bull time to recover following the exposure period before the joining season begins.
- b. Do a pre-joining Breeding Soundness Examination (BSE) on all bulls to evaluate; structure, testicles and serving capability. This is the opportunity to identify any bull which may delay cows going in calf. Also administer booster vaccinations.

### 3. Joining

- a. Don't over join new bulls (maximum of 40 cows).
- b. Multi-sire join where possible to minimize the risks associated with a bull breaking down in the joining period. If you need to single sire join observe closely and rotate with a proven bull for at least 1 cycle. New bulls are the most at risk of break down, ensure you check them regularly.
- c. Most bull fertility issues develop during the joining period rather than being pre-existing problems. This means regular checking of bulls is essential (2-3 times a week for the first 3 weeks then weekly).

Check for:

- Try to observe the bull serving (mounting is not a successful serve)
- Any signs for lameness
- Evidence of penile or preputial swelling
- Any signs of ill health (lethargic, etc)
- Number of cows cycling (5% cycling per day if not in calf, this should decrease as cows conceive)

### 4. Post Joining

- a. Your bulls will spend most of their life in the bull paddock. You need to try minimize bull paddock injuries (bull fights) by not overcrowding the paddocks and possibly removing aggressive dominant bulls. Ensure young bulls have access to adequate feed to continue growing. Mature bulls should not be allowed to get fat, keep them in condition score 3. Mature bulls kept in body condition score 3 will have a longer working life.
- b. Pregnancy test early to identify any joining issues. This early pregnancy test will not only give you more time to make better decisions but it will also help identify the potential case of sub-fertility and allow you to prevent the problem in subsequent years.

# Understanding the TransTasman Angus Cattle Evaluation (TACE)

## WHAT IS THE TRANSTASMAN ANGUS CATTLE EVALUATION?

The TransTasman Angus Cattle Evaluation is the genetic evaluation program adopted by Angus Australia for Angus and Angus influenced beef cattle. The TransTasman Angus Cattle Evaluation uses Best Linear Unbiased Prediction (BLUP) technology to produce Estimated Breeding Values (EBVs) of recorded cattle for a range of important production traits (e.g. weight, carcass, fertility).

The TransTasman Angus Cattle Evaluation is an international genetic evaluation and includes pedigree, performance and genomic information from the Angus Australia and Angus New Zealand databases, along with selected information from the American and Canadian Angus Associations.

The TransTasman Angus Cattle Evaluation utilises a range of genetic evaluation software, including the internationally recognised BLUPF90 family of programs, and BREEDPLAN® beef genetic evaluation analytical software, as developed by the Animal Genetics and Breeding Unit (AGBU), a joint institute of NSW Agriculture and the University of New England, and Meat and Livestock Australia Limited (MLA).

## WHAT IS AN EBV?

An animal's breeding value can be defined as its genetic merit for each trait. While it is not possible to determine an animal's true breeding value, it is possible to estimate it. These estimates of an animal's true breeding value are called EBVs (Estimated Breeding Values).

EBVs are expressed as the difference between an individual animal's genetics and a historical genetic level (i.e. group of animals) within the TACE genetic evaluation, and are reported in the units in which the measurements are taken.

## USING EBVS TO COMPARE THE GENETICS OF TWO ANIMALS

TACE EBVs can be used to estimate the expected difference in the genetics of two animals, with the expected difference equating to half the difference in the EBVs of the animals, all other things being equal (e.g. they are joined to the same animal/s).

For example, a bull with a 200 Day Growth EBV of +60 would be expected to produce progeny that are, on average, 10 kg heavier at 200 days of age than a bull with a 200 Day Growth EBV of +40 kg (i.e. 20 kg difference between the sire's EBVs, then halved as the sire only contributes half the genetics).

Or similarly, a bull with an IMF EBV of +3.0 would be expected to produce progeny with on average, 1% more intramuscular fat in a 400 kg carcass than a bull with a IMF EBV of +1.0 (i.e. 2% difference between the sire's EBVs, then halved as the sire only contributes half the genetics).

## USING EBVS TO BENCHMARK AN ANIMAL'S GENETICS WITH THE BREED

EBVs can also be used to benchmark an animal's genetics relative to the genetics of other Angus or Angus infused animals in Australia.

To benchmark an animal's genetics relative to other Angus animals, an animal's EBV can be compared to the EBV reference tables, which provide:

- the breed average EBV
- the percentile bands table

The current breed average EBV is listed on the bottom of each page in this publication, while the current EBV reference tables are included at the end of these introductory notes. For easy reference, the percentile band in which an animal's EBV ranks is also published in association with the EBV.

## CONSIDERING ACCURACY

An accuracy value is published with each EBV, and is usually displayed as a percentage value immediately below the EBV.

The accuracy value provides an indication of the reliability of the EBV in estimating the animal's genetics (or true breeding value), and is an indication of the amount of information that has been used in the calculation of the EBV.

EBVs with accuracy values below 50% should be considered as preliminary or of low accuracy, 50-74% as of medium accuracy, 75-90% of medium to high accuracy, and 90% or greater as high accuracy.

## DESCRIPTION OF TACE EBVS

EBVs are calculated for a range of traits within TACE, covering calving ease, growth, fertility, maternal performance, carcass merit, feed efficiency and structural soundness. A description of each EBV included in this publication is provided on the following page.

## UNDERSTANDING ESTIMATED BREEDING VALUES (EBVs)

### BIRTH

CEDir	%	Genetic differences in the ability of a sire's calves to be born unassisted from 2 year old heifers.	Higher EBVs indicate fewer calving difficulties in 2 year old heifers.
CEDtrs	%	Genetic differences in the ability of a sire's daughters to calve unassisted at 2 years of age.	Higher EBVs indicate fewer calving difficulties in 2 year old heifers.
GL	days	Genetic differences between animals in the length of time from the date of conception to the birth of the calf.	Lower EBVs indicate shorter gestation length.
BW	kg	Genetic differences between animals in calf weight at birth.	Lower EBVs indicate lighter birth weight.

### GROWTH

200 Day	kg	Genetic differences between animals in live weight at 200 days of age due to genetics for growth.	Higher EBVs indicate heavier live weight.
400 Day	kg	Genetic differences between animals in live weight at 400 days of age.	Higher EBVs indicate heavier live weight.
600 Day	kg	Genetic differences between animals in live weight at 600 days of age.	Higher EBVs indicate heavier live weight.
MCW	kg	Genetic differences between animals in live weight of cows at 5 years of age.	Higher EBVs indicate heavier mature weight.
Milk	kg	Genetic differences between animals in live weight at 200 days of age due to the maternal contribution of its dam.	Higher EBVs indicate heavier live weight.

### FERTILITY

DtC	days	Genetic differences between animals in the time from the start of the joining period (i.e. when the female is introduced to a bull) until subsequent calving.	Lower EBVs indicate shorter time to calving.
SS	cm	Genetic differences between animals in scrotal circumference at 400 days of age.	Higher EBVs indicate larger scrotal circumference.

### CARCASE

CWT	kg	Genetic differences between animals in hot standard carcass weight at 750 days of age.	Higher EBVs indicate heavier carcass weight.
EMA	cm <sup>2</sup>	Genetic differences between animals in eye muscle area at the 12/13th rib site in a 400 kg carcass.	Higher EBVs indicate larger eye muscle area.
Rib Fat	mm	Genetic differences between animals in fat depth at the 12/13th rib site in a 400 kg carcass.	Higher EBVs indicate more fat.
P8 Fat	mm	Genetic differences between animals in fat depth at the P8 rump site in a 400 kg carcass.	Higher EBVs indicate more fat.
RBV	%	Genetic differences between animals in boned out saleable meat from a 400 kg carcass.	Higher EBVs indicate higher yield.
IMF	%	Genetic differences between animals in intramuscular fat (marbling) at the 12/13th rib site in a 400 kg carcass.	Higher EBVs indicate more intramuscular fat.

### OTHER

NFI-F	kg/day	Genetic differences between animals in feed intake at a standard weight and rate of weight gain when animals are in a feedlot finishing phase.	Lower EBVs indicate more feed efficiency.
Doc	%	Genetic differences between animals in temperament.	Higher EBVs indicate better temperament.

### STRUCTURE

Foot Angle	score	Genetic differences in foot angle (strength of pastern, depth of heel).	Lower EBVs indicate more desirable foot angle.
Claw Set	score	Genetic differences in claw set structure (shape and evenness of claws).	Lower EBVs indicate more desirable claw structure.

### SELECTION INDEXES

\$A	\$	Genetic differences between animals in net profitability per cow joined in a typical commercial self replacing herd using Angus bulls. This selection index is not specific to a particular production system or market end-point, but identifies animals that will improve overall profitability in the majority of commercial grass and grain finishing beef production systems.	Higher selection index values indicate greater profitability.
\$D	\$	Genetic differences between animals in net profitability per cow joined in a commercial self replacing herd targeting the \$D supermarket trade.	Higher selection index values indicate greater profitability.
\$GN	\$	Genetic differences between animals in net profitability per cow joined in a commercial self replacing herd targeting pasture grown steers with a 250 day feedlot finishing period for the grain fed high quality, highly marbled markets.	Higher selection index values indicate greater profitability.
\$GS	\$	Genetic differences between animals in net profitability per cow joined in a commercial self replacing herd targeting pasture finished steers.	Higher selection index values indicate greater profitability.

# Bull Guarantee

**At Landfall we understand and value the economic importance of fertility within a beef herd. Empty cows are a huge cost to a producer and at Landfall we are doing our utmost to limit the unexpected outcomes in a breeding situation.**

In an endeavour to provide our clients with a professional service, we have implemented this bull guarantee. It is to ensure that both Landfall and you (our valued client) have a clear understanding of each others obligations.

Our breeding bulls are assessed under a stringent set of guidelines to ensure minimal exposure of our clients to fertility issues.

- ✓ All bulls are structurally assessed and those that don't meet the specifications are culled.
- ✓ All bulls are semen tested and have their penis checked by an independent veterinarian.

At Landfall we are aware that even after these stringent tests are carried out that there is a risk that a breeding bull may still not work to their expected potential. Therefore our guarantee covers that risk; however it does not replace good management and due care by the purchaser.

## GUIDELINES

Landfall guarantees breeding bulls from the date of purchase against loss of fertility due to structural failure of the bull for a period of two years. For example, corkscrew penis or bad feet. Our guarantee does not cover situations such as broken penises, prolapsed prepuce and broken legs etc.

In the event of a less than acceptable mating outcome, the bull will be assessed by a veterinarian chosen by Landfall and if the bull is found to be the cause of the infertility then Landfall will offer compensation in the form of:

### FIRST YEAR (12 month period from date of purchase)

100% of the purchase price in the form of:

- Replacement with an equivalent bull to the mutual agreement of both the vendor and purchaser.
- Credit for use with further purchases.

### SECOND YEAR (12 to 24 month period after purchase date)

50% of the purchase price in the form of:

- Credit for use with further purchases.

In the event that one of the above credits is issued it must be used within 12 months of the issue date or it will be forfeited. If a credit is issued it is non-transferable.

(The original purchaser of the bull is the only eligible party to claim a credit).

The infertile bull is then to be slaughtered with proceeds of the sale to be paid to Landfall. Landfall will cover the veterinary expenses and transport costs of the bull to an abattoir.

**Landfall will not be held liable and does not offer compensation for loss of income in the event of infertility resulting in non pregnant females.**

# The Obligation of the Purchaser

**The Landfall Guarantee is not a replacement for sound management practices. The guarantee is provided to cover the performance of the bull where breeding cows are managed to recognised industry standards. The purchaser of the bull is expected to observe joining, monitor for later cycling and record any repeat cycling in the females. If any problems arise it is expected that the purchaser notifies Landfall within 3 months, after the end of the joining period.**

At Landfall we recognise there is an infertility risk involved in breeding herds. We breed our bulls so as to limit the financial and production risks involved. If for any reason there are any unexpected

outcomes with Landfall bulls we stand by our product and do not expect you the producer to have to bear the entire financial burden. If you have a problem we want to be the first to know about it. We

have confidence in our bulls and offer a commitment to our clients that our product and service is of the highest quality achievable. Your success is ultimately our success.

## **FREIGHT**

- Free sea freight to Melbourne, Grassy and Lady Barron on all bulls sold at auction
- Free freight within mainland Tasmania on the condition that all bulls sold by auction be delivered within one week of purchase

# THE ART OF SAUSAGE MAKING

A little background to Landfall Farm Fresh...

Landfall Farm Fresh butcher was established in 2008 by the fifth generation Archer siblings. A family with an established reputation as one of Australia's leading Angus beef breeders and local farmers since 1876. Landfall Farm Fresh was a dream of their grandfather's and has become one of Launceston's finest butchers.

Healthy stock and sustainable farming practices have built the foundations for a butcher shop that provides consistent, quality produce.

Their animals are hand-picked from their very own farm in the Tamar Valley each week, and their gluten and preservative free smallgoods are all made by hand.

The traditional approach to butchering, the whole animal processing, and the dry-aging technique results in a unique eating experience. Experience the passion, pride, and integrity of Landfall.

They welcome you to visit them in store Tuesday to Friday and to follow them on Facebook and Instagram.

49 Balfour St, Launceston  
[www.landfallfarmfresh.com.au](http://www.landfallfarmfresh.com.au)  
 (03) 6334 5751

Making sausages is an ancient art that has made a remarkable comeback in recent years. At Landfall Farm Fresh we hand-make all our sausages, burgers, and patties. We believe in minimising the use of preservatives and we pride ourselves on creating healthier options for our community.

Our range of smallgoods provides options for the gourmet lover, right through to the fussy kids. Not only do we prepare and offer traditional sausages and burgers, but also specialty gourmet sausages and patties. Our traditional range has a focus on old-fashioned quality, whilst our gourmet range looks towards flavour harmony and uniqueness.

Our varieties have flourished with the growing demand for gluten and preservative free foods. We have noted a big increased in requests for options that provide peace of mind for young mothers. Not including preservatives results in a short self-life for our smallgoods. Each week our team get very busy making everything from scratch. It's a big team effort on a Tuesday to get everything prepped, mixed, twisted and packaged – ready for our loyal customers.

The use of natural sheep casings for our traditional range, and hog casings for our gourmet range is also a big drawcard. Synthetic casings are readily used today however, we make a conscious

effort to reduce waste in any way we can. Our point of difference is in offering whole animal butchering and this philosophy carries through to our informed choice of sausage casings. Where possible we opt to make use of the entire animal. The natural casings offer a much more positive eating experience, offering less chew and a deeper, rich flavour.

The benefits of the natural casing are not only flavour, but also visual appeal. Because the natural casing breathes, it results in a deeper flavour and richness in the sausage – the smoking and cooking flavours can permeate the casing and infuse the meat. Our sausages are very natural looking and can be somewhat irregular in shape and size, given the natural variance in animals anatomy. Our sausages don't have that plastic appearance that you see on supermarket shelves. We invite you to visit us in-store at 49 Balfour Street, Launceston for your gluten and preservative free smallgoods fix. Made by hand, with love and a passion for sensational food!

## Marmalade-Baked Sausages

🕒 Prep Time: 10mins 📅 Cooking Time: 25min ✂ Serves: 4

### Ingredients

- 1 1/2 tbs extra virgin olive oil
- 12 good-quality pork sausages
- 150g marmalade, warmed
- 110ml apple cider
- 2 red onions, cut into wedges
- 3 pears, cut into wedges
- 1 tbs wholegrain mustard
- 1 garlic bulb, halved crossways
- Pickled cucumbers and dill sprigs, to serve

### Method

**Step 1**

Preheat oven to 220°C and grease a large baking tray. Toss oil, sausages, marmalade, cider, onion, pear, mustard, garlic, 1 tsp salt flakes and a pinch of ground black pepper on prepared tray. Spread over tray and roast, basting 3 times with cooking juices, for 20-25 minutes or until sausages are cooked through.

**Step 2**

Scatter over pickled cucumber and dill to serve.

**Full recipe at:** <https://www.delicious.com.au/recipes/marmalade-baked-sausages/r82abokk?r=recipes/collections/yil20vmy>

# From Flinders to Tassie

As the youngest of four boys, growing up on our family farm at Lackrana on Flinders Island, off the North East tip of Tasmania, is where my interest in agriculture and livestock began.

Joe, Maree, Dan, Steve, Jim, Ben & Lauren

At the time the farm was predominantly a Merino breeding herd, which filled in most of our weekends when I wasn't playing football with and against my primary school classmates or clay target shooting with my dad and brothers at the local gun club. In more recent years the family farm has transitioned into a beef operation made up of an Angus breeding herd which is focused on backgrounding steers for feedlot.

Our property, being close to the beach was idyllic, allowing me to spend many days with my family and friends boating, fishing and trail bike riding.

My education began at the Flinders Island primary school until the commencement of high school when I moved off the island and into Launceston attending Launceston Church Grammar School as a boarding student. While at school I studied enough to keep my parents happy,

receiving the odd academic achievement, however it was in the wood and metal working classes that my grades excelled.

During my years in Launceston I spent most of my weekends playing sports, particularly football, for which I lived and breathed. Playing for Grammar and a Launceston club fuelled my passion further.

Olds L's Cocktail Night – Frank Archer, Tim Wheeler, Alex Ferguson & Dan Crawford

In my later years at high school, I participated in agricultural studies and classes which sparked my interest in the science and development of the Ag industry. This led me to enrol into an Ag College post schooling.

After high school I moved to Horsham in North West Victoria, attending Longerenong Agricultural College, which is where I broadened my knowledge and skills in different areas and aspects of agriculture while completing a Certificate IV in Agriculture.

Throughout the year I worked for a local family who owned a

large-scale cropping enterprise as well as a White Suffolk commercial and stud flock. It was there that I spent most of my weekends working to fund the college lifestyle. After the conclusion of the college year, I worked on another cropping farm at Rupanyup (30 min East of Horsham) for the hay and harvest season.

Towards the end of my college year, I was looking to move back to Tasmania, hopefully to a beef seedstock property. It was then I made contact with Frank Archer with the view to seeking employment at Landfall.

Lauren Griffiths catching the bigger fish

Always time for a smile

Four brothers – Joe, Ben, Jim & Dan

My employment here at Landfall started in January 2020 which has furthered my passion and knowledge in the genetic field of cattle as well as furthering my education in pasture management.

I have grown a great relationship with all past and present employees due to the generosity and inclusion Frank and the Archer family show towards all employed at Landfall, an opportunity for which I am extremely grateful.

100th birthday celebration

# Celebrating Heather May Archer's 100<sup>th</sup> Birthday

Heather May Archer, nee Scott, grew up on a property called Woodside at Hagley. She was the eldest of four daughters welcoming a brother who is 17 years younger.

As a young woman Heather went to Melbourne to study and train to be a kindergarten teacher, continuing to keep a part time role in her profession for many years amongst her farming and family life. Heather met Rob Archer, a very eligible bachelor from Landfall on a blind date organised by Rob's cousin. They married in 1949 and were busy through the years 1950 to 1962 producing 6 daughters and one son Gerald.

Her life was busy being a farmer's wife and the mother of a big brood of children. Cooking was

one of Heather's great skills. Their family were always well nourished, enjoying home-grown staples, including farm produced meat, cream, eggs and the vegies were often grown by Rob. Dessert, cakes and slices were a speciality, we all have great memories of being deliciously well fed at Landfall.

Heather had many extra curricula activities always keeping active and extremely productive. She convinced Rob that Landfall needed a tennis court where friends, family and local community folk had lots of fun. If you were

Heather's friend it was almost a pre requisite that you would pick up a racquet and have a hit. She loved her tennis and was still playing into her 92nd year. After she retired from tennis croquet became the game of choice.

Music has been important in Heather's life. She often attended musical and orchestral concerts. She played the violin and was a member of a local orchestra. She still plays the piano. Her children fondly remember many musical evenings singing and dancing around the lounge room at Landfall.

Ellie, Heather & Ed

Lou, Heather & Gerald

The Archer family 'Landfall' February 1982  
Front row: Judith, Louise, Heather, Rob & Rosemary  
Back row: Barbara, Gerald, Liz & Catherine

There are many associations of which Heather was an enthusiastic supporter. She is a Life Member of the Rocherlea State School Parents and Friends, she belonged to Inner Wheel which was attached to Rob's North Launceston Rotary club where he was a Life Member and Probus followed. Volunteering at the National Trust shop was a regular activity alongside driving for the Red Cross. When the World Heritage Archer home, 'Woolmers', at Longford was being prepared for opening to the public, Heather was one of the early volunteers preparing the historical home and contents.

The Home Industries at the Royal Launceston Show was an annual highlight, helping with the competitors, exhibits and judges.

Heather was a long-time member of the Launceston Camera club winning local and national competitions. As a family we have many photos and slides of precious and important occasions captured by her camera.

Heather and Rob travelled to Scotland and New Zealand for World Angus Forums which was the beginning of her world travels. Sadly, Rob died at 68 years of age, but Heather's adventurous and enthusiastic spirit allowed her further amazing trips to China, Europe and the UK.

The May Street Bridport beach shack was a very dear place of rest and recreation for Heather. She and the children would have a month there in the summer holidays with Rob and Gerald visiting at the weekends.

Bridport was her retreat where friends and family had happy special times for many years. A fair bit of bridge was played there.

Knitting and needle work were keen pastimes and Heather produced beautiful baby blankets for her grand and great grandchildren. It is rare, even now, to see Heather without knitting needles and a project on the go. The new babies in this family always have magnificent woollen booties and cardigans.

Heather is known for her feisty competitive spirit, she loves having a game of either Bridge, Quiddler, Scrabble or Upwords at every opportunity. She enjoys family visits especially when there is time for a game or two.

We are extremely lucky to have this powerhouse of a lady as a mother, mother-in-law, grand and great grandmother, sister and sister-in-law. She is an inspiration for grabbing life by the horns and making the most of opportunities. Her love, generosity and encouragement are a legacy and guiding light for us all.

Happy 100th birthday Heather, we had a wonderful family celebration.

Hedley struggling with a Fodder Beet

# Autumn Sale 2022 Round Up

With the relaxing of travel restrictions it was great to see many familiar faces on property together with those attending for the first time.

We have been fortunate with the weather at our last few sales, allowing us to sell direct from the pens. The inclusion of the 'Big Screen' last Autumn ensured all were well aware of the sale progress.

Our thanks to our clients Australia wide, the Nutrien team, Auctions Plus and Achmea Insurance for their continued support. Sale day sees the culmination of a huge team effort on the Landfall properties, a team we are very proud of.

Thank you to the Old Launcestonians Football Club ensuring we were well catered for post-sale, allowing all time for a social catchup.
